Puller has long been considered the greatest of them all. His assignments and activities covered an extraordinary spectrum of warfare. Puller mastered small unit guerrilla warfare as a lieutenant in Haiti in the 1920s, and at the end of his career commanded a division in Korea. In between, he chased Sandino in Nicaragua and fought at Guadalcanal, Cape Gloucester, and Peleliu. With his bulldog face, barrel chest (which earned him the nickname Chesty), gruff voice, and common touch, Puller became--and has remained--the epitome of the Marine combat officer. At times Puller's actions have been called into question--at Peleliu, for instance, where, against a heavily fortified position, he lost more

than half of his regiment. And then there is the saga of his son, who followed in Chesty's footsteps as a Marine officer only to suffer horrible wounds in Vietnam (his book, *Fortunate Son*, won the Pulitzer Prize). Jon Hoffman has been given special access to Puller's personal papers as well as his personnel record. The result will unquestionably stand as the last word about Chesty Puller. In 1950, when he commissioned the first edition of *The Armed Forces Officer*, Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that "American military officers, of whatever service, should share common ground ethically and morally." In this new edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution. Although the technologies of war will always change, the insights of great leaders are timeless. And at no time are those lessons more important than in the heat of combat with lives on the line. The key is in preparation before a conflict. *Battle Leadership* helps you be prepared by teaching such essential skills as: How to handle different personalities under extreme stress. How to prepare your troops psychologically for combat. Insight into proven battlefield tactics (even if some of those tactics are only still relevant for their historical insights). How to instill confidence in those following you. While military tactics change, the wisdom of true leadership invariably holds. These lessons can even be applied to running a business, non-profit or government department, but they are

crucial to every military commander or aspiring officer. Find out why when lives are on the line, generations have turned to and continue to learn from Battle Leadership. Over 5,300 total pages

MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air-Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conduct depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include, but are not limited to: Plan, coordinate, and conduct amphibious-ground reconnaissance and surveillance to observe, identify, and report enemy activity, and collect other information of military significance. Conduct specialized surveying to include: underwater reconnaissance and/or demolitions, beach permeability and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment or personnel, assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas by necessary means to include: surface, subsurface and airborne operations. Conduct Initial

Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air-delivery, and re-supply. Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions. Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area. Conduct limited scale raids and ambushes. When the U.S. military invaded Iraq, it lacked a common understanding of the problems inherent in counterinsurgency campaigns. It had neither studied them, nor developed doctrine and tactics to deal

with them. It is fair to say that in 2003, most Army officers knew more about the U.S. Civil War than they did about counterinsurgency. The U.S. Army / Marine Corps Counterinsurgency Field Manual was written to fill that void. The result of unprecedented collaboration among top U.S. military experts, scholars, and practitioners in the field, the manual espouses an approach to combat that emphasizes constant adaptation and learning, the importance of decentralized decision-making, the need to understand local politics and customs, and the key role of intelligence in winning the support of the population. The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations: sometimes the more you protect your forces, the less secure you are; sometimes the more force you use, the less effective it is; sometimes doing nothing is the best reaction. An new introduction by Sarah Sewall, director of the Carr Center for Human Rights Policy at Harvard's Kennedy School of Government, places the manual in critical and historical perspective, explaining the significance and potential impact of this revolutionary challenge to conventional U.S. military doctrine. An attempt by our military to redefine itself in the aftermath of 9/11 and the new world of international terrorism, The U.S. Army / Marine Corps Counterinsurgency Field Manual will play a vital role in American military campaigns for years to come. The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation, a private-public partnership that supports the families of America's injured servicemen. "This text is designed to give the advanced Air Force ROTC student an over-all view of the military justice system, of how it operates in the Air Force, and of the general responsibilities of those in 'authority or command' who must administer the system. And, above all, it is hoped that the text will engender a feeling that military justice is directly, intimately, and essentially concerned with human conduct - rather than with arbitrary rules, legalistic distinctions, and inflexible classifications"--Pref. Planning (BSP) methodology to design a computer-
based information system for the Chinese Marine
Corps Field Maneuver Controlling And Evaluation
Operation (FIOP). It initially describes the current
manual system by identifying each organizational
group and the functions each perform. BSP is then
defined including its background, underlying
concepts and potential benefits. Finally, the BSP
methodology is applied to FIOP resulting in a list
of data classes, a process/data class matrix and an
information flow diagram. The conclusion is that a
computer-based system for FIOP is both feasible and
worthwhile. The recommendations are that a steering
committee of major FIOP users be formed to devise
obtainable and measurable objectives; that a BSP
expert be hired to act as a consultant/coordinator
for this project and finally, that the
implementation plan be reviewed annually to ensure
its continued cost effectiveness. (Author).

Supervisors at all levels need practical advice and
specific approaches on how to evaluate staff. This
manual provides background principles and proven
guidelines for describing positions and evaluating
individuals occupying them. Specific examples and
step-by-step approaches to job description, job

analysis, and performance appraisal should enable supervisors to write job enrichment specifications of an individual employee's job related strengths and weaknesses. Forms and checklists are also included. Marine Corps Warfighting Publication MCWP 6-10 (Formerly MCWP 6-11) Leading Marines 2 May 2016

The act of leading Marines is a sacred responsibility and a rewarding experience. This publication describes a leadership philosophy that speaks to who we are as Marines. It is about the relationship between the leader and the led. It is also about the bond between all Marines that is formed in the common forge of selfless service and shared hardships. It's in this forge where Marines are hardened like steel, and the undefinable spirit that forms the character of our Corps is born. It draws from shared experiences, hardships, and challenges in training and combat. Leading Marines is not meant to be read passively; as you read this publication, think about the material. You should reflect on, discuss, and apply the concepts presented in this publication. Furthermore, it is the responsibility of leaders at all levels to mentor and develop the next generation of Marine leaders. The authors evaluate wargaming tools as the U.S. Marine Corps invests its next-generation wargaming concept. The authors describe wargaming processes, facilities, and skill sets and recommend courses of action. For anyone interested in queer theory, the construction of masculinity, or sex between men outside of gay urban culture - and for anyone who has ever thrilled at the sight of a man in uniform. The manual describes the general strategy for the U.S. Marines but it is beneficial

for not only every Marine to read but concepts on leadership can be gathered to lead a business to a family. If you want to see what make Marines so effective this book is a good place to start. Sample text: NCIS REPORTING AND MILITARY JUSTICE

COMMAND INQUIRY: Suspected offenses may come to command attention in a variety of ways (e.g., shore patrol, civil law enforcement, or phone call, etc.) The commanding officer (CO) must conduct some form of inquiry into reported offenses that may be tried by court-martial per reference (a). The degree of inquiry will depend on the nature, validity, and seriousness of the complaint. See reference (b).

MANDATORY REFERRAL TO NCIS: Reference (c) mandates that certain incidents be referred to NCIS whether occurring on or off base and regardless of civilian investigation involvement. These incidents include: Actual, suspected, or alleged major criminal offenses (punishable under the Uniform Code of Military Justice (UCMJ) by more than 1 year of confinement); Non-combat deaths when the cause of death is not medically attributable to disease or natural causes; Fires or explosions of unknown origin affecting Department of the Navy (DON) property or property under DON control; Theft or loss of ordnance or controlled substances; Disappearance of a command member; All instances of suspected fraud against the government within DON (e.g., theft of government property, bribery, false claims for pay, etc.); actual or suspected acts of espionage, terrorism, sabotage, assassination, and

actual, suspected, or attempted defection of DON personnel; Internal security incidents, such as loss, compromise, or suspected compromise of classified information and national security cases; and Suspected sex-related offenses as defined under Articles 120 and 125 of the UCMJ. WHEN NCIS DECLINES TO INVESTIGATE: NCIS may, at its discretion, decline to conduct or continue any investigation, but shall expeditiously inform the effected command. A command may then request assistance from the local base security department or appropriate authority or pursue a command investigation pursuant to reference (a). Rifle Marksmanship, the official U.S. Marines reference publication 3-01A, is the complete guide to becoming proficient on the Corps' service rifles: the M16A4 and the M4 carbine. In addition to marksmanship techniques, the manual covers component parts, ammunition; cleaning, servicing and maintenance; operation and safety; firing positions; and engagement and low-light techniques. Illustrated throughout with clear and detailed photographs and drawings, Rifle Marksmanship will be of value to anyone interested in becoming a better rifle marksman, regardless of gun fired. Bickel, a military and business strategist in Washington, D.C., challenges military and strategic theories that treat particular bureaucratic structures, large corporations, and elites as the progenitors of doctrine. He looks at the role that mid-level combat officers play in creating military doctrine, and evaluates Marine civil and military pacification operations in Haiti, the Dominican Republic, and Nicaragua. He gives evidence of how field experience obtained before 1940 played a role in shaping the

Marine Corps' Small Wars Manual and elements of doctrine that exist today. c. Book News Inc.
