This English edition of a classic text on the subject of commercial credit and security has been re-written to emphasise English law, and focuses on the liability of a surety to pay a commercial debt if the principal borrower does not. The coverage includes: analysis of the factors affecting the validity of the guarantee such as duress and undue influence and the liability of the lender for the acts of the principal borrower; construction of guarantees and the meaning of clauses commonly inserted in guarantees; special principles applicable to guarantees being discharged, and how the lender can guard against that eventuality; difficulties in enforcing guarantees; and rights of guarantors, including rights of set off, indemnity and contribution. Hardbound - New, hardbound print book. This book provides a detailed guide to the principles and practice of construction contracts. It is written for both students and professionals working in all branches of surveying and construction. Based around the JCT 05 Standard Building Contracts, it has been fully revised and updated to reflect the latest versions of these contracts. The book sets out clearly what should be done at each stage of the construction contract process. Each step is illustrated with examples of good practice making clear the role and responsibilities of the surveyor and how responsibilities are best delivered. This fourth edition of Contract Practice for Surveyors builds on the book's reputation for clarity and simplicity to provide the most accessible and useful introductory guide to construction contracts available today. This eagerly awaited revision of a prestigious student treatise helps professors demystify the intricacies of contract law. Long respected for its clarity and accessibility, Contracts, in its completely updated Fourth Edition, continues to illuminate doctrine and practice. The textbook builds on its well-known strengths: Comprehensive coverage of all of the topics that figure prominently in most contracts courses. Intuitive, insightful approach for first-year law students... Clear explanations of the rules, illustrated with noteworthy examples. Incorporation of many recent cases into examples. Clear prose and incisive analysis Reflection of the expertise of the author, who has also written a successful practitioner treatise. Suitability for use alongside any casebook. The Fourth Edition keeps pace with developments in the field, providing: Detailed comparisons of the contract rules of 2003, revised Article 2 (2003), with previous Article 2. Citations to revised Articles 1 and 9. Citations to dozens of new cases, including those applying CISG (Vienna Sales Convention) and reference to current decisions in such areas as employment agreements, enforceability of arbitration clauses, anti-nuptial contracts, liquidated damages, pre-contractual liability, and electronic contracting. Citations to new law journal articles and updated citations to other secondary sources. Learning contract law will be less daunting when the Fourth Edition of E. Allan Farnsworth's Contracts is available for extra assistance. Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of contracts in Poland covers every aspect of the subject – definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted to torts, quasi-contracts, and property is followed by a discussion of the concepts of 'consideration' or 'cause' and other underlying principles of the formation of contract. Subsequent chapters cover

the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Poland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative contract law. Offer and Acceptance; Parol Evidence and Interpretation; Consideration; Informal Contracts Without Consideration or Detrimental Reliance; Promissory Estoppel: Detrimental Reliance as a Substitute for Consideration; Contracts Under Seal; Capacity of Parties; Avoidance or Reformation for Misconduct or Mistake; Conditions; Breach and Prospective NonPerformance; Impossibility or Impracticability of Performance; Frustration of the Venture; Risk of Casualty Losses; Damages; Restitution as a Remedy For Breach; Specific Performance and Injunctions; Third-Party Beneficiaries; Assignment and Delegation; Statute of Frauds; Joint and Several Contracts; Discharge of Contracts; Illegal Bargains. This contracts casebook includes introductions that quickly orient students within unfamiliar territories. Cases present both the doctrine applied and, in some instances, the shortcomings of that doctrine. The authors express their disagreement about basic issues, so that students can experience the range of possible in modern contract law. To save time, the authors avoid extensive citation of academic scholarship except as it pertains to the cases being studied. Certain traditional subjects'such as offer and acceptance and consideration'are reduced to the bare minimum, where more pivotal subjects'such as form contracts and arbitration clauses'are considered at length. The third edition of this well-respected text presents a road-map approach for thinking about contracts problems. Steps in the road map include choice of law, contract formation, unenforceable contracts, breach of contract, and plaintiff's remedies. The rules of the law are presented first as theory, followed by and example and either a paralegal exercises or a case so that students can relate the abstract to a concrete set of facts. The text also teaches students how to analyze a contracts problem using common law and a code approach (articles 1 and 2 of the UCC). In September 1999, FIDIC introduced its new Suite of Contracts,which included a "new" Red, Yellow, Silver and Greenforms of contract. The "new" Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include: · background and concepts of the various forms of contract; · a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose; · analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned; · a range of 'decision tree' charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards; · a much enlarged discussion of the meaning of "claim" and "dispute" and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submittal of claims by a contractor and by an employer; · the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and · five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards. The Unlocking the Law series makes the law accessible. Each chapter contains activities such as quick quizzes and self-test questions, key facts charts to consolidate your knowledge and diagrams to aid learning. Cases, judgments and primary source quotations are prominently displayed. Summaries help you understand each chapter, there is a glossary of legal terminology. New features include problem questions with guidance on answering, as well as essay questions and answer plans, plus cases and materials exercises. All titles in the series follow the same formula and include the same features so students can move easily from one subject to another. This work aims to keep criminal lawyers up to date with the latest cases and legislation, and includes longer articles analyzing current trends and important changes in the law. Drawing all aspects of the law together in one regular publication, it allows quick and easy reference Making and Doing Deals is a book that your students will learn from long after they graduate. It is also a book that should be fun for you to teach from. It's a book that students will enjoy, and, therefore, a book that they will read. Since the First Edition, students have been reading Making and Doing Deals because the cases, problems, and text not only help them learn what they need to

know as first-year law students, but also address the real-world problems and situations they will encounter after their final exam. *Good Faith and Insurance Contracts* sets out an exhaustive analysis of the law concerning the duty of utmost good faith, as applied to insurance contracts. Now in its fourth edition, it has been updated to address the arrival of the Insurance Act 2015, as well as any references to new case law. In addition, it synthesises all known judicial decisions by the English Courts concerning good faith in this area. This book is still the only text devoted to a discussion of the duty of utmost good faith applicable to insurance contracts. As good faith is an issue which arises in respect of all insurance contracts, it is a book which will be extremely useful to lawyers involved in insurance as well as insurance practitioners. Explains the nature of assignment, commencing with a definition of assignment, before outlining and giving examples of choses in action. This update is driven by the changes in the Second Edition of the Contract Management Standard™, which serves as the *CMBOK's* foundation. The *CMBOK® Sixth Edition* provides a common understanding of the terminology, practices, policies, and processes used in contract management. This Understanding treatise is designed for first-year law students enrolled in Contracts. The text explains common law principles of contract law using cases and examples that students commonly encounter in this first-year course. It draws illustrations from the Restatement (Second) of Contracts, and from Article 2 of the Uniform Commercial Code as it has been adopted in all fifty states. This edition includes expanded material on the United Nations Convention on the International Sale of Goods, and the UNIDROIT Principles of International Commercial Contracts, appropriate to a basic course in Contracts, and on modern statutes regarding electronic contracting. Understanding Contracts was written with the understanding that Contracts will be one of the most challenging courses first-year law students will take. It explains how key concepts apply in several recurring basic fact patterns. It then builds on those fact patterns to explain how the law is more difficult to apply in business transactions with more complex facts. A key feature of Understanding Contracts, that is not found in other similar books, is its conscious incorporation of basic explanations of the common business practices to which the law of contracts applies. The feature helps students, many of whom have not had any background in the business world, understand contract law in the business settings in which it frequently applies. The book also provides detailed topic headings that students can use to develop their own comprehensive course outline. This eBook features links to Lexis Advance for further legal research options. This unbiased analysis of statutes, regulations, and case law clarifies the complex rules of federal procurement policies, explaining the processes that government personnel and contractors must follow in every aspect of government contracting—and—from inception to completion. Topics include contract administration and personnel, contract interpretation, risk allocation, changes, delays, pricing of adjustments, and much more. *Family Child Care Contracts and Policies, Fourth Edition* offers the most up-to-date tools for family child care providers to establish and enforce contracts and policies. Topics include, how to establish good business relationships with parents, what to look for before signing contracts with parents, what information is vital to include in contracts and policies, how to prevent conflicts with parents over contracts and policies, when and how to end a contract. Updates to the new Fourth Edition include offering and charging for part-time care and extended care rates and policies for child care during the summer months expanded advice for how to handle siblings and family discounts expanded advice on charging for vacation time how to handle parent objections to paying for care when a child stays home information on bad-weather policies advice on how to deal with parents visiting during program hours caring for children who aren't immunized expanded advice for how to turn down a client updated information on comparing income to minimum wage expanded advice for how enforce polices that previously weren't enforced Background Elements: Contract Curve and Expectation Damages; Consideration and the Bargained-for Exchange; Contract Formation; Unfairness and Unconscionability; Contract Interpretation; Performance and Breach; Mistake and Impossibility; Remedies; Third-Party Beneficiaries. *Contracts: Cases, Discussion, and Problems, Fourth Edition* is known for its strikingly clear, straightforward text that illuminates cases as well as concepts and theory. The book focuses on modern cases to expose students to contemporary contract law, but it also includes many important or iconic older cases. The cases are set in context by extensive author-written explanatory text. Insightful questions draw attention to difficult and crucial aspects of the law and prompt vigorous class discussion. Numerous problems, ranging from simple to complex, supplement cases and introduce topics taught most effectively through problems. The casebook's traditional organization begins with formation and then corresponds to the sequence followed by the Restatement

(2nd) of Contracts and treatises. Its concise, efficient presentation results in an optimum length for the course. Procedural issues are highlighted when presented by the cases and transactional issues such as drafting, client counseling, and negotiation are raised through the use of questions and small exercises throughout the text. Strengthening the text's focus on contemporary methods of contracting, modern issues in standard contracts are explored along with contracts entered into electronically. International and comparative material offers alternative approaches for students to consider, such as those taken by the United Nations Convention on Contracts for the International Sale of Goods (CISG) and the UNIDROIT Principles of International Commercial Contracts.

Construction Contracts focuses on the law governing construction contracts, and the management and administration of these contracts. Fully updated and revised, the only modern work on the law of towage and offshore vessel services, comprising a comprehensive account of the general law coupled with a detailed clause-by-clause commentary and analysis of the major standard contracts used in the international offshore, towage and heavylift sectors, including the BIMCO Towcon, Towhire, Supplytime and Heavylift forms. The Law of Tug and Tow and Offshore Contracts has rapidly established itself as a leading text and is written by, Simon Rainey QC, one of the foremost shipping practitioners with unrivalled experience in the field. Key reasons to buy The Law of Tug and Tow and Offshore Contracts, Third Edition • the only clause-by-clause commentary on all of the major standard form contracts used by the offshore industry • the only in-depth analysis of the drafting history of the BIMCO standard form offshore contract, comparing the recent amended versions in their drafting context; • the only authoritative analysis of the case law and arbitration decisions affecting the towage and offshore industries • written from the perspective of a leading practitioner with unrivalled practical experience over many years of the contract forms and of the issues which arise under them (many of which are unreported) and involved in almost all of the leading cases in the field • written with an eye on the practicalities of how the contracts work given the everyday problems which arise in the industry, with guidance where the standard forms may require amendment This volume provides an advanced analysis of the law of contract for undergraduate courses covering the law of contract and the law of obligations. Drafting and Analyzing Contracts (called Drafting Contracts in its first two editions) has three major parts: Part I is organized around the topics that are studied in the first year Contracts course. Part II teaches the skills of contract drafting. Part III teaches how to read a contract. The purpose of this book is to apply the principles of contract law to the drafting of agreements. Each chapter discusses the substance of contracts as applied to drafting and suggests language that may be employed to accomplish the purpose. Drafting and Analyzing Contracts uses drafting to: exemplify the principles of contract law illustrate the principles in a planning context develop the skills of a lawyer. Part I (How the Principles of Contract Law are Exemplified in Drafting) contains 14 chapters that illuminate the substantive law. For example: Chapter 7 demonstrates the problems that can arise from ambiguity and how to cure them; and Chapter 10 makes clear how drafters can use the concept of conditions to accomplish their goals. This Part is particularly useful to supplement the first-year Contracts class. Part II (How the Principles of Drafting are Exemplified in Contracts) teaches techniques for contract drafting, including Drafting in Plain Language and Drafting with a Computer. This Part reinforces the substantive law and is particularly useful for upper-division classes that teach drafting. Part III (How to Read and Analyze a Contract) shows how attorneys rely on forms and models where there is no opportunity for drafting. Therefore, attorneys must first read a contract before re-drafting it or explaining it to a client. Students who follow the "5 passes" process for reading contracts will develop and deepen their analytical skills. A thorough Teacher's Manual (available only to professors) provides guidance on teaching drafting, commentary on all parts of the book, solutions to all the problems, additional problems, and a bibliography. The law of contracts permeates most, if not all, other subjects of legal education. Principles of Contract Law surveys the fundamental legal principles underlying the law of contracts, addressing such customary topics as contract formation, defenses and other doctrines of avoidance, breach and performance, remedies, as well as such other collateral but related topics involving third-party beneficiaries, assignments and delegations. The text addresses the traditional common law principles governing contracts, and yet is accompanied by a steadied discussion of relevant commercial law principles pertaining to the sale of goods under Article 2 of the Uniform Commercial Code. When able to do so, the authors remained loyal to their commitment to utilize time-honored, classic common law cases in their presentment of the subject matter. While this textbook adopts a classical approach to the study of contracts, it is also provides a relevant and robust experience for the aspiring law student.

Farnsworth on Contracts, Second Edition, is where doctrine meets practice. Busy practitioners count on Farnsworth's proven ability to identify the essentials and omit extraneous material. His comprehensive coverage of the full range of contract law answers questions in hundreds of important areas, including: Good faith and fair dealing -- Precontractual liability -- Agreements to negotiate -- Vienna Convention on International Sales -- Contracts -- UNIDROIT principles -- Constitutional issues -- Settlement of disputed claims by check -- Options and rights of first refusal -- Employee handbooks -- Covenants not to compete -- Self-help measures. He illustrates how contemporary contract law has been shaped by both the Restatement (Second) of Contracts for -- which he served as Reporter -- and the Uniform Commercial Code. Easy access to specifics, new cases, new drafting tips, new references, and timesaving features like cross-referenced cases and marginal heads make this three-volume set a valuable resource for litigation, arbitration, and practice. Farnsworth on Contracts was always the most authoritative contracts treatise -- in its Second Edition, it is also the most up-to-date. This textbook covers the Contract Law option of the new A-level law syllabus, and provides at the same time an ideal introduction for anybody coming to the subject for the first time. The book covers all A-level syllabuses/specification requirements, and is written by the principal examiner in Contract Law for one of the major examination boards. It contains extensive case illustration, and a range of examination related questions and activities. There is a special focus on key skills, and on the new synoptic assessment syllabus requirements. This fully updated fourth edition builds upon the success of the first three editions, with new case law (especially on offer and acceptance, legal intent, terms, exemption clauses and misrepresentation remedies) and coverage of new statute law (especially Unfair Terms in Consumer Contracts Regulations). Media Law for Producers is a comprehensive handbook that explains, in lay terms, the myriad legal issues that the producer will face on a regular basis - contracts, permits, defamation, patents, releases and insurance, libel, royalties and residuals, as well as protecting the finished production. This revised and expanded edition includes such Internet-related topics as Internet music law, online registration, and online privacy. Other new topics covered include: · Implied and express contracts in the project/idea submission process · Assignment/transfer of copyright · Music clip licensing · Use of other people's trademarks in media production · Parody as a defense to copyright infringement Clear explanations examine the how and why of different types of production contracts, and checklists provide a quick means for producers to determine when their productions might be at greatest risk to legal challenges. Media Law for Producers also examines the substantial changes in copyright term resulting from recent copyright legislation. Legal problems can be very costly to media producers. Lawyers and court fees, coupled with the loss of work time, can lead to bankruptcy. Media Law for Producers cuts through the legalese and illustrates legal issues to help producers recognize the legal questions that can arise during production. The casebook was designed for four-hour, one-semester courses. It includes introductions that quickly orient students within unfamiliar territories. Cases present both the doctrine applied and, in some instances, the shortcomings of that doctrine. The

authors express their disagreement about basic issues, so that students can experience the range of possible views in modern contract law. Contemporary subjects, such as form contracts, the modern concept of unconscionability, the rise of arbitration, and the increasing importance of computers in commercial transactions, are given considerable emphasis. Story, William W[etmore]. A Treatise on the Law of Contracts. Revised and Greatly Enlarged. Boston: Little, Brown and Company, 1856. Two volumes. Reprinted 2006 by The Lawbook Exchange, Ltd. ISBN-13: 978-1-58477-618-5. ISBN-10: 1-58477-618-8. Cloth. \$250.\* Reprint of the fourth edition, the final edition edited by the author. The son of Joseph Story, William Wetmore [1819-1895] wrote two textbooks that were standard works during the nineteenth century. This was one of them. First published in 1844, it went through five editions, the final appearing in 1874. "This work bears internal evidence of a careful and thorough examination of the cases, and the principles to be deduced from them are stated with precision, and in a concise and vigorous style.": Marvin, Legal Bibliography (1847) 674 (review of the first edition). The focus of this manual is not what provisions to include in a given contract, but instead how to express those provisions in prose that is free of the problems that often afflict contracts.
