**Soundbite** Dec 14 2021 Crack the code to college admissions and help students craft the ultimate statement of self-identity and get into their school of choice with this groundbreaking guide from America's College Counselor. On average, an admissions committee takes seconds to decide whether to admit a student. They must sum up the student in one sentence that will tell them if a student is going to be a good fit for their program. What is the best way to transform this admissions process from a stressful, pressure-cooker arms race into an empowering journey that paves the way to the best individual outcome? Written by a college admissions insider turned consultant, Soundbite guides parents and students through the admissions process from start to finish. Armed with her knowledge of how the system works, Sara Harberson shares tried-and-tested exercises that have helped thousands of students gain admission to their school of choice. The soundbite, her signature tool, presents an opportunity for students to take the reins to craft their ultimate statement of self-identity and formulate their own personal definition of what is best. With this soundbite in place as their foundation, students achieve maximum impact when they present themselves to colleges. In doing so, the tables are turned: the student's fate no longer rests on a soundbite composed by an admissions officer. Instead, the student employs their own soundbite to define themselves on their own terms. Soundbite shifts the way we talk about the admissions process—from "Getting You In" to "Getting the Best You In."

*Application Behavior as a Consequential Juncture in the Take-up of Postsecondary Education* Jan 15 2022 The submission of an application, while typically required to access a public program, has generally been taken for granted as an inconsequential step in the process through which an individual pursues a program or policy's benefits. The burden that submitting an application represents, however, is increasingly of interest to researchers who disentangle and expose the administrative and behavioral barriers that applications represent. Drawing from multiple disciplines, this dissertation explores application behavior as a consequential juncture in the take-up of postsecondary education. Each chapter assumes that an enhanced understanding of how individuals submit postsecondary applications can inform public programs and policies designed to improve postsecondary access through targeting this behavior.

*Applications of Anthropology* Dec 26 2022 At the beginning of the twenty-first century the demand for anthropological approaches, understandings and methodologies outside academic departments is shifting and changing. Through a series of fascinating case studies of anthropologists' experiences of working with very diverse organizations in the private and public sector this volume examines existing and historical debates about applied anthropology. It explores the relationship between the "pure and the impure" - academic and applied anthropology, the question of anthropological identities in new working environments, new methodologies appropriate to these contexts, the skills needed by anthropologists

working in applied contexts where multidisciplinary work is often undertaken, issues of ethics and responsibility, and how anthropology is perceived from the 'outside'. The volume signifies an encouraging future both for the application of anthropology outside academic departments and for the new generation of anthropologists who might be involved in these developments.
