"Paraeducators--also known as teacher aides, teaching assistants, and instructional assistants--are playing an increasingly important role in schools. Most teachers, however, have never been trained to work effectively with other adults in their classrooms. In *A Teacher's Guide to Working with Paraeducators and Other Classroom Aides*, Jill Morgan and Betty Y. Ashbaker provide straightforward advice and focused activities that can help forge productive working relationships between teachers and paraeducators. The authors cover key topics related to working with and supervising paraeducators, including how to assign responsibilities, communicate, monitor quality of work, provide on-the-job training, and create a feedback loop. Tips from practicing teachers explain ways to find the time to effectively supervise paraeducators. The authors discuss how the supervisory techniques involved in working with paraeducators are similar to -- and different from -- those that teachers use with students. The authors give concise suggestions for translating the information to your classroom; fill-in-the-blank forms outline self-directed steps for improving in

select areas. As both a practical workbook and a thoughtful reflection of the authors' experiences in working with teachers and paraeducators, this book is an indispensable resource for any teacher who wants to create a successful instructional team" -- Back cover.

Quarter 1: Ocean The oceans may well be Earth's final frontier. These dark and sometimes mysterious waters cover 71 percent of the surface area of the globe and have yet to be fully explored. Under the waves, a watery world of frail splendor, foreboding creatures, vast mountains, and sights beyond imagination awaits. Now this powerful resource has been developed for three educational levels! Learning about the oceans and their hidden worlds can be exciting and rewarding — the abundance and diversity of life, the wealth of resources, the latest discoveries, and the simple mysteries that have intrigued explorers and scientists for centuries. A better understanding of our oceans ensures careful stewardship of their grandeur and beauty for future generations, and leads to a deeper respect for the delicate balance of life on that God created on planet Earth.

Quarter 2: Astronomy The universe is an amazing declaration of the glory and power of God!

Beautiful and breathtaking in its scale, the vast expanse of the universe is one that we struggle to study, understand, or even comprehend in terms of its purpose and size. Now take an incredible look at the mysteries and marvels of space in *The New Astronomy Book*! If you watch the stars at night, you will see how they change. This speaks to the enormity and intricacy of design in the universe. While the stars appear timeless, they instead reflect an all-powerful Creator who speaks of them in the Bible. Many ancient pagan cultures taught that the changing stars caused the seasons to change, but unlike these pagan teachings, the Book of Job gives credit to God for both changing stars and seasons (Job 38:31-33). When Job looked at Orion, he saw about what we see today, even though he may have lived as much as 4,000 years ago. Quarter 3: Weather From the practical to the pretty amazing, this book gives essential details into understanding what weather is, how it works, and how other forces that impact on it. Learn why storm chasers and hurricane hunters do what they do and how they are helping to solve storm connected mysteries. Discover what makes winter storms both beautiful and deadly, as well as what is

behind weather phenomena like St. Elmo's Fire. Find important information on climate history and answers to the modern questions of supposed climate change. Get safety tips for preventing dangerous weather related injuries like those from lightning strikes, uncover why thunderstorms form, as well as what we know about the mechanics of a tornado and other extreme weather examples like flash floods, hurricanes and more. A fresh and compelling look at wild and awesome examples of weather in this revised and updated book in the Wonders of Creation series!

Quarter 4: Mineral Minerals are a gift of God's grace. Every day we touch them, seeing the diamond in an engagement ring or a copper chain with a cross on it. Minerals are touched on in video games like Minecraft® and Mineral Valley™, making them more a part of our daily experience. Salt, one vital mineral, helps maintain the fluid in our blood cells and is used to transmit information in our nerves and muscles. Also, Jesus told his followers that we are the salt of the earth (Matthew 5:13), something thus needed for health and flavor. Here is a God-honoring book that reveals the first mention of minerals in the Bible, symbolic usages, their current values in culture and

society, and their mention in heaven. A new course developed by highly experienced Mathematics educators and textbook writers to cover the MoES Secondary Mathematics syllabus and to prepare students for UCE O-level Mathematics examinations. The course consists of four Students' Books, each with an accompanying Teacher's Guide.
