*Stories of sportsmen past come to life in History Afield, an account of the many and varied sporting pursuits that are part of the Wisconsin tradition. Author and outdoorsman Robert Willging shares more than two dozen tales of Wisconsin sporting history, highlighting the hunt for waterfowl, upland birds, and deer; trout fishing in wild north Wisconsin rivers; and recreating at early Wisconsin lakeside resorts. Anecdotes of fishing exploits on our plentiful waterways and presidential visits to northern Wisconsin reveal a unique slice of sporting culture, and chapters on live decoys and the American Water Spaniel demonstrate the human-animal bond that has played such a large part in that history. Tales of nature's fury include a detailed account of the famous Armistice Day storm, as well as the dangers of ice fishing on Lake Superior. These historical musings and perspectives on sporting ethos provide a strong sense of the lifestyle that Willging has*

*preserved for our new century. Featuring first-hand interviews and a variety of historic photos depicting the Wisconsin sporting life, History Afield shows how the intimate relationship between humans and nature shaped this important part of the state's heritage. Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early*
