***Index Nominum, International Drug Directory Mar 23 2020 After 50 years, this authoritative index continues to reign as the standard international pharmaceutical reference on medications, proprietary names, synonyms, chemical structures, and therapeutic classes of substances.. This 19th edition offers improved search functionality and includes 70,000 proprietary names (19,000 more than the previous edition) from more than 12,000 manufacturers representing 171 countries. It also contains an updated and edited collection of active substances and derivatives (4,000 total) with international non-proprietary names (INN) and 12,000 synonyms. An accompanying CD provides more than 12,000 addresses and links to pharmaceutical manufacturers worldwide.***

***Sport Italia Apr 23 2020 The Italian love affair with sport is passionate, voracious, all-consuming. It provides a backdrop and a narrative to almost every aspect of daily life in Italy and the distinctively pink-coloured newspaper La Gazzetta dello Sport is devoured by almost half a million readers every day. Narrating the history of modern Italy through its national passion for sport, Sport Italia provides a completely new portrayal of one of Europe's most alluring, yet contradictory countries, tracing the highs and lows of Italy's sporting history from its Liberal pioneers through Mussolini and the 1960 Rome Olympics to the Berlusconi era. By interweaving essential themes of Italian history, its politics, society and economy with a history of the passion for sport in the country, Simon Martin tells the story of modern Italy in a fresh and colourful way, illustrating how and why sport is so strongly embedded in both politics and society, and how it is inseparable from the concept of Italian national identity. Showing sport's capacity to both unite and deeply divide, this book reveals a novel and previously unexplored element of the history of a society and its state, which will be an essential read for sports fans, historians and students alike.***

***Barbarians, Gentlemen and Players Dec 20 2019 First published in 1979, this classic study of the development of rugby from folk game to its modern Union and League forms has become a seminal text in sport history. In a new epilogue the authors provide sociological analysis of the major developments in international rugby that have taken place since 1979, with particular attention to the professionalism that was predicted in the first edition of this text. Sports lovers, rugby fans and students of the history and sociology of sport will find it invaluable. Rugby football is descended from winter 'folk games' which were a deeply rooted tradition in pre-industrial Britain. This was the first book to study the development of Rugby from this folk tradition to the game in its modern forms. The folk forms of football were extremely violent and serious injuries - even death - were a common feature. The game was refined in the public schools who played a crucial role in formulating the rules which required footballers to exercise greater self-control. With the spread of rugby into the wider society, the Rugby Football Union was founded but class tensions led to the split between Rugby Union and Rugby League. The authors examine the changes that led to the professionalisation of Rugby Union as well as the alleged resurgence of violence in the modern game.***

**European Drug Index Oct 22 2022 Many health care providers are frequently dealing with problems related to the identification and interpretation of medicines and prescriptions of foreign origin. Health authorities, customs and travel agencies also encounter such problems, which are related to the increasing mobility of the European population. Thus the need for a European Drug Index is obvious. The EDI provides extended information for practitioners confronted with the enormous number of drug names available on the European pharmaceutical market. This market is increasing due to the rapidly changing palette of countries and economic restrictions in Europe. The listings have been derived from drug data sources from the increased number of participating countries in this second edition. Each item starts with a trade name, in alphabetical order, followed by (depending on the original source) dosage forms, strength, volume (if applicable), and generic name(s) of the active principle(s) in a random sequence. The item is concluded by the Anatomical Therapeutic Chemical (ATC) classification (when made available by the original source) and a code for the country of origin.**
