Equipment Theory for Respiratory Care Jul 24 2022 The fifth edition of Equipment Theory for Respiratory Care employs a comprehensive, competency-based approach to describe the equipment and latest technology used in the respiratory care setting. With an approachable style, the book covers the practice of respiratory theory, including: the administration of oxygen and oxygen mixtures by various devices and appliances; the application of mechanical ventilators to assist or control breathing; management of emergency airways; and applications of ventilators for various populations: neonatal, home care, and transport. Additionally, universal algorithms, an enhanced art program, and Clinical Corner problems round out this new edition. My Father's War Jan 18 2022 This is the story of Col. Max F. Schneider, one of the original U.S. Ranger officers from the time they were formed until after the Allied invasion of the Normandy Coast where he commanded his own battalion of Rangers. The book follows his life through the post-war years leading to his tragic death in Korea in 1959.

Gravel Roads Apr 28 2020 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.
