From a theory perspective it means that it is an open system where the agents and the environment coevolve and influence each other. This means that traditional approaches that are based on analysis no longer have agency and will not allow us to make sense of the world. It is not about throwing the old out but understanding where existing practices are applicable and where we need to think a new. This mini-book started out as a series of papers that were

experiential in nature and which were intended to provide an introduction to complexity theory, the Cynefin framework in particular and some of its related practices. These are simple practices that allow us to make sense of a complex world and allow us to establish what actions are appropriate and how we should act. "This user's guide and reference document describes the physical features of the Salmon River Basin, Idaho, stream channels that represent "natural conditions" for fish habitat-that is, streams that have not been influenced by major human disturbances. The data base was created to assist biologists and resource managers. It describes resource conditions that can be achieved through management objectives."

"Henry Brougham occupies a commanding place in British history during the first half of the nineteenth century. Born and educated in Edinburgh, he arrived in London in 1805 and made his mark, and over a lifetime gave himself with conviction and eloquence to a wide range of important issues : the reform of the law and of Parliament, the opening up of trade, the abolition of slavery, the extension of education, the better operation of cheritable trusts ...
