Protect lives and property with state-of-the-art guidance on conducting safe, thorough, accurate inspections! Expanded with updated facts and new chapters! Completely revised and updated to reflect the latest procedures and code requirements, the Fire and Life Safety Inspection Manual is your step-by-step guide through the complete fire inspection process, with special emphasis on life safety considerations. Formerly the NFPA Inspection Manual, it covers the full range of hazards and gives you solid advice on identifying and correcting problems. Easy-to-follow checklists help you remember and record every important detail. Early chapters provide important background information, while the second half presents inspection guidelines for specific fire protection systems and occupancies that are based on the Life Safety Code(R). In addition to discussing fundamentals such as inspection procedures and report writing, this comprehensive manual now includes all-new chapters on Housekeeping and Building Procedures, Water Mist Systems, Day Care Occupancies, Ambulatory Health Care Facilities, and Semi-Conductor Manufacturing. With 150 illustrations, more sample forms, and a larger format, this acclaimed manual is more helpful than ever. Perfect for use in the field, the Manual features a new 8 1/2 x 11 size with full-page checklists at the back of the book linked to individual chapters. Detailed visuals throughout help you understand complicated concepts. Whether you're just starting your career as a fire inspector or ready to brush up on the basics, the Fire and Life Safety Inspection Manual has the reliable inspection advice you need. The Fire and Life Safety Inspection Manual, Ninth Edition is the most up-to-date inspection reference manual for those interested in fire protection, fire safety, and life safety inspections. It provides step-by-

step guidance through the complete fire inspection process, with special emphasis on life safety considerations. This text identifies dangerous and hazardous conditions that could be encountered in a structure and spells out the chief areas the inspector should be focused on during an inspection. Inspectors should use the Fire and Life Safety Inspection Manual, Ninth Edition to identify existing deficiencies, imminently dangerous conditions, or a fault in a procedure or protocol that may result in a fire. Six new chapters have been added to make sure fire inspectors have the knowledge and resources available to effectively conduct all types of fire inspections. These new chapters include: - Chapter 5 Certification and Training for Inspectors - Chapter 6 Green Technologies and the Inspector - Chapter 24 Commissioning Process for Fire Protection Systems - Chapter 25 Accessibility Provisions - Chapter 26 Grass, Brush, and Forest Fire Hazards - Chapter 27 Tunnels More than three hundred codes and standards form the basis for the criteria, recommendations, and requirements that are found throughout the text. Early chapters provide important background information, while the second half presents inspection guidelines for specific fire protection systems and occupancies that are based on the Life Safety Code(R).
