Becoming Confident Teachers examines the teaching role of information professionals at a time of transition and change in higher education. While instruction is now generally accepted as a core library function in the 21st century, librarians often lack sufficient training in pedagogy and instructional design; consequently finding their teaching responsibilities to be stressful and challenging. By exploring the requirements and responsibilities of the role, this book guides teaching librarians to a position where they feel confident that they have acquired the basic body of knowledge and procedures to handle any kind of instructional requests that come their way, and to be proactive in developing and promoting teaching and learning initiatives. In addition, this book suggests strategies and methods for self-development and fostering a "teacher identity, giving teaching librarians a greater sense

of purpose and direction, and the ability to clearly communicate their role to non-library colleagues and within the public sphere. Specifically examines the causes of stress among teaching librarians, zeroing in on recognisable scenarios, which are known to 'zap' confidence and increase teacher anxiety among librarians An up-to-date and easily digestible take on the role and responsibilities of the teaching librarian Identifies the major trends that are transforming the teaching function within professional academic librarianship Introduction : the "long voyage of discovery" -- The big stuck in state capability -- Looking like a state : the seduction of isomorphic mimicry -- Premature load bearing : doing too much too soon -- Capability for policy implementation -- What type of organization capability is needed? -- The challenge of building (real) state capability for implementation -- Doing problem-driven work -- The searchframe : doing experimental iterations -- Managing your authorizing environment -- Building state capability at scale through groups. There is much intense interest in North Korea at present. This partly arises from questions about Korea's nuclear capability and intentions, and about the extent to which North Korea may be viewed as 'a rogue state' or part of 'the axis of evil'. In addition, however, North Korea has recently begun experimenting with reforms along Chinese lines. The vigour with which these will be pursued, and related questions about the degree of engagement, or otherwise, with South Korea are also important issues. This book provides full details of economic and political developments in North Korea since 1989 when the communist world began to change irrevocably. A practical, user-friendly guide to veterinary practice management, this text presents administrative and financial aspects in an understandable format. It also provides all that is needed to be known to run an efficient veterinary practice. As a final year supervisor for twelve years on the degree, masters, and PhD, I have noticed time and time again students approached their thesis confused and unsure what is expected from them; and rightly so. What is involved in the write up of the final year thesis is not something students are introduced to during their studies. The structure, content, and format of a thesis are only understood by seeing good examples. A thesis is the largest assignment a student will ever likely to

do and will resemble nothing they have done before. A final year thesis has to demonstrate academic structure, content, and integrity, something that is not always presented clearly by supervisors. As a supervisor, I designed a handout to help and guide my students. This handout became very popular as students shared it with their friends. After many years of editing and improving my notes, I have decided to publish it as a book. The second edition of the book comes with more examples. Taking away the fear of the writing up and having the confidence that a great thesis is achievable has helped my students focus instead on finding creative, challenging, and inspiring projects.
