God had all of the angels He had created and the whole of the universe. The angel's minister to Him they are subject to His command acting on His spoken word. The universe is subject to God to perform according to His instruction of its formation. This was not fulfilling to God, something was missing God desired a family of being that was like Him intelligence with a mind He could relate to. God wanted someone He could entrust all of His wonderful works to. God wanted a family He could shower with love, and affection of Himself. All scripture references in this book are from the King James Bible. This book will show God's heart for His family. The preparations He made for them before He created the first man in His image. Like a man and his wife prepare the nursery getting it in order before the birth of the baby they are expecting. You will see the actions God's took to save His man when his disobedience to His commandment, caused separation from Him, and His glory covering. There was numerous times God's family disappointed Him, and He almost destroy them completely. God redeemed His family through His son Jesus Christ, and after His sacrifice to save the family, God gave Him head ship over them, and they became His body. How the Trinity works together to help the family, now the body of Christ to maintain that salvation. You will get to know the role of the body of Christ, here in the earth realm. The main one is to come against the adversary Satan, who temped and caused the fall of man in the beginning, and is still intent on man's destruction. This handbook is intended to give the broadcast industry an authoritative guide to the Radio Data System (RDS), also called Radio Broadcast Data System (RBDS). Since the standard's adoption, about 700 stations have begun broadcasting RDS in the United States. There is a wide variety of encoding equipment with prices starting as low as \$400, and over 30 models of RDS receivers have been introduced for cars, home receivers, portable and even PC receivers. Automobile manufacturer's such as General Motors, Ford, Audi, and Porsch now offer RDS on new vehicles. Yet despite all the support equipment in place, the FM broadcaster has been reluctant to implement and utilize this service, mainly because of a lack of understanding of what RDS can do for the station. This book finally provides the information required to understand RDS and its possibilities on a variety of levels, so that everyone involved in radio can make the most of it. Station owner, program director, salesperson, and talent alike will find the information he or she requires to maximize the possibilities of this new technology. Each feature of the system is explained in terms of its practical implementation at the station, and interviews with broadcasters currently using the system add a hands-on perspective. Scott Wright is a recognized pioneer in RDS development. As the designer of Delco Electronics' first RDS receiver, he has been extremely active in the development of the RDS standard in the US and in efforts to educate the broadcast community about its potential. He has represented Delco at the European Broadcasting Union's (EBU) RDS Forum and is currently the Chairman of the National Radio Systems Committee RBDS Subcommittee, the US standard-setting body. He is also a member of the Electronics Industries Association's (EIA) RDS Forum.
