www.mcgrawhillcreate.com/traditions Written by the author of highly effective psychology texts relied upon by thousands of teachers and students, *Educational Psychology* is a well-crafted text that emphasizes the application of theory to classroom practice. With richly evocative classroom vignettes provided by practicing teachers, as well as the most case studies - three per chapter - of any Introductory text, Santrock's *Educational Psychology* helps students think critically about the research basis for best practices. Additionally, Santrock's hallmark Learning System organizes the content into manageable chunks to support retention and mastery, and make it much more likely that students will have an engaging and successful course experience. "Since the tenth edition of *Contemporary Management* was published, our book continues to be a leader in the management market. This tells us that we continue to meet the expectations of our existing users and attract new users to our book" -- Treating such contemporary design and development issues as identifying customer needs, design for manufacturing, prototyping, and industrial design, *Product Design and Development*, 3/e, by Ulrich and Eppinger presents in a clear and detailed way a set of product development techniques aimed at bringing together the marketing, design, and manufacturing functions of the enterprise. The integrative methods in the book facilitate problem solving and decision making among people with different disciplinary perspectives, reflecting the

current industry trend to perform product design and development in cross-functional teams. Human Communication with Free Student CD-ROM and Powerweb is a completely refurbished version of the best-selling Human Communication: Understanding and Sharing by Judy Pearson and Paul Nelson. With Human Communication with Free Student CD-ROM and PowerWeb, Pearson and Nelson joined up with new co-authors Scott Titsworth and Lynn Harter to write an introduction to communication that ardently represents the contemporary field of communication studies. The authors approached the project with the mantra "Make It Smart; Keep It Real" so as to strike a practical balance of definitive content and everyday application. To make it smart the authors read hundreds of articles from such mainstream communication journals as Communication Education, Communication Monographs and Communication Studies. To keep it real the authors synthesized their findings so that they resonate with the challenges and goals of today's typical basic course. Every chapter features lively, respectful writing, critical thinking, innovative pedagogy and 21st century examples. The original six-part video series "The Elliotts: Communicating Everyday", scripted by Pearson, Nelson, Titsworth, and Harter, represents key concepts of communication in the format of a contemporary television drama series. And important communication models are brought to life through a series of innovative animations developed by the authors. Human Communication

with Free Student CD-ROM and PowerWeb is a complete, integrated learning package wherein all the components for instructor and student are related and connected. Tough Test Questions? And of course, all of this material is informed by our unique board of expert contributors - a who's who of developmental psychology - who ensure the material is as accurate and up-to-date as possible.
