"Consumer Reports" will help you in making your buying decisions for the entire year. I was born and raised in Rockland County, which until the mid-fifties, was a region of New York State characterized by small villages and farms just 18 miles or so from New York City. After high school and college and having seen enough of "progress" destroying this wonderful way of life, my wife and I moved to a small community a few miles from Cooperstown, New York, home of the Baseball Hall of Fame. After raising three daughters and a career in education I decided to change the tempo of life and began a new occupation as a full-time writer of automotive history. This was simply an extension of what I had been doing since my preadolescent years when my brother and I would collect sales brochures from any auto dealer who wouldn't show us the exit/door, since we obviously had no cash, no credit and no intention of buying a new car. Ever since I was in elementary school I was fascinated by the hopped-up Fords and Chevys (and even an occasional Plymouth) of the late '30's and '40's that the older "cool" boys drove to school. Recollections of those cars from long ago instantly came to mind when I first saw the PT Cruiser in 2000. Having previously written numerous articles and several books on Chrysler vehicles, my interest in the PT as the subject of a forthcoming volume was instantaneous. Traces the natural history of the elusive ivory-billed woodpecker and explains why many scientists believe the bird is extinct, despite reports of ivory-bill sightings. Whether you want to know how your wheels and tires actually work and how they affect vehicle performance, or whether you just need advice as to what best suits your vehicle, this book provides the information you are looking for. This book covers daily use and competition cars and trucks, including off-road, circle track, drag, autocross, rally, and show vehicles. Beginning with a chapter on vehicle dynamics, with explanations of center of gravity, slip angle, yaw, roll, and pitch. Author Richard Newton then moves on to general information about tires and wheels--from materials and construction to use and maintenance. He also explores how this general information applies to specific types of vehicles, using pertinent examples throughout. Top-Manager und Vorstandsmitglieder bedeutender Automobilfirmen beschreiben anhand von Fallstudien ihre global anerkannten Erfolgsstrategien im Management ihrer Marken. This fabulous, behind-the-scenes book explores more than a decade of creative Chrysler concepts, forward-thinking technologies, and the cars and trucks that emerged from them - Viper, Neon, Intrepid, Cirrus, Dodge Ram, Eagle Vision, PT Cruiser, and a full line of minivans. DeLorezo explains how these cars revived Chryslers image with Wall Street and the media, explores how they boosted internal morale, and introduces the craftsman who build them. An in-depth, hard-hitting account of the mistakes, miscalculations and myopia that have doomed America` s automobile industry. In the 1990s, Detroit` s Big Three automobile companies were riding high. The introduction of the minivan and the SUV had revitalized the industry, and it was widely believed that Detroit had miraculously overcome the threat of foreign imports and regained its ascendant position. As Micheline Maynard makes brilliantly clear in THE END OF DETROIT, however, the traditional American car industry was, in fact, headed for disaster. Maynard argues that by focusing on high-profit trucks and SUVs, the Big Three missed a golden opportunity to win back the American car-buyer. Foreign companies like Toyota and Honda solidified their dominance in family and economy cars, gained market share in high-margin luxury cars, and, in an ironic twist, soon stormed in with their own

sophisticatedly engineered and marketed SUVs, pickups and minivans. Detroit, suffering from a “good enough” syndrome and wedded to ineffective marketing gimmicks like rebates and zero-percent financing, failed to give consumers what they really wanted—reliability, the latest technology and good design at a reasonable cost. Drawing on a wide range of interviews with industry leaders, including Toyota’s Fujio Cho, Nissan’s Carlos Ghosn, Chrysler’s Dieter Zetsche, BMW’s Helmut Panke, and GM’s Robert Lutz, as well as car designers, engineers, test drivers and owners, Maynard presents a stark picture of the culture of arrogance and insularity that led American car manufacturers astray. Maynard predicts that, by the end of the decade, one of the American car makers will no longer exist in its present form.

Drive is a cross-continent adventure that explores where our fuel-injected dreams have taken us. Award-winning journalist Tim Falconer invites us on his road trip as he meets vintage car enthusiasts on Route 66, rides along in a police cruiser, kicks the tires at a Las Vegas auto show and takes a hydrogen-powered car for a spin. Steering us along North America’s interstates and blue highways, meandering through small towns, sprawling suburbs and walkable neighbourhoods, Falconer shows us the growing collision of cars and people. In this complicated affair, who’s really in the driver’s seat? Can smart growth, public transit and complete streets free us? A spirited, front-seat view of quirky locals and locales, Drive looks at what auto-dominated life means to our health, environment and communities. Falconer also opens the door on British and Argentine car cultures, and considers the road ahead for China and India, nations with increasingly American attitudes.
