When Bob Lutz retired from General Motors in 2010, after an unparalleled forty-seven-year career in the auto industry, he was one of the most respected leaders in American business. He had survived all kinds of managers over those decades: tough and timid, analytical and irrational, charismatic and antisocial, and some who seemed to shift frequently among all those traits. His experiences made him an expert on leadership, every bit as much as he was an expert on cars and trucks. Now Lutz is revealing the leaders—good, bad, and ugly—who made the strongest impression on him throughout his career. *Icons and Idiots* is a collection of shocking and often hilarious true stories and the lessons Lutz drew from

them. From enduring the sadism of a Marine Corps drill instructor, to working with a washed-up alcoholic, to taking over the reins from a convicted felon, he reflects on the complexities of all-too-human leaders. No textbook or business school course can fully capture their idiosyncrasies, foibles and weaknesses – which can make or break companies in the real world. Lutz shows that we can learn just as much from the most stubborn, stupid, and corrupt leaders as we can from the inspiring geniuses. He offers fascinating profiles of icons and idiots such as... Eberhard von Kuenheim. The famed CEO of BMW was an aristocrat-cum-street fighter who ruled with secrecy, fear, and deft maneuvering. Harold A. “Red” Poling: A Ford CEO and the ultimate bean counter. If it couldn’t be quantified, he didn’t want to know about it. Lee Iacocca: The legendary Chrysler CEO appeared to be brilliant and bold, but was often vulnerable and insecure behind the scenes. G. Richard “Rick” Wagoner: The perfect peacetime CEO whose superior intelligence couldn’t save GM from steep

decline and a government bailout. As Lutz writes: We'll examine bosses who were profane, insensitive, totally politically incorrect, and who "appropriated" insignificant items from hotels or the company. We'll visit the mind of a leader who did little but sit in his office.

We'll look at another boss who could analyze a highly complex profit-and-loss statement or a balance sheet at a glance, yet who, at times, failed to grasp the simplest financial mechanisms—how things actually worked in practice to create the numbers in the real world. The result is a powerful and entertaining guide for any aspiring leader. Go Green-Go Electric! Faster, Cheaper, More Reliable While Saving Energy and the Environment "Empowering people with the tools to convert their own vehicles provides an immediate path away from petroleum dependence and should be part of the solutions portfolio." – Chelsea Sexton, Co-founder, Plug In America and featured in Who Killed the Electric Car? "Create a superior driving experience, strengthen America, and restore the planet's

ecosystems...that's the promise of this book and it's well worth a read!" – Josh Dorfman, Founder & CEO – Vivavi, Modern Green Furniture Store; Author, *The Lazy Environmentalist: Your Guide to Easy, Stylish, Green Living*. This new, updated edition of *Build Your Own Electric Vehicle* contains everything that made the first edition so popular while adding all the technological advances and new parts that are readily available on the market today. *Build Your Own Electric Vehicle* gets on the expressway to a green, ecologically sound, cost-effective way that even can look cool, too! This comprehensive how-to goes through the process of transforming an internal combustion engine vehicle to electric or even building an EV from scratch for as much or even cheaper than purchasing a traditional car. The book describes each component in detail---motor, battery, controller, charger, and chassis---and provides step-by-step instructions on how to put them all together. *Build Your Own Electric Vehicle, Second Edition*, covers: EV vs. Combustible Engine Overview Environmental

This collaborative study between the NRC and the Chinese Academy of Engineering (CAE) addresses the problems facing China in the next twenty years as it attempts to provide personal transport desired by millions of Chinese, while preserving the environment and the livability of its cities. According to Song Jian, president of the CAE, the decision has already been taken to produce a moderate cost family car in China, which will greatly increase the number of vehicles on the roads. This study explores the issues confronting the country, including health issues, the challenge to urban areas, particularly the growing number of megacities, environmental protection, infrastructure requirements, and technological options for Chinese vehicles. It draws on the experience of the United States and other countries and review model approaches to

urban transportation and land use planning. Recommendations and policy choices for China are described in detail. "Australia's unique biodiversity is under threat from a rapidly changing climate. The effects of climate change are already discernible at all levels of biodiversity - genes, species, communities and ecosystems. Many of Australia's most valued and iconic natural areas - the Great Barrier Reef, south-western Australia, the Kakadu wetlands and the Australian Alps - are among the most vulnerable. But much more is at stake than saving iconic species or ecosystems. Australia's biodiversity is fundamental to the country's national identity, economy and quality of life. In the face of uncertainty about specific climate scenarios, ecological and management principles provide a sound basis for maximising opportunities for species to adapt, communities to reorganise and ecosystems to transform while maintaining basic functions critical to human society. This innovative approach to biodiversity conservation under a

changing climate leads to new challenges for management, policy development and institutional design. This book explores these challenges, building on a detailed analysis of the interactions between a changing climate and Australia's rich but threatened biodiversity. Australia's Biodiversity and Climate Change is an important reference for policy makers, researchers, educators, students, journalists, environmental and conservation NGOs, NRM managers, and private landholders with an interest in biodiversity conservation in a rapidly changing world."--Publisher. This book offers tremendous detail about the Ford models used by law enforcement agencies between 1932 and today. The book highlights special police equipment such as heavy duty suspensions and transmissions, high-performance engines, and special interiors. Write Like a Chemist is a unique guide to chemistry-specific writing. Written with National Science Foundation support and extensively piloted in chemistry courses nationwide, it offers a structured approach to writing that targets four important chemistry genres: the journal article, conference abstract, scientific poster, and research proposal. Chemistry students, post-docs, faculty, and other professionals interested in perfecting their disciplinary writing will find it an indispensable reference. Users of the book will learn to write through a host of exercises, ranging in difficulty from correcting single words and sentences

to writing professional-quality papers, abstracts, posters, and proposals. The book's read-analyze-write approach teaches students to analyze what they read and then write, paying attention to audience, organization, writing conventions, grammar, and science content, thereby turning the complex process of writing into graduated, achievable tasks. Concise writing and organizational skills are stressed throughout, and "move structures" teach students conventional ways to present their stories of scientific discovery. This resource includes over 350 excerpts from ACS journal articles, ACS conference abstracts, and successful NSF CAREER proposals, excerpts that will serve as useful models of chemistry writing for years to come. Other special features:

- Usable in chemistry lab, lecture, and writing-dedicated courses
- Useful as a writing resource for practicing chemists
- Augmented by Language Tips that address troublesome areas of language and grammar in a self-study format
- Accompanied by a Web site:
