From Moon Goddesses to Virgins Feb 16 2022

For the preconquest Maya, sexuality was a part of ritual discourse and performance, and all sex acts were understood in terms of their power to create, maintain, and destroy society. As postconquest Maya adapted to life under colonial rule, they neither fully abandoned these views nor completely adopted the formulation of sexuality prescribed by Spanish Catholicism. Instead, they evolved hybridized notions of sexual desire, represented in the figure of the Virgin Mary as a sexual goddess, whose sex acts embodied both creative and destructive components. This highly innovative book decodes the process through which this colonization of Yucatan Maya sexual desire occurred. Pete Sigal frames the discussion around a series of texts, including the Books of Chilam Balam and the Ritual of the Bacabs, that were written by seventeenth and eighteenth century Maya nobles to elucidate the history, religion, and philosophy of the Yucatecan Maya communities. Drawing on the insights of philology, discourse analysis, and deconstruction, he analyzes the sexual fantasies, fears, and desires that are presented, often unintentionally, in the "margins" of these texts and shows how they illuminate issues of

colonialism, power, ritual, and gender.

Unmaking Waste Apr 20 2022 "In *Unmaking Waste*, Sarah Newman asks what happens when there are disagreements about what constitutes waste and what one should do with it, both at singular moments in time (for example, when ideas about waste collide in emerging colonial contexts) and across time (such as between those who left things behind in the past and the archaeologists who recover them). Newman examines ancient Mesoamerican understandings of waste, Euro-American perceptions of waste in New Spain, and early modern European ideals of civility and Christian understandings of good and bad, expressed metaphorically through cleanliness and filth. These differing perceptions, Newman argues, demands that we rethink centuries of assumptions imposed on other places, times, and peoples: so long as

"waste" remains a category misunderstood to be common-sensical and stable, archaeological methods will prove unequal to their task. Newman instead proposes "anamorphic archaeology," an approach that emphasizes the possibility that archaeological objects have multiple physical and conceptual lives"--

The Sea-Ringed World Dec 25 2019 Fifteen thousand years before Europeans stepped foot in the Americas, people had already spread from tip to tip and coast to coast. Like all humans, these Native Americans sought to understand their place in the universe, the nature of their relationship with the divine, and the origin of the world into which their ancestors had emerged. The answers lay in their sacred stories. Author María García Esperón, illustrator Amanda Mijangos, and translator David Bowles have gifted us a treasure. Their talents have woven this collection of stories from nations and cultures across our two continents—the Sea-Ringed World, as the Aztecs called it—from the edge of Argentina all the way up to Alaska. The Em Querido list seeks to introduce the finest books in translation from around the world to an American audience. We feel lucky to be bringing you this book on our inaugural list, which we hope will be a true window and mirror

The world's collective archaeological heritage is threatened by war, development, poverty, climate change, and ignorance. To protect our collective past, archaeologists must involve the general public through interpersonal experiences that develop an interest in the field at a young age and foster that interest throughout a person's life. Contributors to this volume share effective approaches for engaging and educating learners of all ages about archaeology and how one can encourage them to become stewards of the past. They offer applied examples that are not bound to specific geographies or cultures, but rather, are approaches that can be implemented almost anywhere.
