PANRE Practice Questions are the simplest way to prepare for the Physician Assistant National Recertifying Examination. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our PANRE Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our PANRE Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand. For use in preparation for certifying and recertification exams, helps PAs integrate the medical information they have received in their basic and clinical science courses. Following guidelines as established by the National Commission on Certification of Physician Assistants (NCCPA), overviews the primary care curriculum of PA programs nationwide. The book first couples a Clinical Review By Body Systems (ie. Endocrinology, Neurology, Respiratory) with a Clinical Review By Specialty (ie. Pediatrics, Surgery, Radiology). The final section focuses on Clinical/Diagnostic Skills (ie. Complete Neurological, Cardiovascular, Respiratory exams). Those who graduate from an accredited physician assistant program can take the Physician Assistant National Certifying Examination PANCE which assesses basic medical and surgical knowledge. After passing the PANCE exam, physician assistants will be issued NCCPA certification and may use the PA-C designation. We create these self-practice test questions (this book is the third volume of the series, focusing on topics related to Endocrine, Gastrointestinal/Nutritional and Genitourinary) referencing the concepts and principles currently valid in the exam. Each question comes with an answer and a short explanation which aids you in seeking further study information. For purpose of exam readiness drilling, this product includes questions that have varying numbers of choices. Some have 2 while some have 5 or 6. We want to make sure these questions are tough enough to really test your readiness and draw your focus to the weak areas. Think of these as challenges presented to you so to assess your comprehension of the subject matters. The goal is to reinforce learning, to validate successful transference of knowledge and to identify areas of weakness that require remediation. The questions are NOT designed to "simulate" actual exam questions. "realistic" or actual questions that are for cheating purpose are not available in any of our products.
