**Airs & Voices** Oct 27 2020 Poetry. AIRS & VOICES is the winner of the John Ciardi Prize for Poetry, selected by Mark Jarman, who calls Bonnell's voice "fresh and original." Maxine Kumin writes of the book, "Bonnell's voice is low-key but full of quirky insights that keep these poems fresh and interesting." "This is an enchanting book," writes Richard Wilbur. These poems invent their own forms, with two series of voices (of people, animals, things) portraying a world of peace with varied multicultural and international connections. The shock of 9/11 opens the final section, which relates private experience to wider social healing and the ideal of one world. "'The Voices' may be one of the wisest comments on the catastrophe of 9/11 that an American poet has made," writes X. J. Kennedy.

**WiiPi Leaks Manual** Aug 17 2022 WiiPi Leaks (WL) Manual (Jam Crab version, text only) Description: the smuggled-out manual (WM069) is the only known copy of the diabolical WiiPi organization (see warning). This interruption of the WM069 and the graphic repositories (offered for a low price on Google Play Books) of unofficial information and rumors will serve as the foundation of the entire WiiPi Leaks (WL) series and other related materials and channels, for example, the Dear Jammy letters, Random Unexplained Diagrams (RUD), Jam Crab News, Portraits, Podcasts, etc. Why do we need a manual for a fictional novel series? Well according to the author, Jam Crab, there should be explanations due to the nature of the content. Meaning the future world as contrived by the WiiPi organization in WM069 is constructed and designed in accordance to the evil, sinister WiiPi plot of world domination. Also, the WM069 does not stay within the physical, cultural and or logic of our modern-day society. Therefore, the behavior of the WiiPi characters, organizations, government affiliations, machines and contraptions, to support this fictional story we needed to justified the absurdity of the stuff in the original WM069 manual. Warning: the whole WiiPi Leaks (WL) Series of books is a mix of ironic comedy, political satire, current events and ludicrous inventions which we learned of from the Jam Crab (not his or her real name) WiiPi Leaks. It touches on

some creepy topics. So here's the warning and if these topics in the WL Series are offensive, we apologize here in advance. As mentioned, the content is intended to be used solely for the purpose of entertainment and is meant as a comedic work for an adult audience. In other words, the authors would rather laugh than cry about corporate greed, American politics, our hap hazard lives and any other issues throughout the world. Updates: there will need to be revisions as the series grows, so it's suggested the readers check for updated editions. Note: this WiiPi Leaks manual is free (no graphic diagrams included) and contains almost everything the reader needs to follow along with the story and the links to accompanying diagrams. Who is Jam Crab? Well, we here at the Jam Crab Group (JCG) of channels, simply interpret leaked messages from Jam Crab (JC), our WiiPi informant. We have never met JC. In fact he or she is believed to be on the run from the evil clutches of WiiPi. So we just wish JC well and hope he or she keeps the leaks coming in. The JCG intends to take all the possible measures to deter WiiPi from implementing their devious scheme.

**Standing Our Ground** Apr 01 2021 *Standing Our Ground: Women, Environmental Justice, and the Fight to End Mountaintop Removal* examines women's efforts to end mountaintop removal coal mining in West Virginia. Mountaintop removal coal mining, which involves demolishing the tops of hills and mountains to provide access to coal seams, is one of the most significant environmental threats in Appalachia, where it is most commonly practiced. The Appalachian women featured in Barry's book have firsthand experience with the negative impacts of Big Coal in West Virginia. Through their work in organizations such as the Coal River Mountain Watch and the Ohio Valley Environmental Coalition, they fight to save their mountain communities by promoting the development of alternative energy resources. Barry's engaging and original work reveals how women's tireless organizing efforts have made mountaintop removal a global political and environmental issue and laid the groundwork for a robust environmental justice movement in central Appalachia.

**The Commander's Handbook on the Law of Land Warfare (FM 6-27) (MCTP 11-10C)** Feb 17 2020 DOD policy requires "[m]embers of the DoD Components comply with the law of war during all armed conflicts, however such conflicts are characterized, and in all other military operations" (Department of Defense Directive [DODD] 2311.01E). This publication addresses topics that are also addressed in the DOD Law of War Manual. In the event of a conflict or discrepancy regarding the legal standards addressed in this publication and the DOD Law of War Manual, the latter takes precedence. In many cases, any apparent conflict or discrepancy may be due to this publication's efforts to provide guidance to Commanders by describing legal concepts more generally rather than exhaustively as found the DOD Law of War Manual. In certain instances, this publication will set out a current policy or practice for Army and Marine forces rather than a legal requirement.

**Disease and Security** Nov 15 2019 Focusing on East Asia, this book sets out a framework for analyzing infectious disease threats in security terms. It covers the security significance of naturally occurring disease outbreak events such as SARS and avian influenza, the development and use of biological weapons by state and non-state actors, and the security risks associated with laboratory research on pathogenic micro-organisms. Christian Enemark devises a conceptual framework for securitization that is useful for policy makers by using the overlaps and synergies between different infectious disease threats. The book draws heavily on material from public health and scientific literature to illustrate the cross-disciplinary requirements for addressing infectious diseases challenges in security terms. Fast-moving, naturally occurring disease threats are of increasing concern to governments and individuals, and it is therefore important to recognize their close relationship to the security challenges posed by Biological Weapons and pathogen research. *Disease and Security* will be of much interest to students of international security, public health and Asian politics.

**Policing and Punishment in Nineteenth Century Britain** Feb 11 2022 In the years between 1750 and 1868, English criminal justice underwent significant changes. The two most crucial developments were the gradual establishment of an organized, regular police, and the emergence of new secondary punishments, following the restriction in the scope of the death penalty. In place of an ill-paid parish constabulary, functioning largely through a system of rewards and common informers, professional police institutions were given the task of executing a speedy and systematic enforcement of the criminal law. In lieu of the severe and capriciously-administered capital laws, a penalty structure based on a proportionality between the gravity of crimes and the severity of punishments was erected as arguably a more effective deterrent of crime. This book, first published in 1981, examines the impact of these two important developments and casts new light on the way in which law enforcement evolved during the nineteenth century. This title will be of interest to students of history and criminology.
