The legendary Alfasud vanished from the showrooms in 1984 with the introduction of the Alfa 33. During its production period the Alfasud range dominated the glamorous end of the small car market with steady improvements over the years. Among the range of articles in this book are road tests, model introductions, long term reports and buying secondhand. Performance, technical and comparison data is well covered. Compare the Alfasud with contemporary rivals. Models included are 1186cc, Ti, 1286cc Sprint, 5M, 1300Ti, 1490Ti, 1490 Sprint, 1.4 Super, 1.5 Sprint Veloce, 1.5 Super, Series III, Ti 1.5 Veloce, 1.5 Hatchback, Sprint Trophy. The Alfetta was introduced in 1972. Both Saloons and GT coupes started with 1.8 versions of Alfa's classic twin-cam four, later being offered in budget-priced form with 1.6-litre engines. The 2-litre models were given the GTV designation. Later the coupes were given the 2.5-litre V6 engine while the saloons remained with the 2-litre. Production ceased in 1987. Contains road and comparison tests, new model introductions, design analysis and technical data. Covering Alfetta saloons and coupes, GT, 1.6, GTV 2000, 2000 Sprint Veloce, GTV Strada, Turbodelta, 2-litre Turbo diesel, GTV6 2.5, 90 Gold Cloverleaf, Callaway Twin Turbo. « On y découvre un être beaucoup plus attachant qu'il ne le laisse transparaître en public, mais aussi l'image d'un homme à qui la vie a beaucoup donné, mais aussi beaucoup repris. » Eric Lefrançois, La Presse « Des anecdotes savoureuses et des secrets jusque-là bien gardés réussiront sans doute à faire connaître cet homme public redoutable dont les prouesses derrière le volant n'ont constitué qu'une facette de son métier de communicateur. » Louis Butcher, Journal de Montréal « Jamais déconnecté de la réalité, il est un homme de son temps et surtout un homme d'arguments. » Hélène Cantin, SRC - À LA UNE « Fascinant. » Robert Germain, Allô Vedettes This beautifully designed and illustrated essential guide to car design from Motorbooks' Speed Read series traces the inspirations of the first car designers and tracks the craft, the art, and the science that have propelled successive generations of designers and shaped the contours of the vehicles we see all around us. Never before has the car-buying public been more aware of how a car's design fits into their everyday lives and what it communicates about the driver behind the wheel. Like all design, car design is complex subject. Every part of a car represents myriad decisions by the design team ruled by engineering, aesthetics, human interface, and emotion. Speed Read Car Design helps the you understand the hows and whys of that design process, offering an engaging review of history, theory, key concepts, and key designers. It's a book for car enthusiasts, design fans, and anyone with a desire to better understand why our wheeled world looks the way it does. In sections divided by topic, you'll explore the birth of car design, how it evolved over the last century, successes and failures in innovation, the elements that make up a car's style, the engineering behind the design, the creative process and design fads, and finally the road ahead in car design. Each section ends with a glossary of related terms, and informational sidebars provide fun facts, historical tidbits, and mini-bios of key people in car design. Sleek illustrations of the cars give clear design examples throughout. With Motorbooks' Speed Read series, become an instant expert in a range of fast-moving subjects, from Formula 1 racing to the Tour de France. Accessible language, compartmentalized sections, fact-filled sidebars, glossaries of key terms, and event timelines deliver quick access to insider knowledge. Their brightly colored covers, modern design, pop art-inspired illustrations, and handy size make them perfect on-the-go reads. This Essential Buyer's Guide leads you through the process of buying an Alfasud, from whether this is the right car for you, what it's like to live with and what it will cost you to run, to which version and engine is best for you and what you should be paying for it. Having helped you decide these factors, this guide then takes you through the buying process. It explains what equipment you'll need when you go to view a car and shows you how to quickly determine whether to look at a particular car in more detail or to just simply walk away. A comprehensive and thorough evaluation section, with a points scoring system, lets you fully assess a prospective purchase and detailed illustrations show exactly what to look for. With advice on paperwork,

buying at auctions and thorough and clear advice on restoration, every aspect of sourcing your car is covered. Having led you to your perfect car, the Guide goes yet further to give you all the contact information you'll ever need to get involved with the Alfased-owning community allowing you to make the most of your new pride and joy! eBook ISBN: 978-1-787118-31-7 (9781787118317) Print ISBN: 9781845840075 (9781845840075) Almost 4000 Alfa Romeo Montreals were produced between 1970 and 1977, and sound cars are readily available today at affordable prices, although they are appreciating fast. The Montreal is a powerful car that can be immensely enjoyable to drive and that turns heads wherever it appears. However, until the original edition was published, the lack of detailed information about the Montreal had frustrated many owners and discouraged others from purchasing the car. This book provides detailed technical information and practical tips to help owners with maintenance, tuning and upgrading the performance of this unique car. It explains how the Montreal's specific weaknesses can be rectified so that it can realise its full potential. It also contains information about Montreal history, production, racing, meetings, reviews, drawings, art, special tools, paint finishes, models, prices and service providers. This comprehensive book can help present owners enjoy the Alfa Romeo Montreal to the fullest, and it shows other discerning car enthusiasts that this beautiful and potent classic GT is a hidden treasure that is well worth seeking out. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 11.0px Arial} More than 1,000 photographs in b&w and color illustrate the extraordinary variety of sports cars that have been offered to the public. All the great names are featured, including cars from Israel, Egypt, Spain, Switzerland, Norway and Brazil. After a period of post-war austerity, in 1957 Alfa Romeo decided it was time to re-enter the market for luxury/executive class cars with a new range designed for the growing number and prosperity of potential customers. Thus, the first models in the new 2000 series emerged, followed by the 2600 series in 1962. That they were not hugely successful, although some 18,540 were manufactured between 1957 and 1966, can be attributed to a number of factors, principally cost. Largely ignored for many years, these cars are now recognized as a significant element in Alfa Romeo's history and this book is a valuable record of their story. Richly illustrated with over 200 colour and black & white photographs, this book introduces the history of the company and its early designs; describes the early Berlina saloon, Spider convertible and Sprint coupe, and their development into the 2600 series; details the evolution of the 1900-based engine into the 6-cylinder 2600 engine; provides a history of the SZ Sprint Zagato; includes information on prototypes, show specials, specification tables, colour schemes and production numbers and, finally, includes a chapter on owning a 2000 or 2600. Revised and updated to 2007, "Alfa Romeo - Production Cars" was first published in 1996, written by two experts: Stefano d'Amico (President of RIAR, the Alfa Romeo Italian Register) and Maurizio Tabucchi (consultant at both RIAR and ASI, the Italian Vintage Automobile Association). This fascinating story of Alfa Romeo's cars is told model by model by a text that results from precise reconstruction of the facts, enriched with detailed technical specifications (chassis numbering included) and rare archive illustrative material. All of Alfa's recent production can also be found in the book, starting with the 155, the last car in the previous edition, the following 156, 145, 146, 147, 166, 159, up to the last "Brera" and "Spider"; A long-awaited new edition that no Alfa Romeo fan should miss. Written in English and Italian. It took a great deal of determination on the part of women to sweep aside male resistance from the inner circles of the motoring world. A veritable saga with a wealth of illustrations spanning almost a century of motor racing. Over forty unique portraits of daring, brave women who took part in speed records events, rallies and Grand Prix races. Experts from four continents pass judgment on one of the most charismatic cars ever built, the Alfa Romeo Giulietta and the early Giulia range of cars. They became one of the most desirable and popular of the Italian genre. Included are road and comparison tests, technical and performance data, owner's reports and complete specifications plus advice on acquiring and restoring a Giulietta. In 1962 a small Morgan sports car TOK258 created history by defeating factory teams run by leading international manufacturers in the famous 24 hour race at the Le Mans circuit. The car crossed the finishing line on Sunday 24th June having completed 2256 miles in the twenty four hours from the start time on Saturday afternoon to win the 2 litre GT class. Although privately owned, the car was entered and supported by the Morgan Motor Company and driven by Chris Lawrence and Richard Shepherd-Barron. This new colour 50th anniversary edition of the original book by Ronnie Price, now with

racing driver Richard Shepherd-Barron as co-author, covers the concept, preparation, and official testing at the circuit. It gives a blow-by-blow account of the race, with anecdotes, memorabilia, material and photographs only recently made available. Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts everywhere are more active today than ever in preserving, modifying and racing these excellent cars. Throughout this time, the author in true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark Cylinder head mods, big-brake mods, LSD adjustment procedure, electrical system improvements, plus many flow-bench diagrams, dyno plots, and much more. There is something special about Alfa Romeo cars which can't be defined precisely but is, perhaps, best described as a vitality that creates a symbiosis between driver and machine: a oneness that no other marque seems to replicate. Alfa's Berlinas have always tended to be overshadowed by their spotlight-grabbing Coupé and Spider siblings, but enthusiasts with family car needs have always known that any saloon/sedan with the famous Alfa Romeo badge would deliver pure driving pleasure in equal measure. Here is the full story of Alfa's quirky but characterful Berlinas, from their beginnings in the early 1900s through to the start of a new millennium. Not only does the book describe and picture every model, it also contains useful information on restoring classic Alfa Romeos and details of marque specialists. The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it details the evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider. When you think of Alfa Romeo, it is the Italian's company's sports cars, above all, that fire the imagination, since they encapsulate everything that is great about the brand. In successive dynasties of fixed-roof coupés and convertible spiders, Alfa Romeo has built one of the greatest canons of work of any car maker in the world. The appeal of Alfa Romeo's sports cars is, of course, partly down to their aesthetic eminence. A host of talented designers created their best work for Alfa – Giorgetto Giugiaro's Giulia Sprint GT, Franco Scaglione's 33 Stradale and Pininfarina's Duetto Spider, to name but a few – but style was only ever a part of the story. Drivers love Alfa Romeo coupés and spiders, too, because technically speaking, these cars were in a class of their own. Alfa Romeo consistently employed elements from much more expensive machinery, democratising them into its sports cars. One can cite gearboxes with multiple ratios, all-round disc brakes, lightweight aluminium engines, perfectly balanced weight distribution and many more. Alfa Romeo Coupes and Spider In Detail since 1945 celebrates Alfa Romeo's most iconic sporting machinery. From the earliest sports cars of its formative years right up to the present day, every Alfa coupé and spider is described in detail. Included are exotics like the 6C 2500 Freccia d'Oro, Montreal and 8C Competizione; focused enthusiast cars like the Giulietta Sprint Veloce, Giulia GTA and 4C; comfortable touring machines such as the 2600 Spider and Giulia GTC; iconic "everyman" sports cars like the Giulia Spider, Alfetta GTV and Alfasud Sprint; and genuinely unique projects such as the ES-30 SZ. Also included are many coachbuilt cars, official concepts and show cars. A limited-edition book about cars designed by Raymond Loewy. Book focuses on his design of a "one-off" Lancia called the Loramyo that he had built for himself. It then follows an intriguing trail of how it changed hands, then disappeared for a time only to be reappear in a junkyard twenty years later. The wrecked car was later gifted to Lancia in Italy by the US Lancia Club for their collection in Turin Italy. Today it is fully restored. A fascinating tale about American car design since 1930! Unique point system will help you to place the car's value in relation to condition. This is an important investment-don't buy a car without this book's help. The Kansas Flint Hills stretch across a dozen counties in the eastern half of the Sunflower State. The region boasts rolling hills covered in native grasses, including the tallgrass varieties unique to the area. Dubbed the "Great American Desert" by pioneers facing the prairie's vastness, the rich grassland became home to settlers pursuing ranching and farming enterprises. Images of America: Flint Hills presents over 200 historic images from a half-dozen counties in the region. Included are vintage photographs from the Native Stone Scenic Byway and the Flint Hills Scenic Byway that transverse the district. Also included are views of Council Grove, the last place that travelers could purchase supplies before leaving on the Santa Fe Trail. The Davis Ranch, which encompassed all of what is now the Tallgrass Prairie Preserve, is seen in historic images never published before. The volume concludes with photographs of Flint Hills cowboys at work and at play. Here is a fact and picture-packed book dedicated solely to the Giulia GT in all its forms including the fabulous lightweight GTA racer. Now an updated, large format third edition which includes over 100 new images and which is limited to 1500 copies. Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed to the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

Straight from the auction block! Old Car Weekly's Old Car Auction Bible is your handy resource for collector vehicle auctions from all corners of the U.S. In it, the publishers of Old Cars Weekly and Old Cars Report Price Guide have compiled more than 40 important sales from around the country that can give hobbyists a true picture of what cars are selling for and where the collector car market is headed. All the big auction houses are represented: Mecum, Russo and Steele, Barrett-Jackson, RM Auctions, Auctions America, Worldwide, Bonham's, Gooding and many more. With 340 pages, and more than 500 illustrations and charts, size 8.25 x 10.75 inches, this is possibly the most complete workshop manual for the Alfa Romeo 750 & 101 series of automobiles. It includes: A reprint of the September 1958 factory Workshop Manual (No.637). The 12-page 'Transmission Appendix' from the December 1957 manual (No.611). The 15-page 1962 'Enclosure to the Shop Manual-Technical Characteristics' (No.854) plus the 1963 and 1964 'Technical Characteristics' publications for the 1600cc models (27 pages). Introduced in 1954, the initial 750 Series Giulietta was replaced by the 101 Series Giulietta in 1959. Both the 750 and 101 models were powered by a 1300cc (1290cc) engine. The engine capacity was increased in 1962 with the introduction of a 1600cc (1570cc) unit. Co-incident with this engine update, the Giulietta name was changed to Giulia, although they still retained their original 101 Series designation. From 1962 onwards, the updated Giulietta continued to be sold under the Giulia name until they were replaced by the all-new 105 Series Giulia-based models in 1965. As the predominance of the basic mechanical components of the 750 and 101 models remained

unchanged during their 1954-1965 production run, the original Giulietta workshop manual was considered adequate and the factory supplemented it with the publication of 'Technical Characteristics' booklets (1963 & 1964) that updated the Factory manual with technical data specific to the 1600cc equipped cars. Timeline of the English language manuals issued by the Alfa factory for the 750 & 101 Series Giulietta and Giulia models: The first English language Workshop Manual (Part No.577 - 600 copies) was issued in May 1957 and it consisted of 14 individual booklets in a ring binder. In addition, a separate booklet numbered 15 was added a little later that was identified as 'Special Repair Data for the 'Sprint Veloce, Spider and Super Spider'. In December 1957, Alfa issued 1000 copies of a softbound workshop manual (Part No.611) that combined the booklets from the May 1957 publication into a single volume. It should be noted that booklet 14 'Special Tools and Equipment' was omitted from this edition and that the images are of poor quality. In September 1958, another 1000 copies of a softbound single volume manual (Part No.637) was issued and the images in this manual are almost photo quality. This edition also included the previously missing 'Special Tools' section. However, for some unknown reason the 12-page appendix to the transmission section from the December 1957 edition was omitted. This same part number (637) was reprinted by the factory in September 1961 (1000 copies). Finally, in November 1962, Alfa issued 2000 copies of a 15-page booklet 'Enclosure to the Shop Manual - Technical Characteristics' (Part No.854). This booklet expanded the technical data for the 1300cc models that was previously included in 'Technical Specifications' section of both the ring bound and softbound workshop manuals. However, in 1962, the Giulietta sport models: Sprint, Sprint Special and Spider were fitted with the new 1600cc engine and the Giulietta Series 101 name was dropped but they continued to be sold under the Giulia name (as 101 Series vehicles) until they were replaced by the all-new 105 Series Giulia-based models in 1965. Consequently, for the sake of completeness, the 20-page October 1963 'Technical Characteristics' booklet (Part No. 955 -1000 copies) for the 1600cc Giulia Ti, Spider & Sprint and the 7-page October 1964 'Technical Characteristics' for the Giulia Spider Veloce should be a required addition to this list of manuals for the 750 and 101 Series models.

Ferrari Fever is a fascinating and nostalgic look back at the classic car collecting scene in the 60's and 70's, an era when some of the rarest and most interesting Italian automobiles could still be found hidden or languishing in barns, junkyards or by the side of the road...almost lost in time. Paul Schouwenburg's story begins in wartime occupied Amsterdam, a poignant backdrop to the hardships of the years to follow, when the appearance of any exotic Italian thoroughbred was a rare sight indeed. Fuelled by a fascination for all things mechanical, adventures on a Rudge bicycle and early experiences in his parents succession of Rovers, Paul gains a burning passion for finding, restoring, and ultimately racing Italian cars. But these were not just any Italian cars -from the early 60s onwards, he begins to uncover several rare Alfas, from 1900CSS Zagato to Tipo 33/2, in addition to a host of very special Ferraris, including a 250GTO, 340 America Touring, 250 MM Vignale Berlinetta, 250GT SWB Competition/61 and 275GTB/C/LM, usually by word of mouth or tenuous rumour. Having acquired them, often many different models at a time, he would drive them home across Europe through snow storms, and restore them single-handedly in his spare time, full-time job as a world-leading head and neck cancer surgeon permitting! If that wasn't exciting enough, he would then race them, often winning, before moving on to the next irresistible project. Filled with rich anecdotes and rare insights into the colourful characters of the day, including Jacques Swaters and Rob de la Rive Box, Paul's passion and incredible drive make for exciting reading. Indeed this is a unique take, a look in the rear view mirror at a bygone era when gems could be found incredibly cheaply and enthusiasts took seat-of-the-pants decisions regarding many aspects of a hobby which was uncharted, innocent and simply not as commercial as today he couldn't even give away his 250 GTO at the time! Introduces the Alfa Romeo automobile company, discussing the company's success, its racing history, and notable models. Launched in 1971, the Alfasud was an all-new departure for Alfa Romeo, both in its design and its execution and became the best-selling model in the history of Alfa Romeo. Originally it was developed with the dual intentions of launching the company into large volume production and providing a more affordable model than their highly regarded sports cars. However, its story was far from straightforward. Although respected for its technically brilliant design and universally praised for its ride and handling, the model never quite reached its full sales potential and its reputation was marred by problems that could not

have been foreseen. With over 240 colour photographs, the book includes a brief history of Alfa Romeo to the end of the 1960s. The development of the Alfasud's design and the political reasons for building a new factory are given along with the car's reception from both the press and owners. The evolution of the model from initial prototypes, to the improvements to build quality and performance, including the Giardinetta and Sprint variations are covered as well as Alfasuds in competition. The political and labour problems, as well as the early quality control issues are discussed. Finally, there are numerous specification tables, performance data, chassis numbers, engine codes and colour charts. All of Alfa's great sportscars, including the convertibles and coupes, come vividly to life, from the pre-war 6C to today's Spider and GTV, including the Giulietta 750 and Giulia 101. Andrea Sparrow's informative text tells the Alfa Romeo story and details the individual models. David Sparrow's award-winning color photographs deliver a stylish appreciation for Alfa's world-renowned sports cars. A colorful celebration!
