In the whimsical tradition he is known for, humorist Dennis Ford once again embarks on an amusing exploration into the captivating worlds of science, literature, history, and popular culture—all without ever leaving the comfy air-conditioned interior of his Saturn Ion. In the style of his previous work, *Thinking About Everything*, Ford shares a medley of new musings on the worries of the world and the unique friendliness of San Antonio as he plays peek-a-boo with a spider, attempts to climb a rainbow, and captures a leprechaun. Ever the helpful humorist, Ford continues on a journey of thoughtful adventures through the mundane

and esoteric as he explains how the postal service can mail itself into a profitable future, why fantastical lies can make elections more interesting, and a way through which one can acquire a window seat on the ferry to the Great Beyond. Included are "Excellent Groaners," a compilation of puns, and "Professor Fawcett's Notorious Lecture on Test-Irrelevant Thoughts," a learned presentation on the psychological perils of test anxiety told partly in acronyms. Miles of Thoughts offers an amusing glimpse into one man's upside-down world as he commutes through the beautiful scenery of the New Jersey Pine Barrens and contemplates life. Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations

downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.
