## **A Very Nervous Person's Guide to Horror Movies**

Dec 26 2022 "Films about chainsaw killers, demonic possession, and ghostly intruders. Screaming audiences with sleepless nights or sweat-drenched nightmares in their immediate future. What's going on here? Presumably, almost everybody has experience with horror films. Almost everybody has sat through a terrifying motion picture and suffered the after-effects, such as hypervigilance and sleep disturbances. Some people would even characterize themselves as horror fans. But what about the others-the ones who are curious about horror films, but also very, very nervous about them? This book delves into the science of horror cinema in an attempt to address common concerns about the genre. Why is the jump scare so effective, and so dreaded? What are the effects of horror films on mental and physical health? Why do horror films so often cause nightmares? Aren't horror films immoral ... and stupid, too? Are horror films bad for children and adolescents? What does the current profusion of horror films say about our society? Should we be concerned? Or can horror films be a force for good-do horror films have health benefits, can they be aesthetically and morally valuable, and might they even have therapeutic psychological and cultural effects? The book addresses these questions in short, readable chapters, peppered with vivid anecdotes and examples and supported by scientific findings. It notes that while horror films can have negative effects, they can also help people confront and manage fear"--

**The Philosophy of Horror** Dec 14 2021 Sitting on pins and needles, anxiously waiting to see what will happen next, horror audiences crave the fear and exhilaration generated by a terrifying story; their anticipation is palpable. But they also breathe a sigh of relief when the action is over, when they are able to close their books or

leave the movie theater. Whether serious, kitschy, frightening, or ridiculous, horror not only arouses the senses but also raises profound questions about fear, safety, justice, and suffering. From literature and urban legends to film and television, horror's ability to thrill has made it an integral part of modern entertainment. Thomas Fahy and twelve other scholars reveal the underlying themes of the genre in *The Philosophy of Horror*. Examining the evolving role of horror, the contributing authors investigate works such as Mary Shelley's *Frankenstein* (1818), horror films of the 1930s, Stephen King's novels, Stanley Kubrick's adaptation of *The Shining* (1980), and Alfred Hitchcock's *Psycho* (1960). Also examined are works that have largely been ignored in philosophical circles, including Truman Capote's *In Cold Blood* (1965), Patrick Süskind's *Perfume* (1985), and James Purdy's *Narrow Rooms* (2005). The analysis also extends to contemporary forms of popular horror and "torture-horror" films of the last decade, including *Saw* (2004), *Hostel* (2005), *The Devil's Rejects* (2005), and *The Hills Have Eyes* (2006), as well as the ongoing popularity of horror on the small screen. *The Philosophy of Horror* celebrates the strange, compelling, and disturbing elements of horror, drawing on interpretive approaches such as feminist, postcolonial, Marxist, and psychoanalytic criticism. The book invites readers to consider horror's various manifestations and transformations since the late 1700s, probing its social, cultural, and political functions in today's media-hungry

society.

**The Horror Film** Nov 13 2021 The Horror Film is an in-depth exploration of one of the most consistently popular,

but also most disreputable, of all the mainstream film genres. Since the early 1930s there has never been a time when horror films were not being produced in substantial numbers somewhere in the world and never a time when they were not being criticised, censored or banned. The Horror Film engages with the key issues raised by this most contentious of genres. It considers the reasons for horror's disreputability and seeks to explain why despite this horror has been so successful. Where precisely does the appeal of horror lie? An extended introductory chapter identifies what it is about horror that makes the genre so difficult to define. The chapter then maps out the historical development of the horror genre, paying particular attention to the international breadth and variety of horror production, with reference to films made in the United States, Britain, Italy, Spain and elsewhere. Subsequent chapters explore: The role of monsters, focusing on the vampire and the serial killer. The usefulness (and limitations) of psychological approaches to horror. The horror audience: what kind of people like horror (and what do other people think of them)? Gender, race and class in horror: how do horror films such as *Bride of Frankenstein*, *The Texas Chainsaw Massacre* and *Blade* relate to the social and political realities within which they are produced? Sound and horror: in what ways has sound contributed to the development of horror? Performance in horror: how have performers conveyed fear and terror throughout horror's history? 1970s horror: was this the golden age of horror

production? Slashers and post-slashers: from Halloween to Scream and beyond. The Horror Film throws new light on some well-known horror films but also introduces the reader to examples of noteworthy but more obscure horror work. A final section provides a guide to further reading and an extensive bibliography. Accessibly written, The Horror Film is a lively and informative account of the genre that will appeal to students of cinema, film teachers and researchers, and horror lovers everywhere.
