**Data Culture and the Organisation of Teachers' Work** Feb 16 2022 Data Culture and the Organisation of Teachers' Work provides an in-depth look at how the political and media scrutiny of teachers, pupils and schools now organises teaching and learning. Spina also examines how educational data is used in schools, and where it fails to take account of the everyday experiences of school leaders, teachers and students. Drawing on primary research, and discussing practice in relation to the National Assessment Programme: Literacy and Numeracy (NAPLAN), this book discusses the strengths and weaknesses of a data-driven approach, the restrictions this can impose and how to navigate them as a teacher. Ideal for scholars and postgraduate students of education, this book provides a comprehensive institutional, ethnographic look into the daily lived experiences of teachers, and the effects of standardised testing.

The End of Everything May 27 2020 A NEW YORK TIMES NOTABLE BOOK OF 2020 NAMED A BEST BOOK OF THE YEAR BY \* THE WASHINGTON POST \* THE ECONOMIST \* NEW SCIENTIST \* PUBLISHERS WEEKLY \* THE GUARDIAN From one of the most dynamic rising stars in astrophysics, an “engrossing, elegant” (The New York Times) look at five ways the universe could end, and the mind-blowing lessons each scenario reveals about the most important concepts in cosmology. We know the universe had a beginning. With the Big Bang, it expanded from a state of unimaginable density to an all-encompassing cosmic fireball to a simmering fluid of matter and energy, laying down the seeds for everything from black holes to one rocky planet orbiting a star near the edge of a spiral galaxy that happened to develop life as we know it. But what happens to the universe at the end of the story? And what does it mean for us now? Dr. Katie Mack has been contemplating these questions since she was a young student, when her astronomy professor informed her the universe could end at any moment, in an instant. This revelation set her on the path toward theoretical astrophysics. Now, with lively wit and humor, she takes us on a mind-bending tour through five of the cosmos’s possible finales: the Big Crunch, Heat Death, the Big Rip, Vacuum Decay (the one that could happen at any moment!), and the Bounce. Guiding us through cutting-edge science and major concepts in quantum mechanics, cosmology, string theory, and much more, The End of Everything is a wildly fun, surprisingly upbeat ride to the farthest reaches of all that we know.

**The Making of a Market** Feb 04 2021 During the nineteenth century, Yucatán moved effectively from its colonial past into modernity, transforming from a cattle-ranching and subsistence-farming economy to a booming export-oriented agricultural economy. Yucatán and its economy grew in response to increasing demand from the United States for henequen, the local cordage fiber. This henequen boom has often been seen as another regional and historical example of overdependence on foreign markets and extortionary local elites. In *The Making of a Market*, Juliette Levy argues instead that local social and economic dynamics are the root of the region's development. She shows how credit markets contributed to the boom before banks (and bank crises) existed and how people borrowed before the creation of institutions designed specifically to lend. As the intermediaries in this lending process, notaries became unwitting catalysts of Yucatán's capitalist transformation. By focusing attention on the notaries' role in structuring the mortgage market rather than on formal institutions such as banks, this study challenges the easy compartmentalization of local and global relationships and of economic and social relationships.

**The Adult Learner** Nov 01 2020 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

*Addressing Difficulties in Literacy Development* May 19 2022 This book outlines and critiques international strategies and programmes designed to address difficulties in literacy development. The high-profile team of contributors consider teaching programmes which operate at family, school, pupil and teacher levels. They argue that school is not the only legitimate location for literacy education, and show how difficulties in literacy can be addressed sequentially, both in and out of the school context. Issues addressed include: \*the dilemmas facing practitioners in choosing between multiple approaches to practice \*the factors which must be addressed in strategies which operate at the level of the family and the community \*how to ensure the school can support programmes designed to improve literacy learning \*how to put theory into practice in programmes designed for use with individual students \*the teacher as 'reflective practitioner' - developing professional practice which effectively raises literacy achievement. This book will be of interest to postgraduate students, teachers, researchers, educational professionals and policymakers who are looking for practical strategies to address difficulties in literacy development. This reader forms the basis of the Open University's *Difficulties in Literacy Development* course, and is ideal for similar courses nationally and internationally.

Developing a Leadership Role Within the Key Stage 1 Curriculum Nov 13 2021 Since 1989, initial teacher training courses in England and Wales have recognized the need for teachers to take a lead in a school subject area in their first appointment. Behaviour Analysis in Educational Psychology Jan 15 2022 In the early 1980s there had been a marked increase in the application of behavioural methods in schools. However, much of this work was weak conceptually and limited in its remit. Behaviour analysis has more to offer education than 'smarties' and time-out. Originally published in 1986, this collection of twenty papers, many of them experimental, serves to demonstrate the power of behaviour analysis in a wide variety of applications. The editors stress the importance of antecedent control, as well as consequence management strategies, and illustrate their relevance in solving problems in everyday situations at school and in the home. The Editors, whose own work is well represented in this collection, are acknowledged as leading researchers in this field.

**The Power of RTI and Reading Profiles** Apr 25 2020 "The reading problems addressed in the book move beyond those associated with disabilities such as dyslexia or high-functioning autism. The author addresses experientially based reading difficulties caused by inadequate instruction or limited exposure to academic language/literacy. Unlike other books on response to intervention (RTI), this book presents an argument for using RTI as a method of identification as well as intervention in combination with individual students' reading profiles. The case studies and practical examples cover a broad range of reading problems (not only learning disabilities) to help make research findings applicable to a multidisciplinary audience, especially practitioners"--
