This manual provides information for the operation and maintenance of the Blast Closure Valves manufactured by the American Machine and Foundry Company for specialized hardened installations designed by BuY+D. Covered are the model BCD-18, BCD-36 and BCD-48 blast valves and associated equipment. (Author). This manual is designed to help the user to achieve the best performance and longest

life from the pumps. Explains how to install the Language System and how to use it with the 13 sector versions of Applesoft BASIC, Integer BASIC and DOS. This manual describes the installation, operation, and maintenance of the LLNL, filter-life tester Q-250. This apparatus is designed to determine the gas life of a variety of chemical filters, such as M10-A1, M11, M13-A2, C2, and similar filters. The LLNL filter-life tester can generate isopropylmethylphosphonofluoridate (GB) or dimethyl methylphosphonate (DMMP) vapors in air at flow rates of up to 50 lpm. These filters and their specifications are listed in Appendix A. CAUTION: Personnel performing operations with this tester must be completely familiar with the contents of this manual, knowledgeable in system operation, and knowledgeable of materials used in operation of the LLNL filter-life tester. This operating and maintenance manual is intended for the use of the personnel responsible for the running and maintenance of the pumping plant described herein, and should be accessible to the operators at all times. General description and application data. General description. Specifications. Interface specification. Receiver/driver configuration. Interface input and output signals. Installation and operation. Unpacking. Inspection. Cabling and daisy chaining. Installation. Power up and

initial checkout. Operating instructions. Diagnostics.
Controls and indicators. Power up Loading failure
codes. Maintenance. Preventive maintenance.
Appendix A: Glossary.
