Youth Studies and Generations Feb 27 2021 There is currently much discourse about generations in the public sphere. A sequence of letters conflates generations and age cohorts born in the last few decades (generation “ X ” , “ Y ” or “ Z ” ) as well as multiple categories are used to describe today ’ s young people as a generation that is distinct from its predecessors. Despite the popularity of generational labels in media, politics, or even academia, the use of generation as a conceptual tool in youth studies has been controversial. This Special Issue allows readers to better understand the key issues regarding the use of generation as a theoretical concept and/or as a social category in the field of youth studies, shedding light on the controversies, trends, and cautions that go through it.

Children and Youth Speak for Themselves Mar 11 2022 The volume is a collection of articles from scholars who pay particular attention to children and/or adolescents' voices, interpretations, perspectives, and experiences within specific social and cultural contexts. Contributions include research stemming from a broad spectrum of methodological and theoretical orientations.

"In Search of ..." Nov 19 2022 This collection of fifteen methodological texts by a group of thirty international youth and social researchers is a polyphony of scholarly voices advancing the field of qualitative inquiry in youth studies. The book homes in on ways of adapting, remixing and reconsidering qualitative methods in order to better serve youth researchers in the twenty-first century. The texts included in this collection offer honest and open accounts of searching for, assembling, testing, and rejecting creative, well-known, or unconventional techniques from various methodical homes. As is emphasized in the title, this is not so much an overview as an inquiry into conducting youth research in an environment that is constantly transforming. Researchers are always seeking out the best ways to capture and (co)-produce meaning that can be used for the greater good. This book offers fresh interpretations of, and feedback on, inventive combinations of methods, research questions and theoretical frameworks. It will be of interest to all who work in youth studies and sociology, and particularly useful to postgraduate students, junior scholars, and established researchers seeking to branch out into new terrain.

Combating Violence and Delinquency Jun 21 2020

A Companion to Sport Nov 14 2019 A Companion to Sport brings together writing by leading sports theorists and social and cultural thinkers, to explore sport as a central element of contemporary culture. Positions sport as a crucial subject for critical analysis, as one of the most significant forms of popular culture Includes both

well-known social and cultural theorists whose work lends itself to an interrogation of sport, and leading theorists of sport itself Offers a comprehensive examination of sport as a social and cultural practice and institution Explores sport in relation to modernity, postcolonial theory, gender, violence, race, disability and politics

The Methodological Dilemma Oct 06 2021 This thought-provoking book challenges the way research is planned and undertaken and equips researchers with a variety of creative and imaginative solutions to the dilemmas of method and representation that plague qualitative research. Fascinating and inspiring reading for any researcher in the Social Sciences this comprehensive collection encourages the reader to imagine the world in evermore complex and interesting ways and discover new routes to understanding. Some of the most influential figures in educational research consider questions such as: How does a socio-political context change the course of our research? What counts as a 'truthful account' in qualitative research? How do the voices of theory and the voices of 'research subjects' struggle to be heard in our research narratives? How can qualitative researchers ethically navigate the difficult terrain of research relationships? How is the material body rendered in qualitative research? Each chapter reveals a range of troubling dilemmas related to the critical aspects of research methodology in the Social Sciences and uses an illustrative case to elucidate the issues encountered by

the researcher. Each writer brings a fierce philosophical spirit to her work, showing how methods or techniques of data-gathering grow from the theory and analysis of how research proceeds. A range of topics are addressed in a cross-disciplinary approach which will appeal to all scholars of qualitative research, undergraduate students in education programs and graduate students in a range of disciplines

Disclosing Childhoods Jan 29 2021 Disclosing Childhoods offers a critical account of knowledge production in childhood studies. The book argues for the need to be reflexive about the knowledge practices of the field and to scrutinize the role of researchers in disclosing certain childhoods rather than others. A relational lens is used to critique the ongoing fixation of childhood studies with the unitary child-agent and to re-introduce the question of ontology in knowledge production. The author provides a critical account of childhood studies ' trajectory, as well as exploring the key concepts of voice, agency and participation, illustrating the potential of a reflexive stance towards knowledge production. Drawing on poststructuralist and posthumanist thinking, each of these concepts is critiqued for its conceptual limits while productive avenues are offered to reconfigure their utility. Spyrou also addresses the ethics and politics of knowledge production and considers key emerging insights which can contribute towards the development of a more reflexive and critical childhood studies. Students and scholars across a range of disciplines, including

childhood studies, anthropology, sociology and geography, will find this book of interest, as well as those interested in qualitative research methodology and social theory.

Fast-Food Kids Oct 26 2020 2018 Morris Rosenberg Award, DC Sociological Society In recent years, questions such as “ what are kids eating? ” and “ who ’ s feeding our kids? ” have sparked a torrent of public and policy debates as we increasingly focus our attention on the issue of childhood obesity. The Centers for Disease Control and Prevention estimates that while 1 in 3 American children are either overweight or obese, that number is higher for children living in concentrated poverty. Enduring inequalities in communities, schools, and homes affect young people ’ s access to different types of food, with real consequences in life choices and health outcomes. Fast-Food Kids sheds light on the social contexts in which kids eat, and the broader backdrop of social change in American life, demonstrating why attention to food ’ s social meaning is important to effective public health policy, particularly actions that focus on behavioral change and school food reforms. Through in-depth interviews and observation with high school and college students, Amy L. Best provides rich narratives of the everyday life of youth, highlighting young people ’ s voices and perspectives and the places where they eat. The book provides a thorough account of the role that food plays in the lives of today ’ s youth, teasing out the many contradictions of food as a cultural object—fast food portrayed as a necessity for the

poor and yet, reviled by upper-middle class parents; fast food restaurants as one of the few spaces that kids can claim and effectively ‘ take over ’ for several hours each day; food corporations spending millions each year to market their food to kids and to lobby Congress against regulations; schools struggling to deliver healthy food young people will actually eat, and the difficulty of arranging family dinners, which are known to promote family cohesion and stability. A conceptually-driven, ethnographic account of youth and the places where they eat, *Fast-Food Kids* examines the complex relationship between youth identity and food consumption, offering answers to those straightforward questions that require crucial and comprehensive solutions.

Researching Youth May 13 2022 Written in a clear and accessible style, this book presents a broad ranging enquiry into various methodological issues associated with contemporary youth research. Chapters cover a variety of topical areas, including youth transitions, youth in care, drugs, consumption and music. Featuring studies by new and established youth researchers, this book will be an invaluable resource for undergraduate and postgraduate students, and also those carrying out more advanced research, in the fields of sociology, social policy, health studies, cultural and media studies.

Equity and Justice in Developmental Science: Theoretical and Methodological Issues Aug 16 2022 The first of two volumes in the *Advances in Child Development and Behavior* series, *Equity and Justice in Developmental Science: Theoretical and Methodological*

Issues focuses on conceptual issues, definitions, and critical concepts relevant to equity and justice for the developmental sciences. This volume covers critical methodological issues that serve to either challenge or advance our understanding of, and ability to promote, equity and justice in the developmental sciences. Both volumes bring together a growing body of developmental scholarship that addresses how issues relevant to equity and justice (or their opposites) affect development and developmental outcomes, as well as scholarship focused on mitigating the developmental consequences of inequity, inequality, and injustice for young people, families, and communities and ensuring that all young people have opportunities to develop and thrive. Contains contributions from leading authorities in the field of child development and behavior Presents a coherent picture of the importance of the development of children ' s participation in ongoing activity Provides a major step forward in highlighting patterns and variability in the normative development of the everyday lives of children, expanding beyond the usual research populations that have extensive Western schooling in common Focuses on conceptual issues, definitions, and critical concepts relevant to equity and justice for the developmental sciences

Trust and Technology in a Ubiquitous Modern Environment: Theoretical and Methodological Perspectives Nov 07 2021 "This book brings together scholars with significantly different backgrounds who share interests in the interplay between trust and

technology, presenting novel theoretical perspectives on the topics of trust and technology, as well as some empirical investigations into the trust-building, trust-repairing, and trust-destroying practices in the context of technology"--Provided by publisher.

Drug Abuse Among Minority Youth Sep 17 2022

Prayer, Pop and Politics Jul 23 2020 What is it like to be young and religious in migration society? This volume presents research at the intersection of religion, age and race. The chapters' foci range from methodological challenges to conceptual work and empirical case studies. The authors present research on various religious traditions including contributions on young Alevis, Hindus, Buddhists and Muslims, and apply an array of theoretical angles among them feminist, post- and de-colonial perspectives. Furthermore, the volume engages in the debate over novel conceptual frameworks attuned to investigate contemporary manifestations of youth religiosity, for example in digital spaces. The methodological chapters advocate for reflexivity in the context of empirical research on religion in migration society and promote a self-evaluative assessment of researchers' positionalities.

Transforming Young Adult Services Aug 24 2020 Now showcasing an even more rigorous debate about the theory and practice of YA librarianship than its first edition, this "provocative presentation of diverse viewpoints by leaders in the field" (Catholic Library World) has been updated and expanded to incorporate recent advances in critical youth studies.

Doing Children's Geographies Apr 12 2022 Doing Children's Geographies provides a useful resource for all those embarking on research with young people. Drawing on reflections from original cutting-edge research undertaken across three continents, the book focuses on the challenges researchers face when working with children, youth and their families. The book is divided into three sections. The first section provides alternatives to some of the difficulties researchers face and highlights methodological innovations as geographers uncover new and exciting ways of working. The second part specifically addresses the issues surrounding children and youth's participation providing critiques of current practice and offering alternatives for increasing young people's involvement in research design. Finally, the book broadens to a consideration of wider areas of concern for those working with children and youth. This section discusses the nature of childhood in relation to research, the place of emotions in research with young people and the process of undertaking applied research. This book was previously published as a special issue of Children's Geographies

The Well-Being of America's Children Dec 28 2020 In 1998, the Foundation for Child Development (FCD) provided Kenneth Land a grant to explore the feasibility of producing the first national composite index of the status of American children that would chart changes in their well-being over time. Important questions needed to be answered: was it possible to trace trends in child

and youth well-being over several decades? Could such an index provide a way of determining whether the United States was making progress in improving its children's lives? The Index of Child and Youth Well-Being (CWI) was born from these questions. Viewing the CWI trends from 1975 to present, there is evidence that the well-being of American children lags behind other Western nations. As conditions change, it is clear that the index is an evolving and rich enterprise. This volume attests to that evolution, and what the CWI promises for understanding the progress – or lack of progress – in enhancing the life prospects of all American children.

Street Kids Nov 26 2020 Street outreach workers comb public places such as parks, vacant lots, and abandoned waterfronts to search for young people who are living out in public spaces, if not always in the public eye. Street Kids opens a window to the largely hidden world of street youth, drawing on their detailed and compelling narratives to give new insight into the experiences of youth homelessness and youth outreach. Kristina Gibson argues that the enforcement of quality of life ordinances in New York City has spurred hyper-mobility amongst the city's street youth population and has serious implications for social work with homeless youth. Youth in motion have become socially invisible and marginalized from public spaces where social workers traditionally contact them, jeopardizing their access to the already limited opportunities to escape street life. The culmination of a multi-year ethnographic investigation into the lives of street outreach workers

and ‘ their kids ’ on the streets of New York City, Street Kids illustrates the critical role that public space regulations and policing play in shaping the experience of youth homelessness and the effectiveness of street outreach.

Advanced Methodological Issues in Culturally Competent Evaluation for Substance Abuse Prevention  
Aug 04 2021 Provides a clearly defined framework for the study of substance abuse prevention program evaluation in diverse, culturally defined settings, regardless of the ethnic/racial populations involved. Topics include: acculturation, ethnic identification and the evaluation process; history and philosophy of a science in a global perspective; psychometrics and culture; the role of ethics in evaluation; evaluating the success of community-based prevention efforts; the cultural context of epidemiologic research; culturally specific approaches; and communication and community participation in evaluation processes.

Youth ‘ At the Margins Mar 31 2021 This volume comes at a critical juncture, as global commitments transition from the Millennium Development Goals to Sustainable Development Goals and the wider post-2015 development agenda is being discussed and debated. In these discussions, children and youth have been recognized as one of the nine major groups of civil society whose participation in decision making is essential for achieving sustainable development. There is also a concomitant need for action – innovative, evidence-based approaches to addressing entrenched

global challenges or ‘ wicked problems ’ and engaging youth in those efforts. Within academic discourse, the perspectives and active participation of youth in research has long been debated. It is widely believed that their participation can result in better policy responses and contribute to the development of more relevant and effective interventions and programs to address their needs. However, the engagement of youth in research processes is not without critique; issues such as how to move from tokenism towards authentic participation and empowerment have been critically discussed, and many question if youth can or should even be expected to make change happen. Youth ‘ At the Margins ’ : Critical Perspectives and Experiences of Engaging Youth in Research Worldwide brings together a range of critical and empirical contributions from emerging scholars and seasoned academics alike. Each contribution provides a unique perspective on the potentialities and challenges associated with youth engaged research. The chapters presented in this volume strive to critically interrogate and debate important foundational issues to consider when engaging youth in the research process, such as epistemological and methodological considerations. Important insights into the ethical, pedagogical and practical aspects one must contend with can be gleaned from the selection of chapters here; some of which are primarily theoretical and descriptive, whilst others present empirical data with case examples from around the world. This volume is devoted to showcasing high quality contributions to

the scholarly literature on youth engaged research in order to spur further critical debate on the various epistemological, methodological and ethical issues associated with engaging youth in research processes and in addressing intractable global issues. The audience for this volume includes students, researchers and academics within a broad range of fields who are interested in understanding the range of approaches being used worldwide to include youth in research endeavors on issues of global importance including poverty, social exclusion, structural violence, un- and under-employment, education and health.

Involving Methods in Youth Research Feb 10 2022

This edited volume develops critical discussions of prominent methodological approaches in participatory youth research. Chapters give special attention to power issues and dilemmas concerning young people ' s and researchers ' involvement in research processes. The collection brings together perspectives of authors from throughout Nordic countries, all with comprehensive experience of qualitative research methods involving young people.

Youth in Perspective Jun 14 2022

Drug Abuse Among Minority Youth Oct 18 2022

Cultural Considerations in Latino American Mental Health Jan 17 2020 In America's increasingly diverse society, it is imperative that mental health providers prioritize the development of their cultural competence to assure that they are equipped to meet the needs of their clients. Cultural Considerations in Latino American

Mental Health offers a broad array of perspectives from clinicians and researchers actively working with racially and ethnically diverse populations. This book addresses psychosocial cultural issues that impact the mental health of the growing Latino American population. Topics discussed include relevant socio-demographic variables for Latinos and the implications of the steadily increasing Latino population in the United States; cultural values, acculturation, and acculturative stress in the lives of Latino adolescents; culturally responsive intervention of depression in Latino adolescents; depression across the lifespan; and cultural factors in the development of substance abuse issues in the Latino adolescent population. This book is a must-read for mental health clinicians, students, community workers, school counselors, and nurses who work with diverse populations.

Fast Cars, Cool Rides Jan 09 2022 Drawing on interviews with over 100 young men and women, and five years of research, the author explores the fast-paced world of kids and their cars. She reveals a world where cars have incredible significance for kids, as a means of transportation and thereby freedom to come and go, as status symbols and as a means to express their identities.

Researching Young People's Lives Jul 15 2022 Researching Young People's Lives provides an overview of some of the key methodological challenges facing youth researchers and an introduction to the broad repertoire of methods used in youth-orientated research.

Throughout the book, the emphasis is on research in practice, and examples are drawn from recent youth research projects from a wide range of disciplines and substantive areas, and from a range of both UK and non-UK contexts.

Doing Children ' s GeographiesDec 20 2022 Doing Children ' s Geographies provides a useful resource for all those embarking on research with young people. Drawing on reflections from original cutting-edge research undertaken across three continents, the book focuses on the challenges researchers face when working with children, youth and their families. The book is divided into three sections. The first section provides alternatives to some of the difficulties researchers face and highlights methodological innovations as geographers uncover new and exciting ways of working. The second part specifically addresses the issues surrounding children and youth ' s participation providing critiques of current practice and offering alternatives for increasing young people ' s involvement in research design. Finally, the book broadens to a consideration of wider areas of concern for those working with children and youth. This section discusses the nature of childhood in relation to research, the place of emotions in research with young people and the process of undertaking applied research. This book was previously published as a special issue of Children's Geographies

Researching Youth Sep 05 2021 Written in a clear and accessible style, this book presents a broad ranging enquiry into various methodological issues associated

with contemporary youth research. Chapters cover a variety of topical areas, including youth transitions, youth in care, drugs, consumption and music. Featuring studies by new and established youth researchers, this book will be an invaluable resource for undergraduate and postgraduate students, and also those carrying out more advanced research, in the fields of sociology, social policy, health studies, cultural and media studies.

Researching Children and Youth Jan 21 2023 This volume seeks to directly address the problems and pitfalls that often accompany researching children and youth in today ' s society. This volume addresses participatory and feminist ethnographic approaches, digital mining, children ' s agency, and navigating IRBs. Themes of space, location, and identity run throughout this volume.

Handbook of Children and Youth Studies Apr 19 2020  
Behavioral Approaches to Chronic Disease in Adolescence May 21 2020 Adolescence is typically fraught with problems, even under optimal conditions. And when chronic illness is added to the picture, medical and related social issues can complicate, and even disrupt, the course of development. The first text geared toward the integrated care setting, Behavioral Approaches to Chronic Disease in Adolescence offers clinicians an evidence-based guide to helping their young clients manage their chronic conditions and treating the psychosocial effects—from school problems and stigma to noncompliance and depression—that frequently follow diagnosis. Expert contributors present up-to-date

information on epidemiology, symptoms, comorbid psychosocial problems, and treatment options for a variety of common illnesses, arranged to foster effective interventions for adolescents and efficient collaboration with other care providers in the team. Coverage is comprehensive, authoritative, and accessible, ensuring best practice while respecting each client's individuality: Empirically-based treatment guidelines for illnesses commonly found in youth, including Type 1 and 2 diabetes, asthma, cancer, obesity, and chronic pain. Overview of the physiology of adolescence, particularly as it may be affected by medical conditions, and of adolescent brain development. Latest findings on the role of families in teens' adjustment to illness and treatment. Cultural considerations affecting ethnically diverse clients and their families. Detailed discussions of ethical issues relevant to treating chronically ill young people, and of controversies involving pharmacotherapy with this population. Chapters contain useful handouts for clinicians and clients. Taking Care of the Practitioner" chapter with helpful strategies for avoiding burnout. Its emphasis on specific practical information makes Behavioral Approaches to Chronic Disease in Adolescence a "go-to" reference for health psychologists, child and adolescent mental health practitioners, pediatricians and family practitioners, and clinical social workers.

On theoretical and methodological problems of youth research Jul 03 2021

White Kids Dec 16 2019 In White Kids, Mary Bucholtz

investigates how white teenagers use language to display identities based on race and youth culture. Focusing on three youth styles - preppies, hip hop fans, and nerds - Bucholtz shows how white youth use a wealth of linguistic resources, from social labels to slang, from Valley Girl speech to African American English, to position themselves in the school's racialized social order. Drawing on ethnographic fieldwork in a multiracial urban California high school, the book also demonstrates how European American teenagers talk about race when discussing interracial friendship and difference, narrating racialized fear and conflict, and negotiating their own ethnoracial classification. The first book to use techniques of linguistic analysis to examine the construction of diverse white identities, it will be welcomed by researchers and students in linguistics, anthropology, ethnic studies and education.

Urban Youth and Photovoice Dec 08 2021 The past decade brought forth a wave of excitement and promise for researchers and practitioners interested in community practice as an approach based on social justice principles and an embrace of community participatory actions. But, effective community practice is predicated on the availability and use of assessment methods that not only capture and report on conditions, but also simultaneously set the stage for social change efforts. This research, therefore, serves the dual purpose of generating knowledge and also being an integral part of social intervention. Research done in this way, however, requires new tools. Photovoice is one

such tool - a form of visual ethnography that invites participants to represent their community or point of view through photographs, accompanied by narratives, to be shared with each other and with a broader community. Urban Youth and Photovoice focuses on the use of this method within urban settings and among adolescents and young adults - a group that is almost naturally drawn to the use of photography (especially digital and particularly in today's era of texting, facebook, and instagram) to showcase photovoice as an important qualitative research method for social workers and others in the social sciences, and providing readers with detailed theoretical and practical account of how to plan, implement, and evaluate the results of a photovoice project focused on urban youth.

Fast-Food Kids Sep 24 2020 The book provides a thorough account of the role that food plays in the lives of today ' s youth, teasing out the many contradictions of food as a cultural object—fast food portrayed as a necessity for the poor and yet, reviled by upper-middle class parents; fast food restaurants as one of the few spaces that kids can claim and effectively ‘ take over ’ for several hours each day; food corporations spending millions each year to market their food to kids and to lobby Congress against regulations; schools struggling to deliver healthy food young people will actually eat, and the difficulty of arranging family dinners, which are known to promote family cohesion and stability. --

Selected Methodological Problems in Research on

Adolescent Sexuality Mar 19 2020

Representing Youth Feb 22 2023 From youth culture to adolescent sexuality to the consumer purchasing power of children en masse, studies are flourishing. Yet doing research on this unquestionably more vulnerable—whether five or fifteen—population also poses a unique set of challenges and dilemmas for researchers. How should a six-year-old be approached for an interview? What questions and topics are appropriate for twelve year olds? Do parents need to give their approval for all studies? In *Representing Youth*, Amy L. Best has assembled an important group of essays from some of today's top scholars on the subject of youth that address these concerns head on, providing scholars with thoughtful and often practical answers to their many methodological concerns. These original essays range from how to conduct research on youth in ways that can be empowering for them, to issues of writing and representation, to respecting boundaries and to dealing with issues of risk and responsibility to those interviewed. For anyone doing research or working with children and young adults, *Representing Youth* offers an indispensable guide to many of the unique dilemmas that research with kids entails. Contributors include: Amy L. Best, Sari Knopp Biklen, Elizabeth Chin, Susan Driver, Marc Flacks, Kathryn Gold Hadley, Madeline Leonard, C.J. Pascoe, Rebecca Raby, Alyssa Richman, Jessica Taft, Michael Ungar, Yvonne Vissing, and Stephani Etheridge Woodson.

Who You Claim Oct 14 2019 2011 Honorable Mention

for the American Sociological Association Community and Urban Section's Robert E. Park Book Award

The color of clothing, the width of shoe laces, a pierced ear, certain brands of sneakers, the braiding of hair and many other features have long been seen as indicators of gang involvement. But it ' s not just what is worn, it ' s how: a hat tilted to the left or right, creases in pants, an ironed shirt not tucked in, baggy pants. For those who live in inner cities with a heavy gang presence, such highly stylized rules are not simply about fashion, but markers of "who you claim," that is, who one affiliates with, and how one wishes to be seen. In this carefully researched ethnographic account, Robert Garot provides rich descriptions and compelling stories to demonstrate that gang identity is a carefully coordinated performance with many nuanced rules of style and presentation, and that gangs, like any other group or institution, must be constantly performed into being. Garot spent four years in and around one inner city alternative school in Southern California, conducting interviews and hanging out with students, teachers, and administrators. He shows that these young people are not simply scary thugs who always have been and always will be violent criminals, but that they constantly modulate ways of talking, walking, dressing, writing graffiti, wearing make-up, and hiding or revealing tattoos as ways to play with markers of identity. They obscure, reveal, and provide contradictory signals on a continuum, moving into, through, and out of gang affiliations as they mature, drop out, or graduate. *Who You Claim* provides a rare look

into young people ' s understandings of the meanings and contexts in which the magic of such identity work is made manifest.

Handbook of Adolescent Development Research and Its Impact on Global Policy May 01 2021 This book is unique in bringing together cutting-edge research on adolescent development with a focus on policies and interventions directed toward adolescents. The book is also distinctive in its focus on issues that uniquely affect adolescents in low- and middle-income countries.

Handbook of Research on Civic Engagement in Youth Jun 02 2021 Engaging youth in civic life has become a central concern to a broad array of researchers in a variety of academic fields as well to policy makers and practitioners globally. This book is both international and multidisciplinary, consisting of three sections that respectively cover conceptual issues, developmental and educational topics, and methodological and measurement issues. Broad in its coverage of topics, this book supports scholars, philanthropists, business leaders, government officials, teachers, parents, and community practitioners in their drive to engage more young people in community and civic actions.

Embodiment and Epigenesis: Theoretical and Methodological Issues in Understanding the Role of Biology within the Relational Developmental System Feb 16 2020 Volume 44 of Advances in Child Development and Behavior includes chapters that highlight some the most recent research in the area of embodiment and epigenesis. A wide array of topics are discussed in

detail, including cytoplasmic inheritance redux, emergence, self organization and developmental science, and the evolution of intelligent developmental systems. Each chapter provides in-depth discussions, and this volume serves as an invaluable resource for developmental or educational psychology researchers, scholars, and students. Chapters that highlight some of the most recent research in the area A wide array of topics are discussed in detail
