Let's visit Max - a lovely question and answer story - participation book / interactive picture bookMax is very excited about your visit. He wants to get to know you better and that is why he asks you so many questions: Which toy do you like best? What is your favourite food? And which costume do you wear when someone comes to visit you? Talk to Max and tell him something about yourself - a lovely interactive story for

children ages 3 and older. Literacy: Interactive and dialogic readingThe participation book "Let's visit Max" helps to improve and encourage your child's language skills using the dialogical reading method. Dialogic reading motivates children to tell stories independently, which improves their vocabulary and language skills. In comparison to normal reading, children take an active role in dialogic reading. From telling the story in their own words, to questions about the book's content, to sharing about their own experiences, there are many ways to encourage children to tell stories

through dialogic reading with picture books. In the question and answer story "Let's visit Max", the protagonist wants to know more about your child. By answering the questions, your child is actively involved in the conversation. The story offers first contact to dialogic reading. The interactive picture book can also be used in the context of literacy education in the childcare center or kindergarten A child-friendly mix of simple and more challenging questions makes answering them fun for children from 3 years on. Support your child in telling and participating in the story With little

help - without giving away the solution to Max's question - you can help your child to answer the question. Not all children are already familiar with interactive books or dialogic reading and therefore they need your help. Please give your child enough time to think about each question Max asks and to give the answer independently. If your child has difficulties with a question, you can always rephrase the question or help answering it. treasured tale. Set in the future when "firemen" burn books forbidden by the totalitarian "brave new world" regime. The #1 New York Times--bestselling author of A Discovery of Witches examines the real-life history of the scientific community of Elizabethan London. Travel to the streets, shops, back alleys, and gardens of Elizabethan London, where a boisterous and diverse group of men and women shared a keen interest in the study of nature. These assorted merchants, gardeners, barber-surgeons, midwives, instrument makers,

mathematics teachers, engineers, alchemists, and other experimenters formed a patchwork scientific community whose practices set the stage for the Scientific Revolution. While Francis Bacon has been widely regarded as the father of modern science, scores of his London contemporaries also deserve a share in this distinction. It was their collaborative, yet often contentious, ethos that helped to develop the ideals of modern scientific research. The book examines six particularly fascinating episodes of

scientific inquiry and dispute in sixteenth-century London, bringing to life the individuals involved and the challenges they faced. These men and women experimented and invented, argued and competed, waged wars in the press, and struggled to understand the complexities of the natural world. Together their stories illuminate the blind alleys and surprising twists and turns taken as medieval philosophy gave way to the empirical, experimental culture that became a hallmark of the Scientific Revolution. "Elegant and erudite." —Anthony

Walking his two young children to school every morning, Thad Carhart passes an unassuming little storefront in his Paris neighborhood.

Intrigued by its simple sign—Desforges Pianos—he enters, only to have his way barred by the shop’s imperious owner. Unable to stifle his curiosity, he finally lands the proper introduction, and a world previously hidden is brought into view. Luc, the atelier’s master, proves an indispensable guide to the history and art of the piano. Intertwined with the story of a musical friendship are reflections on how pianos work, their glorious history, and stories of the people who care for them, from amateur pianists to the craftsmen who make the mechanism sing. The Piano Shop on

the Left Bank is at once a beguiling portrait of a Paris not found on any map and a tender account of the awakening of a lost childhood passion. Praise for *The Piano Shop on the Left Bank*: “[Carhart’s] writing is fluid and lovely enough to lure the rustiest plunker back to the piano bench and the most jaded traveler back to Paris.” –San Francisco Chronicle “Captivating . . . [Carhart] joins the tiny company of foreigners who have written of the French as verbs. . . . What he tries to capture is not the sight of them, but what they see.” –The New York Times “Thoroughly engaging . . . In part it is a book

about that most unpredictable and pleasurable of human experiences, serendipity. . . . The book is also about something more difficult to pin down, friendship and community.” –The Washington Post “Carhart writes with a sensuousness enhanced by patience and grounded by the humble acquisition of new insight into music, his childhood, and his relationship to the city of Paris.” –The New Yorker NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST BOOK WORLD Authentic examination papers from Cambridge Assessment English

provide perfect practice because they are EXACTLY like the real test. The Student's Book with answers allows students to familiarise themselves with IELTS and to practise examination techniques using authentic tests. It contains four complete tests for Academic candidates. An introduction to these modules is included in the book, together with an explanation of the scoring system used by Cambridge English Language Assessment. There is a comprehensive section of answers and tapescripts at the back of the book. Audio CDs containing the material for the

Listening Tests, and a Student's Book with answers with downloadable Audio are sold separately. These tests are also available as IELTS Academic Tests 1-4 on Testbank.org.uk This publication is a testament to the enormous potential that integrating traditional and scientific knowledge can have for both local communities and academic and development professionals alike. It also serves as a reminder to the scientific community that science should be shared with local people and not confined to journals and closed circles of technical experts. From Brazil nuts and Cat's claw to

Copaiba and Titica, this book shares a wealth of information on a wide range of plant species that only close collaboration between local peoples and researchers could possibly breed.
