Inclusive Guide Provides Practical Applications for Workplace Education Theory from Diverse Perspectives The Wiley Handbook of Global Workplace Learning explores the field of workplace education using contributions from both experts and emerging scholars in industry and academia. Unlike many previously published titles on the subject, the Handbook focuses on offering readers a truly global overview of workplace learning at a price point that makes it accessible for independent researchers and Human Resources professionals. Designed to strike a balance between theory and practice, the Handbook provides a wealth of information on foundational topics, theoretical frameworks, current and emerging trends, technological updates, implementation strategies, and research methodologies. Chapters covering recent research illustrate the importance of workplace learning topics ranging from meditation to change management, while others give pragmatic and replicable applications for the design, promotion, and implementation of impactful learning opportunities for employees at any company, regardless of industry. A sampling of topics addressed includes: “Using an Experiential Learning Model to Design an Assessment Framework for Workplace Learning” “Measuring Innovative Thinking and Acting Skills as Workplace-Related Professional Competence” Multiple chapters specifically addressing international business, such as “Competency in Globalization and Intercultural Communication”, “Global Strategic Planning” and “Global Talent Management” Research and recommendations on bridging generational and cultural divides as well as addressing employee learning disabilities With its impressive breadth of coverage and focus on real-world problem solving, this volume serves as a comprehensive tool for examining and improving practices in global workplace learning. It will prove to be a valuable resource for students and recent graduates entering the workforce and for those working in Human Resources and related fields. will update Unionization of teachers has led to fundamental changes in the management of education and in relations between teachers and school districts. Understanding the Teacher Union Contract explores the implications of this collective-bargaining revolution in education. Through detailed examination Lieberman shows how the kinds of provisions typically found in teacher union contracts affect the educational workplace and education reform, and how they might be revised to the benefit of students, parents, and the public. Lieberman begins with the respective roles of school district management and teacher unions. Unlike managers in the private sector, school district officials are part of a government agency that is legally responsible for operating public schools in the public interest. They must balance the interests of employees with the needs of students, taxpayers, and parents, as well as with district educational goals. Teacher unions' primary objectives are to enhance employee welfare and to promote the union as an effective organization. Unions must balance the differing needs of various groups within their membership -- for example, by resolving tensions between older teachers who want improved retirement benefits and younger teachers who might prefer more rapid salary increases. Lieberman shows how competing union and management goals play out in collective bargaining and are embodied in teacher union contracts. He argues that by developing an understanding of teacher unions, their role, and their needs, district officials and school board members can bargain more effectively and develop a productive ongoing relationship with unions. This highly readable book will be of interest not only to school administrators and board members but also to teacher representatives, parents, taxpayers, and members of the media who report on education. Selecting a career is never easy in life. There are so many different things to consider which include your interests, abilities, and talents. You receive advice from everyone on which career is best for you. However, you are the only one who will be working during your working life. What are the best resources out there to help me find a career? Dawn Lucan is an educator with eighteen years of experience will help you through this process. The purpose of this handbook is to help educators at all levels to recognize potential legal hazards in educational settings and to learn how to negotiate the slick roads safely. The focus is on school and classroom issues, not district-level topics. Legal basics are discussed in the context of both informal anecdotes about actual situations and formal cases. Chapter 1 describes how laws for educators are made. The laws that affect schools and classrooms come from many sources: federal, state, and local. Chapters 2 through 10 focus on basic rights and responsibilities of educators. Topics include speech, conduct, and privacy issues; professional liability; classroom management; censorship, copyright, and the curriculum; supervision and discipline of students; property rights, confidentiality, and reporting requirements; chronic illness and medical emergencies; and sexual misconduct and sexual harassment. Chapter 11 discusses types of legal actions that educators may face and how to defend themselves. Legal citations follow each chapter. (MLF) "This guide is for business owners, managers, and HR professionals who need to create (or update) a legal and plain-English employee handbook. It provides legal information, practical suggestions, and best practices on wages, hours, and tip pools; at-will employment; time off; discrimination and harassment; complaints and investigations; health and safety; drugs and alcohol; workplace privacy; and email and social media"-- Introduction I chose to write this book because of the pain I've seen in the heart of parents who have placed their child/children in child care centers that did not have the best interest of children at heart. These parents hurt deeply because they placed and even paid money on a weekly basis to have their child in a program that was not respecting the child. I like to call these programs child farms because their interest is not in helping to develop, grow, and nurture children but to make money off children. One mother could barely speak as she told me her story. She had asked her father to pick her son up from his family child care home and take him to the doctor. When the grandpa arrived, he knocked on the door, but nobody answered. He could hear babies inside the house crying, but it did not appear that anyone was inside caring for the children. Grandpa sat on the porch and waited for someone to come, all the while he could hear the babies inside crying. A while later the caregiver pulled up in the driveway with Wal-Mart bags in her hands. When grandpa told her whom he was there to pick up, she let him have the baby and did not even check his identification. He could have been anyone picking up that child. The mother set up a watch with the county police and the Department of Social Services for the next morning. Parents brought children into the home and left. About thirty minutes after the last child was dropped off, the caregiver came out of the house, locked the door, and got into her car. As she pulled out of her driveway, she was arrested. Parents were contacted to pick up their children. The caregiver was putting the children in their cribs and then leaving the house to go shopping and run errands. Another parent had her six-month infant get a broken arm. Another parent had her four-month infant die—death certificate said SIDS, but the child was dead for over two hours before anyone knew. These are scary stories, and there are many more. We've all seen these in the news, but I've personally sat face-to-face with some parents who have suffered through this devastating situation. Their common statement was “How does a parent know a good center from a child farm?” How does a parent know? And so it goes, I wrote the book. I hope this book will be useful to you as you begin to research child care programs for your child. Follow your heart. Look deep if it feels good. Leave and do not turn back if something makes you feel bad. Your feelings will be your best guide. As you tour programs, write notes in the note sections and try to complete the ratings as you feel them while you are touring a program. After touring several programs, the program-rating pages will help you to remember the qualities you liked best about each program. Remember, high-quality child care and education programs are difficult to get into. You will probably be put on a waiting list, so it is important to start your search for child care early. The earlier the better! I used to tell parents, “Call me when the stick turns blue.” There are many books and articles written about management, supervisors, and employees in the workforce, which is great. However, there is not much written about high school graduates transitioning into the workplace. Writing resumes, applying for the position, getting that interview, starting a new job, not knowing what's ahead including working with the different personalities in the workforce can be intimidating to say the least. As the new “kid” on the block, they may find themselves at the mercy of their coworkers, supervisors, and management. Not realizing those high school days are long gone and they are now in the real world can cause some young adults to behave in a manner which may be detrimental to their future career path. Global content in English doesn't get noticed. Localizing Employee Communications is a practical guide to ending conventional communication practices that stand in the way of effectively reaching employees around the world. Adapting for language and culture is critical to reach customers, and the same is true for busy employees. This book shows you how to navigate some of the biggest challenges in cross-border employee communications by partnering with local business units. This book argues that the ideal organization translates almost nothing. Instead, global headquarters provides only back-end support to local business units, who create and deploy employee content that's appropriate for their culture and local business realities. Localizing Employee Communications draws on the insight of nearly 30 experts from a variety of communications disciplines, including Deborah S. Bosley, Gerry McGovern, Alan Oram, Jonathan Phillips, Alan J. Porter, Ann Rockley, Carmen Simon, and Val Swisher. Inside the Book Part I. The Landscape In Country Part II.
