The Mazda Miata is one of the most popular sports cars on the road today. In production for more than 20 years, the Miata's popularity has grown, and the number of aftermarket components available to the enthusiast has grown, too. This immense selection of parts has made it difficult for many would-be modifiers to choose the proper combination that will help them reach the goals they have set for their two-seater. Author and Miata expert Keith Tanner has been modifying, repairing, building, and racing Miatas for years, and he will guide you through how to best modify your car to suit your needs, starting with an explanation of how everything works and how the various parts will interact. You will not only learn what upgrades will help you reach your goals, but also how to adjust or modify what you have to make your car work at its best. Whether autocross to cross-country touring, the Miata can do it all. Keith Tanner tells you how to make it happen! This series introduces the core and

chemical science, covering important concepts in an easy, accessible style. Each title contains a number of experiments and demonstrations approached through the process of problem, hypothesis, experiment, and conclusion. All the books support the QCA schemes of work and contain definitions of important terms and explanations of key concepts; formulas and word equations; and the periodic table with explanatory notes. This title explores the concepts of the states of matter. "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021) released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fractured, and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increasing government debt and concentrated economic power will escalate social problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for humanity. Students of trends, policymakers, entrepreneurs, academics, journalists, and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading. During the Cold War, intellectual freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working secretly subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947

1967" by the New York Times, the book presents shocking evidence of CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the talents of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new introduction by the author—is "a real contribution to popular understanding of the postwar period" (The Wall Street Journal), and its story of covert efforts to win hearts and minds continues to be relevant today. From the author of *How We Die*, the extraordinary story of the development of modern medicine, told through the lives of the physician-scientists who paved the way. How does medical science advance? Popular history would have us believe that a few heroic individuals, possessing superhuman talents, lead an unselfish quest to better the human condition. But as renowned Yale surgeon and medical historian Sherwin B. Nuland shows in this brilliant collection of linked life portraits, the theory bears little resemblance to the truth. Through the centuries, the men and women who have shaped the world of medicine have been not only very human, but also very much the products of their own time and places. Presenting compelling studies of great medical innovators and pioneers, *Doctors* gives us a fascinating history of modern medicine. Ranging from the legendary Father of Medicine, Hippocrates, to Andreas Vesalius, whose Renaissance masterwork on anatomy offered invaluable new insight into the human body, to Helen Taussig, founder of pediatric cardiology and co-inventor of the original "blue baby" operation, here is a volume filled with the spirit of ideas and the thrill of discovery. Successful outcomes in armed conflict require confronting illicit networks. The case studies contained within this illustrated text to confront illicit power requires coping with political and human dynamics in complex, uncertain environments. It touches upon America's strategic relationships for capacity building with world partners to combat

terrorism and destabilizing forms of corruption throughout the world. Chapter topics covered include: Weapons trafficking Recruitment and Radicalization with forms of social media and new technologies Financial tools and sanctions Security sector reconstruction and more. Law and Litigation for Paralegals is a comprehensive text designed specifically for paralegal civil litigation courses. Author Neal Bevans not only teaches the basics of civil litigation, but also gives students the opportunity to learn skills they will use in practice. In a balanced approach, Bevans covers all the key topics paralegals need to know in an easy-to-read and engaging style that utilizes numerous examples and illustrations but never overwhelms the student. The text provides students with an in-depth analysis of a wide variety of civil cases, beginning with laying out the basic foundation of the American legal system. It proceeds through the investigation and implementation of a civil case, and follows the case through to appeal. The text balances the theoretical underpinnings of the law with the practical examples and hands-on experience that all students need to completely understand the topic.

Giltner's thorough research using slave narratives, sportsmen's recollections, records of fish and game clubs, and sporting periodicals offers a unique perspective on the African-American struggle for independence from the end of the Civil War to the 1920s. "Book reviews are brilliant, passionate, optimistic and impatient . . . Outstanding." *Economist*

The landmark exploration of economic prosperity and how the world can escape from extreme poverty for the world's poorest countries from one of the world's most renowned economists. Hailed by *Time* as one of the world's hundred most influential people, Jeffrey D. Sachs is renowned for his work around the globe advising economies in crisis. Now a classic of its genre, *The End of Poverty* distills more than two decades of experience to offer a uniquely informed vision of the steps that can transform impoverished countries into prosperous ones. Marrying vivid storytelling with rigorous analysis, Sachs lays out a clear conceptual map of the world economy. Explaining his own work in Bolivia, Russia, India, China, and Africa, he offers an integrated set of solutions to the interwoven economic, political, environmental, and social problems that challenge the world's poorest countries. Ten years since its initial publication, *The End of Poverty* remains an indispensable and highly influential work. In this 10th anniversary edition, Sachs presents an extensive new foreword assessing the progress of the past decade, the work that remains to be done, and how each of us can help. He also looks ahead across the next fifteen years to 2030, the United Nations' target date for ending extreme poverty, offering new insights and recommendations. Sheds light on the history of food, cooking, and eating. This collection of essays investigates the connections between food

studies and women's studies. From women in colonial India to American feminists, these essays show how food has served as a novel field manual. The best-selling comprehensive history of the world from the perspective of struggling peoples throughout the ages—new material and a foreword by Howard Zinn From the earliest human societies to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the twentieth century, Chris Harman provides a brilliant and comprehensive history of the human race. Eschewing the standard accounts of "Great Men, dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of "history from below." In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these developments. While many see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves ever onward in every age. This magisterial study is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical progress. "I have had many people ask me if there is a book which does for world history what my book A People's History of the United States does for this country. I always responded that I know of only one that accomplishes this extremely difficult task, and that is Chris Harman's A People's History of the World." —Howard Zinn Drawing upon released documents, memoirs and party-history works, the book documents and impact of the political campaigns in China between 1950 and 1970. Complete with extensive interviews with Chinese scholars and former officials, the book reviews the findings of the first edition. "Tobacco has been pervasive in China almost since its introduction to the Americas in the mid-sixteenth century. One-third of the world's smokers--over 350 million--now live in China, and they account for

percent of worldwide smoking-related deaths. This book examines the deep roots of China's contemporary "cigarette culture" and smoking epidemic and provides one of the first comprehensive histories of tobacco consumption in global and comparative perspective"--Publisher's description. Revised and Expanded Edition Wait—what's wrong with trans rights? It is usually assumed that trans and gender nonconforming people should follow the civil rights and "equality" strategies of lesbian and gay rights organizations by agitating for legal reforms that would ostensibly guarantee nondiscrimination and equal protection under the law. This approach assumes that the best way to address the poverty and criminalization that plague trans populations is to gain legal recognition and inclusion in the state's institutions. But is this strategy effective? Normal Life Dean Spade presents revelatory critiques of the legal equality framework for social change, and points to examples of transformative grassroots trans activism that is raising demands beyond traditional civil rights reforms. Spade explodes assumptions about what legal rights can do for marginalized populations, and describes transformative resistance processes and formations that address the root causes of harm and violence. In the new afterword to this revised and expanded edition, Spade notes the rapid mainstreaming of trans politics and finds that his predictions that gaining legal recognition will fail to benefit trans populations are coming to fruition. Spade examines recent efforts by the Obama administration and trans equality advocates to "pinkwash" state violence by articulating the military and prison systems as sites for trans inclusion reforms. In the context of recent increased mainstream visibility of trans people and trans politics, Spade continues to advocate for the dismantling of systems of state violence that shorten the lives of trans people. Now more than ever, Normal Life is an urgent call for justice and trans liberation, and the radical transformations it will require. An accessible guide to the work of American psychologist and affect theorist Silvan Tomkins

brilliant and complex theories of psychologist Silvan Tomkins

(1911–1991) have inspired the turn to affect in the humanities, social sciences, and elsewhere. Nevertheless, these theories are not well understood. A Silvan Tomkins Handbook makes his theories portable across a range of interdisciplinary contexts and accessible to a wide variety of contemporary scholars and students of affect. A Silvan Tomkins Handbook provides readers with a clear outline of Tomkins's affect theory as he developed it in his four-volume masterwork *Affect Imagery and Consciousness*. It shows how his key terms and conceptual innovations can be used to build robust frameworks for theorizing affect and affectivity. In addition to clarifying his affect theory, the Handbook emphasizes Tomkins's other significant contributions, from his broad theories of affect imagery and consciousness to more focused concepts of scenes and scripts. With their extensive experience engaging and teaching Tomkins's work, Adam J. Frank and Elizabeth A. Wilson provide a user-friendly guide for readers who want to know more about the foundations of affect studies. Discusses the Allied invasion of Normandy, with extensive details about the planning stage, called Operation Overlord, as well as the fighting on Utah and Omaha Beaches. As insightful and wise today as when originally published in 1954, Jacques Ellul's *The Technological Society* has become a classic in its field, laying the groundwork for all other studies of technology and society that have followed. Ellul offers a penetrating analysis of our technological civilization, showing how technology—which began innocuously enough as a servant of humankind—threatens to overthrow humanity itself through the ongoing creation of an environment that meets its own ends. No conversation about the dangers of technology and its unavoidable impact on society can begin without a careful reading of this book. "A magnificent book . . . He goes through one human activity after another and shows how it has been technicized, rendered efficient, and directed in the process."—Harper's "One of the most important books of the second half of the twentieth-century. modelling. What was once the factory is now the university. We start off with this apparently straightforward affirmation, not in order to assume it but to question it; to open it, radically rethinking it, toward theoretical and political research. University corporatization and the rise of a global university are not unilateral impositions or developments completely contained by capitalist rationality. Rather they are the result--absolutely temporary and thus reversible--of a formidable class struggle. The problem is to transform the field of tension delineated by the processes analyzed in this book into specific forms of resistance and the organization of escape routes. This is Edu-factory's starting point, its objective, its style and its method.

Philology—the discipline of making sense of texts—is enjoying a renaissance within academia. World Philology charts the evolution of philology across the many cultures and time periods in which it has been practiced and demonstrates how this branch of knowledge, like philosophy and mathematics, is essential to human understanding. Researched and written in Japan with the full cooperation of the factory, *The Book of the Mazda MX-5 Miata* is the definitive story of the second generation of Mazda's MX-5 - the car that re-invented the affordable lightweight roadster, a species that was thought to be extinct as the 1990s drew near. Successful immediately, the MX-5 (also known as the Miata, or Roadster) spawned many imitations but remains the world's biggest selling sports car. The series has been in production for almost 30 years, with new generations following the concept of the original, much to the delight of fans all over the world. induced the British to adopt foreign coffee-drinking customs in the
seventeenth century? Why did an entirely new social institution, the
coffeehouse, emerge as the primary place for consumption of this
drink? In this lively book, Brian Cowan locates the answers to these
questions in the particularly British combination of curiosity, commerce
and civil society. Cowan provides the definitive account of the origins of
coffee drinking and coffeehouse society, and in so doing he reshapes our
understanding of the commercial and consumer revolutions in Britain
during the long Stuart century. Britain's virtuosi, gentlemanly patrons of
the arts and sciences, were profoundly interested in things strange and
exotic. Cowan explores how such virtuosi spurred initial consumer
interest in coffee and invented the social template for the first
coffeehouses. As the coffeehouse evolved, rising to take a central place in
British commercial and civil society, the virtuosi were also transformed
by their own invention. At a glance, high fashion and feminism seem like
unlikely partners. Between the First and Second World Wars, however,
these forces combined femininity and modernity to create the new
modern French woman. In this engaging study, Mary Lynn Stewart
reveals the fashion industry as an integral part of women's transition to
modernity. Analyzing what female columnists in fashion magazines and
popular women novelists wrote about the "new silhouette," Stewart shows
how bourgeois women feminized the more severe, masculine image that
elite designers promoted to create a hybrid form of modern fashion that
emancipated women and celebrated their femininity. She delves into the
intricacies of marketing the new clothes and the new image to middle- and
class women and examines the nuts and bolts of a changing fashion
industry—including textile production, relationships between suppliers
and department stores, and privacy and intellectual property issues.

surrounding ready-to-wear couture designs. Dressing Modern Frenchwomen draws from thousands of magazine covers, advertisements, fashion columns, and features to uncover and untangle the fascinating relationships among the fashion industry, the development of modern marketing techniques, and the evolution of the modern woman as mobile, and liberated.
