What Could Possibly Go Wrong... is the sixth book in Jeremy Clarkson's bestselling The World According to Clarkson series. No one writes about cars like Jeremy Clarkson. While most correspondents are too buys diving straight into BHP, MPG and MPH, Jeremy appreciates that there are more important things to life. Don't worry, we'll get to the cars. Eventually. But first we should consider: · The case for invading France · The overwhelming appeal of a nice sit-down · The inconvenience of gin and tonic · Why clothes are no better than ice cream · Spot-welding with the Duchess of Kent · And why Denmark is the best place in the world Armed only with conviction, curiosity, enthusiasm and a stout pair of trousers, Jeremy hurtles around the world - along motorway, autoroute, freeway and autobahn - in search of answers to life's puzzles and ponderings without forethought or fear for his own safety. What, you have to ask, could possibly go wrong... Praise for Clarkson: 'Brilliant... laugh-out-loud' Daily Telegraph 'Outrageously funny... will have you in stitches' Time Out 'Very funny . . . I cracked up laughing on the tube' Evening Standard Jeremy Clarkson began his career on the Rotherham Advertiser. Since then he has written for the Sun, theSunday Times, the Rochdale Observer, the Wolverhampton Express & Star, all of the Associated Kent Newspapers and Lincolnshire Life. Today he is the tallest person working in British television. From the first motor cars and classic cars to today's supercars and Formula 1, this is the ultimate book about the history of the car. Packed with stunning photography, and featuring more than 2,000 cars, Car shows you how cars have evolved around the world over the the last 130 years, and their impact on society as objects of curiosity, symbols of status and luxury, and items of necessity. Extensive catalogues showcase the most important marques and models, organized in categories such as sports cars, convertibles, and city compacts. The book also features virtual photographic tours of some of the most iconic cars from each era such as the Rolls Royce Silver Ghost, Ford Model T, Lamborghini Countach, and Ferrari F40, while cross-sections of key engines explore the driving force behind them. Lavishly illustrated feature spreads detail the stories of the men, machines, and magic that helped create the car world's most famous marques and made brands such as Porsche, Mercedes-Benz, Aston Martin, and Cadillac household names. If you love cars, then you'll love Car. It is simply a must-have title for all car enthusiasts. Four-wheel-drive was authorised in rallying from 1979, but for a time no serious car-manufacturer even tried to harness it to their cars. Soon, though, it was Audi who produced the world's first rally-winning four-wheel-drive car the Quattro. However it was Peugeot who designed, developed, campaigned and won with the first truly sophisticated four-wheel-drive Group B Car the 205 Turbo 16. It was the first truly great, purpose-designed, Group B car. Determined to win at almost any cost, Peugeot hired Jean Todt (who would later transform the fortunes of the Ferrari F1 organisation) in 1981, and set him an ambitious target. His dream car had to be running in 1983, homologated in 1984, and capable of winning World Championships by 1985. Nothing, no excuses and no lack of application, was to get in the way of that. Apart from being obliged to use the silhouette of the still-secret new 205 road car, Todt was able ask for anything. Getting approval for whatever he needed and fast-tracking the engineering of the four-wheel-drive rally was not an issue in reaching one simple objective victory. This is precisely what was achieved. This book tells the detailed story, and lists all the cars, the influences, and the personalities behind a magnificent success story. No sooner had the new turbocharged, transverse-mid-engined car started competing than it was ready to win, yet its dominant career was cut short at the end of 1986 by an abrupt change in rallying regulations. Not only is the engineering story laid out in great detail, but the interaction between company personalities, super-star drivers (including Ari Vatanen) and the highly-charged atmosphere of motorsport at this time is all analysed. Because Group B was cancelled even before the 205 T16 had reached maturity, it went on to have a successful career in desert Raid rallies, and at Pike Peak in the USA, all of which is described in this amazingly authoritative study.Packed with illustrations, technical details, facts, figures and successes of this innovative car this book is a must for any rally fan. A nostalgic A-Z of the most special and well-remembered 60s, 70s and 80s cars, with stylish illustrations accompanied by warm, humorous personal memories. Designer and illustrator Roy McCarthy explores the cars that made a big impression on him in his younger days, from the sludge-coloured, disappointing Austin Allegro his father brought home in 1975 to the Ford Zephyr he coveted from afar on the way to school. The evocative, colourful illustrations form a visual feast of late 20th-century driving, featuring all the cars drivers of a certain age will remember: the Hillman Imp, the Triumph Dolomite, the Opel Kadett, the Renault 5, and even the lowly Yugo 45 – a whole alphabet's worth, in fact! The perfect gift for anyone who's ever owned, been driven around in or hankered after one of these motoring icons. Jeremy Clarkson gets under the bonnet in Clarkson on Cars; a collection of his motoring journalism. Jeremy Clarkson has been driving cars, writing about them and occasionally voicing his opinions on the BBC's Top Gear for twenty years. No one in the business is taller. In this collection of classic Clarkson, stretching back to the mid-1980s, he's pulled together the car columns and stories with which he made his name. As coal mines closed and house prices exploded to a soundtrack of men in make-up playing synthesizers, Jeremy was already waxing lyrical on topics as useful and diverse as: • The perils of bicycle ownership • Why Australians - not Brits - need bull bars • Why soon only geriatrics will be driving BMWs • The difficulty of deciding on the best car for your wedding • Why Jesus's dad would have owned a Nissan Bluebird • And why it is that bus lanes cause traffic jams Irrelevant, damn funny and offensive to almost everyone, this is writing with its foot to the floor, the brake lines cut and the speed limit smashed to smithereens. Sit back and enjoy the ride. Speed Queens is a history of women in motorsport, from the very beginning in 1897 to the modern era. Tracing the different ways that women have found into motor racing and rallying, it covers over a century of stories across the world. Each chapter takes a particular event as an introduction to a racer and her contemporaries, taking a different theme each time and moving forward through history. Circuit racing and rallying are both covered. Much more than a collection of profiles and lists of achievements, it explores ideas including sportswomen as performers in the early 20th century, women, death and risk and how the expansion of small car production in the 1960s benefitted female drivers. Some of the best-known female competitors such as Michele Mouton (rallying) and Lella Lombardi (Formula 1) make appearances, but Speed Queens is not just concerned with big names and historic "firsts". For every woman to be the first to do something on wheels, there were usually several others vying for that honor. In this book, they are given back their place in the story and their relationships to one another examined.
