Race, Ethnography and Education Nov 26 2022 This book focuses on race and ethnography, and in particular, it addresses two significant issues. Firstly, leading thinkers and emerging scholars in the field explicate the complicated nature of race intersections, theories, and meanings in educational ethnography. The ethnographic accounts consider schooling, which is then extended to larger educational settings, bound by unique and peculiar histories and locations. By amalgamating this selection of papers into one issue, the book both challenges the effects of educational histories, policies and practices, by interrogating theories and meanings of race, and positions race and racism in ethnography with the hope of presenting new applications and developments in ethnographic methodologies, theories, and practices. The volume then develops the conversation by helping to build scholarship in understanding race meanings, intersections and theories in educational and social sciences. With the escalating attention given to the study of race scholarship in recent years, there is still considerable information that scholars in the field need to know about how ethnographers and

ethnography, from diverse comparative and international schools and educational settings, respond to racialized and racist practices, while challenging and developing theories about race and racism in diverse global terrains and locations. This book was originally published as a special issue of *Ethnography and Education*.

Abstract Convexity and Global Optimization Jun 21 2022

Special tools are required for examining and solving optimization problems. The main tools in the study of local optimization are classical calculus and its modern generalizations which form nonsmooth analysis. The gradient and various kinds of generalized derivatives allow us to accomplish a local approximation of a given function in a neighbourhood of a given point. This kind of approximation is very useful in the study of local extrema. However, local approximation alone cannot help to solve many problems of global optimization, so there is a clear need to develop special global tools for solving these problems. The simplest and most well-known area of global and simultaneously local optimization is convex programming. The fundamental tool in the study of convex optimization problems is the subgradient, which actually plays both a local and global role. First, a subgradient of a convex function  $f$  at a point  $x$  carries out a local approximation of  $f$  in a neighbourhood of  $x$ . Second, the subgradient permits the construction of an affine function, which does not exceed  $f$  over the entire space and coincides with  $f$  at  $x$ . This affine function  $h$  is called a support function. Since  $f(y) \sim h(y)$  for all  $y$ , the second role is global. In contrast

to a local approximation, the function  $h$  will be called a global affine support.

Stable Non-Gaussian Random Processes Aug 23 2022 This book serves as a standard reference, making this area accessible not only to researchers in probability and statistics, but also to graduate students and practitioners. The book assumes only a first-year graduate course in probability. Each chapter begins with a brief overview and concludes with a wide range of exercises at varying levels of difficulty. The authors supply detailed hints for the more challenging problems, and cover many advances made in recent years.

Advanced Takagi–Sugeno Fuzzy Systems Oct 25 2022 This monograph puts the reader in touch with a decade's worth of new developments in the field of fuzzy control specifically those of the popular Takagi-Sugeno (T-S) type. New techniques for stabilizing control analysis and design based on multiple Lyapunov functions and linear matrix inequalities (LMIs), are proposed. All the results are illustrated with numerical examples and figures and a rich bibliography is provided for further investigation. Control saturations are taken into account within the fuzzy model. The concept of positive invariance is used to obtain sufficient asymptotic stability conditions for the fuzzy system with constrained control inside a subset of the state space. The authors also consider the non-negativity of the states. This is of practical importance in many chemical, physical and biological processes that involve quantities that have intrinsically constant and non-negative sign: concentration of substances, level

of liquids, etc. Results for linear systems are then extended to linear systems with delay. It is shown that LMI techniques can usually handle the new constraint of non-negativity of the states when care is taken to use an adequate Lyapunov function. From these foundations, the following further problems are also treated: · asymptotic stabilization of uncertain T-S fuzzy systems with time-varying delay, focusing on delay-dependent stabilization synthesis based on parallel distributed controller (PDC); · asymptotic stabilization of uncertain T-S fuzzy systems with multiple delays, focusing on delay-dependent stabilization synthesis based on PDC with results obtained under linear programming; · design of delay-independent, observer-based, H-infinity control for T-S fuzzy systems with time varying delay; and · asymptotic stabilization of 2-D T-S fuzzy systems. Advanced Takagi-Sugeno Fuzzy Systems provides researchers and graduate students interested in fuzzy control systems with further approaches based LMI and LP.

Italian Horror Film Directors Feb 05 2021 There is no cinema with such effect as that of the hallucinatory Italian horror film. From Riccardo Freda's *I Vampiri* in 1956 to *Il Cartaio* in 2004, this work recounts the origins of the genre, celebrates at length ten of its auteurs, and discusses the noteworthy films of many others associated with the genre. The directors discussed in detail are Dario Argento, Lamberto Bava, Mario Bava, Ruggero Deodato, Lucio Fulci, Umberto Lenzi, Antonio Margheriti, Aristide Massaccesi, Bruno Mattei, and Michele Soavi. Each chapter includes a biography, a detailed career account, discussion of influences both literary and cinematic, commentary on the films, with plots and production details, and an exhaustive filmography. A second section contains short discussions and selected filmographies of other important horror directors. The work concludes with a

chapter on the future of Italian horror and an appendix of important horror films by directors other than the 50 profiled. Stills, posters, and behind-the-scenes shots illustrate the book.

Il corsivo dalla A alla Z May 28 2020 Mentre da tempo sono disponibili metodi e strumenti validi per affrontare le difficoltà di tipo ortografico (disortografia) o per imparare a comporre un testo scritto, sono invece scarsi i contributi per l'insegnamento e il recupero delle abilità grafo-motorie (disgrafia). Di fatto, però, se il bambino non impara a tracciare correttamente le lettere finirà per automatizzare dei movimenti poco o per nulla efficaci, che comprometteranno l'apprendimento di altri aspetti della scrittura e di diverse competenze cognitive. I due volumi Il corsivo dalla A alla Z si presentano come un'assoluta novità, occupandosi in modo specifico della meccanica della scrittura e affrontando, in particolare, il passaggio dalla produzione di lettere in stampatello (spazialmente separate e caratterizzate da pochi tratti distintivi) a quella di lettere in corsivo (che richiedono la gestione di un sistema grafico fluido), che dal punto di vista grafo-motorio rappresenta un momento particolarmente critico per l'apprendimento della scrittura e per il rapporto che i bambini potranno avere con essa. L'opera -- che si articola in un volume di teoria e uno di pratica -- tratta le fasi iniziali dell'apprendimento della scrittura focalizzando l'attenzione sui processi che ne permettono uno sviluppo normale e che eventualmente possono essere rafforzati per favorire il recupero di un disturbo disgrafico già consolidato. Si rivolge ai professionisti dell'età evolutiva e a chi più

*Assessment Methods and Success Factors for Digital Education and New Media Nov 21 2019 In recent years, a diffuse way of promoting information and communication technologies is through the quantification of data, such as indices of references, access counters to webpages, total views of videos on YouTube, and others that are often superficial for didactics. Some data are presented as magnets to attract students to education courses—education as a commercial product and not as a public good freely accessible to all. This is an attractive format in offline and online communication channels, but it lacks metrics to build and evaluate knowledge and experiences with a critical perspective. Assessment Methods and Success Factors for Digital Education and New Media analyzes and evaluates the efficiency of the teaching-learning process and dissemination of knowledge to make the most of the potential of new information and communication technologies, examining the theories and practices of interactive content, under the formula of constructive criticism. Covering topics such as digital challenges, information architecture, and interactive design, this premier reference source is an excellent resource for educators and administrators of both K-12 and higher education, software developers, interactive designers, preservice teachers, teacher educators, evaluators of interactive systems, government officials, librarians,*

researchers, and academicians.

Le arti marziali dall'A alla Z Mar 26 2020

Made in Italy Jun 28 2020 *Made in Italy* serves as a comprehensive and rigorous introduction to the history, sociology, and musicology of contemporary Italian popular music. Each essay, written by a leading scholar of Italian music, covers the major figures, styles, and social contexts of pop music in Italy and provides adequate context so readers understand why the figure or genre under discussion is of lasting significance to Italian popular music. The book first presents a general description of the history and background of popular music, followed by essays organized into thematic sections: Themes; Singer-Songwriters; and Stories.

Do You See? We play to get out of visual inattention Oct 21 2019 This project was born as a methodological proposal on which to build or create other educational content. Through ten exercises of increasing difficulty designed for preschool and school-age children, to stimulate conscious visual attention, in continuous interaction with the parents or therapist, you want to accompany the child from pre-attentive state to a threshold of activation of the attention, that allows him to acquire new skills and improve the speed of response.

English-Italian Learner's Dictionary (Arranged by Steps and Then by Themes, Beginner - Upper Intermediate II Levels) Mar 06 2021 *Multi Linguis* offers you a frequency-thematic learner's dictionary of the Italian language. It includes up to 9000 essential words and phrases belonging to the levels from Beginner to Upper

Intermediate II (A1 - B2.2 CEFR). The entries are divided into 150 vocabulary themes as well as 6 learning steps. They are arranged by steps and then by themes, not by the alphabet. The book is intended to help you learn this language step by step but can also be applied for translating or entertaining. You may use it separately or as an additional tool for any suited educational course. The Multi Linguis Project is based on the Wiktionary corpus and created by one person. The database of the Learner's Dictionaries includes 9 000 lemmas (words and phrases), their translations in many languages as well as transcriptions, transliterations and grammar information. All these lemmas are divided into 6 learning steps of 1500 entries each and also 150 vocabulary themes grouped in 30 super themes. They can be arranged by themes, steps, parts of speech or keywords, but never by the alphabet. Different types of dictionaries are offered for the same language. They are designed in an original way to be convenient and efficient. All of them are available in epub format. Multi Linguis is presently able to publish such books for more than 70 languages. It's planned to improve them and increase their number. You can find more dictionaries in this store.

Radiestesia dalla A alla Z Sep 24 2022 Radiestesia dalla A alla Z ha lo scopo di avvicinare all' "arte" radiestesica un vasto pubblico, dando gli strumenti essenziali per comprendere che cos'è la radiestesia e come iniziare a praticarla. L'esperienza di oltre quaranta anni dell'autore e la sua serietà nel trattare la materia garantiscono la qualità dell'insegnamento. Adatto sia ai neofiti sia a coloro che desiderano approfondire questa disciplina, il libro offre la possibilità di sviluppare le capacità insite in ognuno di loro, e di poterle mettere in pratica nella vita quotidiana, in sintonia con il proprio percorso evolutivo. Dalle origini della raddomanzia, attraverso

*i millenni, si arriva alla radiestesia come espressione più evoluta e completa di una pratica che è passata dalla semplice ricerca di acqua nel sottosuolo, alla più elaborata ricerca, utilizzando sempre nuove strumentazioni, in ogni settore della vita. Il radiestesista, avvalendosi di strumenti come il pendolo, la forcilla, il biotensor, ecc., è in condizione di effettuare ricerche in ogni ambito e dare risposte a ogni suo quesito. La radiestesia si basa sulla capacità percettiva dell'operatore che, attraverso i vari movimenti del suo strumento che funge da amplificatore dei segnali, è in grado di tradurre gli impulsi ricevuti in dati utili per la soluzione pratica di ogni sua necessità. Gli esercizi e i vari quadranti contenuti nel libro mettono in condizione il lettore di poter in breve tempo ottenere risultati soddisfacenti nei campi in cui vorrà cimentarsi.*
