When people should go to the ebook stores, search initiation by shop, shelf by shelf, it is really problematic. This is why we present the books compilations in this website. It will enormously ease you to see guide **Language And Gender Ijser** as you such as.

By searching the title, publisher, or authors of guide you in reality want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best area within net connections. If you ambition to download and install the Language And Gender Ijser, it is agreed easy then, previously currently we extend the associate to buy and make bargains to download and install

Language And Gender Ijser for that reason simple!

Thank you completely much for downloading **Language And Gender Ijser**. Maybe you have knowledge that, people have see numerous time for their favorite books as soon as this Language And Gender Ijser, but end stirring in harmful downloads.

Rather than enjoying a fine book gone a mug of coffee in the afternoon, instead they juggled later than some harmful virus inside their computer. **Language And Gender Ijser** is understandable in our digital library an online permission to it is set as public fittingly you can download it instantly. Our digital library saves in compound countries, allowing you to get the most less latency era to download any of our books subsequent to this one. Merely said, the Language And Gender Ijser is universally compatible in imitation of any devices to read.

Thank you very much for downloading **Language And Gender Ijser**. As you may know, people have look hundreds times for their favorite novels like this Language And Gender Ijser, but end up in harmful downloads. Rather than reading a good book with a cup of tea in the afternoon, instead they juggled with some harmful bugs inside their computer.

Language And Gender Ijser is available in our book collection an online access to it is set as public so you can get it instantly. Our book servers hosts in multiple locations, allowing you to get the most less latency time to download any of our books like this one. Merely said, the Language And Gender Ijser is universally compatible with any devices to read

Recognizing the artifice ways to get this book **Language And Gender Ijser** is additionally useful. You have remained in right site to begin getting this info. get the Language And Gender Ijser member that we have enough money here and check out the link.

You could purchase guide Language And Gender Ijser or acquire it as soon as feasible. You could speedily download this Language And Gender Ijser after getting deal. So, when you require the books swiftly, you can straight acquire it. Its appropriately completely simple and appropriately fats, isnt it? You have to favor to in this broadcast

This three-volume book highlights significant advances in the development of new information systems technologies and architectures. Further, it helps readers solve specific research and analytical problems and glean useful knowledge and business value from data. Each chapter provides an analysis of a specific technical problem, followed by a numerical analysis, simulation, and implementation of the solution to the real-world problem. Managing an organization, especially in today's rapidly changing environment, is a highly complex process. Increased competition

in the marketplace, especially as a result of the massive and successful entry of foreign businesses into domestic markets, changes in consumer behaviour, and broader access to new technologies and information, calls for organisational restructuring and the introduction and modification of management methods using the latest scientific advances. This situation has prompted various decision-making bodies to introduce computer modelling of organization management systems. This book presents the peer-reviewed proceedings of the 40th Anniversary International Conference "Information Systems Architecture and Technology" (ISAT), held on September 15-17, 2019, in Wrocław, Poland. The conference was organised by the Computer Science Department, Faculty of Computer Science and Management, Wrocław University of Sciences and Technology, and University of Applied Sciences in Nysa, Poland. The papers have been grouped into three major sections: Part I—discusses topics including, but not limited to, artificial intelligence methods, knowledge discovery and data mining, big data, knowledge-based management, Internet of Things, cloud computing and high-performance computing, distributed computer systems, content delivery networks, and service-oriented computing. Part II—addresses various topics, such as system modelling for control, recognition and decision support, mathematical modelling in computer system design, service-oriented systems, and cloud computing, and complex process modelling. Part III—focuses on a number of themes, like knowledge-based management, modelling of financial and investment decisions, modelling of managerial decisions, production systems management, and maintenance, risk management, small business management, and theories and models of innovation. The book focuses on how machine learning and the Internet of Things (IoT) has empowered the advancement of information driven arrangements including key concepts and advancements. Ontologies that are used in heterogeneous IoT environments have been discussed including interpretation, context awareness, analyzing various data sources, machine learning algorithms and intelligent services and applications. Further, it includes unsupervised and semi-supervised machine learning techniques with study of semantic analysis and thorough analysis of reviews. Divided into sections such as machine learning, security, IoT and data mining, the concepts are explained with practical implementation including results. Key Features Follows an algorithmic approach for data analysis in machine learning Introduces machine learning methods in applications Address the emerging issues in computing such as deep learning, machine learning, Internet of Things and data analytics Focuses on machine learning techniques namely unsupervised and semi-supervised for unseen and seen data sets Case studies are covered relating to human health, transportation and Internet applications This book offers new insights into the language gains of adult learners enrolled in an English-

medium instruction (EMI) degree programme. It provides longitudinal empirical evidence of the phonological gains of the learners; discusses which individual factors contribute to the changes in the learners' pronunciation and investigates whether and to what extent increased exposure to the target language in EMI classrooms leads to incidental learning of second language pronunciation. Furthermore, it expands on the discussions surrounding the Critical Period Hypothesis, the native-speaker norm, foreign language accent and the role of English as a Lingua Franca. The comparative and longitudinal design of the research study fills a significant gap in the literature and the book offers considerable original and important research-informed insights into the fields of EMI, bilingual education and second language acquisition. As such, it is a valuable resource and must-read book for researchers, practitioners and policymakers in these areas. This book aims to aid English teachers at the junior and senior secondary school levels in teaching pronunciation within a regular EFL syllabus. Moreover it presents a way of incorporating the phonetic and lexical components to facilitate the acquisition of a standard phonetic system and to prevent forming habitual mistakes in individual words. It provides examples of strategies how to use a course-book for the sake of teaching pronunciation. To what extent can we have truly universal, comprehensive and timely health services, equally available to all? Access to Health Care considers the meaning of 'access' in health care and examines the theoretical issues that underpin these questions. Contributors draw on a range of disciplinary perspectives to investigate key aspects of access, including: · geographical accessibility of services · socio-economic equity of access · patients' help-seeking behaviour · organisational problems and access · methods for evaluating access. Access is considered in both a UK and international context. The book includes chapters on contrasting health policies in the United States and European Union. Access to Health Care provides both health care researchers as well as health professionals, managers and policy analysts, with a clear and wide-ranging overview of topical and controversial questions in health policy and health services organization and delivery. This book provides a comprehensive overview of the recent advancement in the field of automatic speech recognition with a focus on deep learning models including deep neural networks and many of their variants. This is the first automatic speech recognition book dedicated to the deep learning approach. In addition to the rigorous mathematical treatment of the subject, the book also presents insights and theoretical foundation of a series of highly successful deep learning models. This volume explores the ethical questions that arise in the development, creation and use of robots that are capable of semiautonomous or autonomous decision making and human-like action. It examines how ethical and moral theories can and must be applied to address the complex and critical issues of the application of these intelligent robots in society. Coverage first presents fundamental concepts and provides a general overview of ethics, artificial intelligence and robotics. Next, the book

studies all principal ethical applications of robots, namely medical, assistive, socialized and war roboethics. It looks at such issues as robotic surgery, children-robot and elderly-robot therapeutical/social interactions and the use of robots, especially autonomous lethal ones, in warfare. In addition, a chapter also considers Japanese roboethics as well as key intercultural and robot legislation issues. Overall, readers are provided with a thorough investigation into the moral responsibility (if any) of autonomous robots when doing harm. This volume will serve as an ideal educational source in engineering and robotics courses as well as an introductory reference for researchers in the field. In the history of the African-American literary tradition, perhaps no author has been immersed in the formal history of that tradition than Gloria Naylor. As an undergraduate student of Afro-American literature at Brooklyn College and a graduate student of Afro-American studies at Yale, Naylor has analyzed the works of her male and female antecedents in a manner that was impossible before the late seventies. And, while she is a citizen of the republic of literature in the broadest and most cosmopolitan sense, her work suggest formal linkage to that of Ann Petry, James Baldwin, and, more recently, Toni Morrison. -- from the Preface by Henry Louis Gates, Jr. The book reflects the ideas of nineteen academic and research experts from different countries. The different sections of this book deal with epidemiological and preventive concepts, a demystification of cranio-mandibular dysfunction, clinical considerations and risk assessment of orthodontic treatment. It provides an overview of the state-of-the-art, outlines the experts' knowledge and their efforts to provide readers with quality content explaining new directions and emerging trends in Orthodontics. The book should be of great value to both orthodontic practitioners and to students in orthodontics, who will find learning resources in connection with their fields of study. This will help them acquire valid knowledge and excellent clinical skills. The study of education and social mobility has been a key area of sociological research since the 1950s. The importance of this research derives from the systematic analysis of functionalist theories of industrialism. Functionalist theories assume that the complementary demands of efficiency and justice result in more 'meritocratic' societies, characterized by high rates of social mobility. Much of the sociological evidence has cast doubt on this optimistic, if not utopian, claim that reform of the education system could eliminate the influence of class, gender and ethnicity on academic performance and occupational destinations. This book brings together sixteen cutting-edge articles on education and social mobility. It also includes an introductory essay offering a guide to the main issues and controversies addressed by authors from several countries. This comprehensive volume makes an important contribution to our theoretical and empirical understanding of the changing relationship between origins, education and destinations. This timely collection is also relevant to policy-makers as education and social mobility are firmly back on both national and global political agendas, viewed as key to creating fairer

societies and more competitive economies. This book was originally published as a special issue of the British Journal of Sociology of Education. The coronavirus (COVID-19) pandemic is putting healthcare systems across the world under unprecedented and increasing pressure according to the World Health Organization (WHO). With the advances in computer algorithms and especially Artificial Intelligence, the detection of this type of virus in the early stages will help in fast recovery and help in releasing the pressure off healthcare systems. This book highlights the importance of non-wood forest products (NWFPs) and their crucial role in sustaining the livelihood of rural and indigenous communities in Asia. The authors depict how the preservation of forests and the associated major non-wood resources may provide an important avenue to reduce poverty. The local practices and knowledge on harvesting NWFPs are often rooted in tradition, and vary from one region to the other. This made it difficult to develop and establish research focus on a greater scale in the past. Readers of this volume will gain an often-missed, broader perspective from these new studies. The authors put a special emphasis on the nexus between conservation and livelihood from an Asian point of view. This addresses a knowledge gap in the current literature and offers important clues on conducting similar research around the world. The volume provides a useful reference guide for the relevant researchers, practitioners and policy makers. This book presents a selection of papers on advanced technologies for 3D printing and additive manufacturing, and demonstrates how these technologies have changed the face of direct, digital technologies for the rapid production of models, prototypes and patterns. Because of their wide range of applications, 3D printing and additive manufacturing technologies have sparked a powerful new industrial revolution in the field of manufacturing. The evolution of 3D printing and additive manufacturing technologies has changed design, engineering and manufacturing processes across such diverse industries as consumer products, aerospace, medical devices and automotive engineering. This book will help designers, R&D personnel, and practicing engineers grasp the latest developments in the field of 3D Printing and Additive Manufacturing. Thirty years of interviews with the author of *The Bluest Eye*, *Song of Solomon*, *Beloved*, and other novels. Doctoral Thesis / Dissertation from the year 2021 in the subject Education - Reading Instruction, grade: Doctor of Philosophy, , course: Education, language: English, abstract: This thesis explored the impact of Home grown school feeding program which were designed and implemented by WFP with its different partners in Rwanda between 2015 and 2020, with the aim to understand their impact on literacy improvement. Primary education is receiving much attention from governments of all countries and NGOs in recent times. However, poverty and hunger serves as barriers to achieving the Education for All (EFA) policy in Rwanda. To actualize the EFA in Rwanda, there was the introduction of some educational intervention programmes such as the capitation grant and the school feeding. School feeding programmes are safety net

programmes as well as educational interventions ensuring that children with poor parents are given at least a meal a day at school. In Home grown school feeding program intervention (Rutsiro, Karongi, Nyaruguru and Nyamagabe districts), students get porridge and food respectively. Therefore, this thesis adopted the qualitative research method to investigate how Home grown school feeding program contributes to literacy improvement in Rutsiro district, Rwanda. As a result, approximately one-third of our research sample is reading at or above the WCPM range. Besides this, there are differences in boys' and girls' performance at certain ranges of WCPM, with a quarter of the male sample reading no words at all compared to 11.8 percent of females. Girls also outperform boys at the 16-30 WCPM range, but this trend reverses at the highest WCPM range, with nearly a quarter of boys reading 41-56 WCPM but just 13.6 percent of girls. The findings show that students who could read aloud have much better comprehension ratings: 92.6 percent meet or exceed standard compared to 64.8 percent of those with lower oral fluency. The difference is even more marked when comparing the percentages in the exceeds category: 65.6 percent of students who read on their own answered 4-5 comprehension questions correctly compared to 35.9 percent of those who listened to the story. Moving from the elegant drawing rooms of Lahore to the mud villages of rural Multan, a powerful collection of short stories about feudal Pakistan. An impoverished young woman becomes a wealthy relative's mistress; an electrician on the make confronts his desperate assailant to protect his most prized possession; a farm manager rises far in the world—but his family discovers after his death the transience of power; a maid, who advances herself through sexual favours, unexpectedly falls in love. In these linked stories about the family and household staff of the ageing KK Harouni, we meet masters and servants, landlords and supplicants, politicians and electricians, village women, and Karachi housewives. Part Chekhov, part RK Narayan, these stories are dark and light, complex and humane; at heart about the relationship between the powerful and powerless, bound together in life—and in death. Together they make up a vivid portrait of a feudal world rarely brought alive in the English language. Sensuous, graceful, melancholy, In Other Rooms, Other Wonders gives you Pakistan as you have never seen it. It marks the debut of an amazing new talent. This book is an investigation of the world of gay, containing personal interviews with homosexuals in India and abroad. It touches on many aspects of the subject and makes a plea for more humane, compassionate, rational scrutiny of its social and psychological repercussions. Containing almost 250 entries written by scholars from around the world, this two-volume resource provides current, accurate, and useful information on the politics, economics, society, and cultures of India since 1947. • 240 A-Z entries on the social, political, cultural, and economic development of India since 1947 • Contributions from more than 100 distinguished international scholars from five continents • A chronology of major domestic, regional, and world events in and involving

India from 1947 to 2010 • A "Guide to Related Topics" to allow readers to trace main themes across related entries • An extensive Selected Bibliography containing multicultural and multidisciplinary materials and scholarship on the growth and development of the Republic of India from 1947 to the present Same-Sex Love in India presents a stunning array of writings on same-sex love from over 2000 years of Indian literature. Translated from more than a dozen languages and drawn from Hindu, Buddhist, Muslim, and modern fictional traditions, these writings testify to the presence of same-sex love in various forms since ancient times, without overt persecution. This collection defies both stereotypes of Indian culture and Foucault's definition of homosexuality as a nineteenth-century invention, uncovering instead complex discourses of Indian homosexuality, rich metaphorical traditions to represent it, and the use of names and terms as early as medieval times to distinguish same-sex from cross-sex love. An eminent group of scholars have translated these writings for the first time or have re-translated well-known texts to correctly make evident previously underplayed homoerotic content. Selections range from religious books, legal and erotic treatises, story cycles, medieval histories and biographies, modern novels, short stories, letters, memoirs, plays and poems. From the Rigveda to Vikram Seth, this anthology will become a staple in courses on gender and queer studies, Asian studies, and world literature. The choice of a pronunciation model for the 21st century learner has become a major issue of debate among applied linguists concerned with teaching English. The standard pronunciation models - Received Pronunciation and General American - have recently been confronted with a new proposal of a Lingua Franca Core (LFC) or English as a Lingua Franca (ELF), put forward as a didactic priority in teaching English pronunciation to foreigners. This volume, which includes selected contributions from the Poznań Linguistic Meetings of 2003 and 2004, does not intend to present yet another model, but sets out to place the teaching and learning of English pronunciation in the context of the 21st century. As the needs of English users are clearly changing fast in the globalizing world, the question is to what extent, if at all, models of pronunciation have been able to keep up with them, and whether they in fact should do so. Thus, key issues in the integration of pronunciation into English as L2 curricula are explored. Research in recent years has increasingly shifted away from purely academic research, and into applied aspects of the discipline, including climate change research, conservation, and sustainable development. It has by now widely been recognized that "traditional" knowledge is always in flux and adapting to a quickly changing environment. Trends of globalization, especially the globalization of plant markets, have greatly influenced how plant resources are managed nowadays. While ethnobotanical studies are now available from many regions of the world, no comprehensive encyclopedic series focusing on the world's mountain regions is available in the market. Scholars in plant sciences worldwide will be interested in this website and its dynamic content. The field (and

thus the market) of ethnobotany and ethnopharmacology has grown considerably in recent years. Student interest is on the rise, attendance at professional conferences has grown steadily, and the number of professionals calling themselves ethnobotanists has increased significantly (the various societies, like the Society for Economic Botany, the International Society of Ethnopharmacology, the Society of Ethnobiology, and the International Society for Ethnobiology currently have thousands of members). Growth has been most robust in BRIC countries. This new MRW on Ethnobotany of the Himalayas takes advantage of the increasing international interest and scholarship in the field of mountain research. It includes the best and latest research on a full range of descriptive, methodological, theoretical, and applied research on the most important plants in the Himalayas. Each contribution is scientifically rigorous and contributes to the overall field of study. I Just Want To Drink Irish Coffee And Ballet MINIMALIST AND STYLISH JOURNAL Whether for your desk at home, your work or in your bag on the go this professionally designed 6x9 notebook provides the perfect platform for you to record your thoughts. This Journals pre-lined pages are ready and waiting to be filled. DETAILS: 120 Blank Lined White Pages Simple Stylish Typographic Cover Art DIMENSIONS: 6x9 inches PERFECT FOR: Everyday Dairy Personal Journal Wedding Planning Work Lists Creative Doodles College Planning This book gathers high-quality papers presented at the Third International Conference on Smart Computing and Informatics (SCI 2018-19), which was organized by the School of Computer Engineering and School of Computer Application, Kalinga Institute of Industrial Technology, Bhubaneswar, India, on 21-22 December, 2018. It includes advanced and multi-disciplinary research on the design of smart computing and informatics. Thematically, the book broadly focuses on several innovation paradigms in system knowledge, intelligence and sustainability that can help to provide realistic solutions to various problems confronting society, the environment, and industry. The respective papers offer valuable insights into the how emerging computational and knowledge transfer approaches can be used to deliver optimal solutions in science, technology and healthcare. This edited book explores the use of technology to enable us to visualise the life sciences in a more meaningful and engaging way. It will enable those interested in visualisation techniques to gain a better understanding of the applications that can be used in visualisation, imaging and analysis, education, engagement and training. The reader will be able to explore the utilisation of technologies from a number of fields to enable an engaging and meaningful visual representation of the biomedical sciences, with a focus in this volume related to anatomy, and clinically applied scenarios. The first eight chapters examine a variety of tools, techniques, methodologies and technologies which can be utilised to visualise and understand biological and medical data. This includes web-based 3D visualisation, ultrasound, virtual and augmented reality as well as functional connectivity magnetic resonance imaging, storyboarding and a variety of stereoscopic and

2D-3D transitions in learning. The final two chapters examine the pedagogy behind digital techniques and tools from social media to online distance learning techniques. This book focuses on two crucial issues that need to be addressed as a matter of urgency by universities in the Arab region, namely (a) conducting independent assessments of the quality of their teaching, research, administration, governance, and planning; and (b) determining the relevance of their teaching, research, and societal impacts. Although well-established around the world in manufacturing industries and private-sector service industries, including the research and commercialisation arms of the major universities and research institutes, it is only in recent years that quality-assurance (QA) assessments have started to be applied to most aspects education. Several Arab universities are adopting various forms of QA but some variants are little more than bureaucratic "box-ticking" exercises with minimal commitment by staff to the ultimate aim of continuing self-improvement. This book will be of interest to senior management at faculty and departmental level and above in all Arab universities specifically, and more generally in Islamic institutions of higher education. Senior management in other universities, especially in the developing world will benefit from its analyses and recommendations. In this authoritative, well-researched book, full of helpful insights and practical advice, a psychologist draws on more than 15 years experience and expertise in stress management to explore the unique challenges that high-achieving women face and how they can avoid burnout. The Heinous Offence of Rape has been dealt with under the Indian Penal Code not as a mere provision with a limited scope but has acquired a very wide dimension in terms of its definition as well as scope. The rape laws in India have evolved with time due to growing brutality of this barbaric crime in the country. The provision has seen important amendments over the years on the recommendation and suggestion of various Law Commission Reports and various landmark judgements highlighting the growing need for a much more stringent law to curb the gravity of the offence of rape. Even though the IPC was codified in the year 1860 i.e., about 160 years ago with provisions considered very stringent in terms of the punishments laid down for different offences therein, it has somewhere failed to achieve its purpose. The ever increasing number of such offences being committed in the society is the best evidence of its shortcomings. The gravity and brutality of the offence has drawn concerns from all quarters yet the offence has continued unabated, with abysmally low conviction rates, even lighter and sometimes, erratic sentencing patterns and unsympathetic treatment of its victims. This book is an attempt to bring in perspective, the reason for the increase in number of rape cases in India and the lacunae in the practice of such a stringent law. This book is a collection of scholarly articles by authors from various domains of law and they have provided a narration of the Anti-Rape Laws prevailing in the country. The subject has been dealt with comprehensively, while describing the historical influences in the laws. The journey of the entire development of the

law has been traced by taking into focus the shifting concerns and growing need for the amendment of the provisions. The numerous legislative amendments redefining the offence, enhancing punishment and procedural aspects have been discussed. The judicial developments through landmark precedents laid by various courts have also been discussed in length to show the adversity of the crime and the need for looking into the law due to the practical shortcomings in the law. Appropriate references to international developments and municipal laws of nations have been provided in order to give a comparative treatment to the subject. Emerging issues in rape laws in India and practicable suggestions find a place in the book. Overall, it attempts an informative and critical study of the subject from diverse perspectives. Rape is the fourth most common crime against women in India. Despite such harsh penalties against it, the gruesome act that has penetrated in the form of Rape has only escalated. This calls for an in-depth analysis so as to ascertain the loopholes in the current law in force. During the process of writing this book the authors came across shocking events and instances of Rape that shows the inhumanity that prevails in the country which is much beyond any law. The most distressing fact was the inhumane conditions that victims have to suffer due to the taboo of Rape and the stigma attached with this crime. Despite going through such a horrific crime, the victims rather than receiving a proper relief have to undergo severe mental and physical agony. The inspiration for this book was derived from the fact that India is a democratic country with a robust legal framework, however, it lacks a stringent legal enforcement mechanism due to which such a gruesome and barbaric act of inhumanity is on the rise. The objective of the book is to bring in view of the readers the various aspects of Anti-Rape Laws in India, the evolution of the rape laws in the country, need for gender-neutral laws by criminalising Male Rape, the growing cases of Marital Rape and need for making a law against it, prevailing misuse of anti-rape laws and majorly looking at the practicality of the law as contrary to how it is laid down in the statute. This gathering of critical essays is at once impressive and hospitable -- characteristic of Morrison's own work as well. Basically, the contributors of these pieces react to Morrison as a black novelist, as a female novelist, or as a practitioner of the novel form, period -- black and female or otherwise. All of them are interested in how Morrison has stretched the boundaries of these three categories. Points are made, counterpoints offered, her works are examined and cross-examined. The general opinion is that in reading Morrison, critics and general audience alike experience the sheer pleasure of hearing all the resonances of a voice beautiful and powerful. ISBN 0-8161-8884-X: \$37.50. This book includes papers in the research area of artificial intelligence, robotics and automation, IoT smart agriculture, data analysis and cloud computing, communication and technology, and signal and natural language processing. The book is a collection of research papers presented at the First International Conference on Fourth Industrial Revolution and Beyond (IC4IR 2021) organized by University Grants Commission of

Bangladesh in association with IEEE Computer Society Bangladesh Chapter and Bangladesh Computer Society during December 10-11, 2021. The student-edited law review is published twice annually. Members of the Mitchell Hamline Intellectual Property Institute's Board of Advisors provide critical oversight to ensure the articles are of the highest academic quality. This combined effort makes Cybaris(R) a valuable resource for legal practitioners, scholars, and lawmakers. Volume 7 covers a variety of pressing intellectual property topics facing inventors, artists, and intellectual property attorneys today. In particular, readers can expect to find topics authored by practitioners, students, and government employees. These articles will tackle public policy, case law, and evolving legislation. Cybaris(R) is continually looking for new ways to reach readers. Our online issue and social media will allow the law review to reach new audiences in an interactive, approachable manner. Overall, the goal is to make Cybaris(R) a dialogue on contemporary issues in intellectual property law. This book constitutes the refereed proceedings of the Second International Conference on Smart Trends in Information Technology and Computer Communications, SmartCom 2017, held in Pune, India, in August 2017. The 38 revised papers presented were carefully reviewed and selected from 310 submissions. The papers address issues on smart and secure systems; smart and service computing; smart data and IT innovations. Today, individuals and societies of the digital age are no longer constrained by conventional contexts, narratives, settings, and status; they are surrounded and guided by digital tools and applications leading to a digital revolution. That digital revolution changed the individual along with living styles and cultural and social relations among people. Moreover, these revolutionary changes and the increasing capabilities of smart devices have brought today's people a new kind of public sphere with questionable freedoms but also restraints in its digital dimensions. Now, it is possible to talk about the digital dimension and equivalence of all the concepts that are both individually and socially constructed in a new digital world. The Handbook of Research on Digital Citizenship and Management During Crises covers many different components engaged with digital world responsibilities. The authors assess the position, status, and reactions of the new citizen against future catastrophes. Covering topics such as epistemic divide, internet addiction, and new media technologies, this text serves as a cutting-edge resource for researchers, scholars, lawmakers, trainers, instructional designers, university libraries, professors, students, and academicians.
