**Hague Securities Convention** Feb 23 2020 The last several decades have seen a dramatic increase in the value, number and speed of cross-border securities transactions, facilitated by advances in technology. Legal uncertainty as to the law governing the perfection, priority and other effects of transfers imposes significant friction costs on even routine transactions and operates as an important constraint on desirable reductions in credit and liquidity exposures. To address the current uncertainties, the 19th Diplomatic Session of the Hague Conference on Private International Law unanimously adopted the "Convention on the Law Applicable to Certain Rights in Respect of Securities held with an Intermediary" (the Hague Securities Convention). This volume provides the most authoritative and comprehensive explanations of the Convention. It is divided into two parts: A General Introduction, which offers a helpful overview of the Convention and succinctly describes its key features, and a full commentary on each article of the Convention. Numerous practical examples effectively illustrate the nature and content of the commentaries.

Child Rights and International Discrimination Law Dec 27 2022 Societies and states are at a crossroad in how children are treated and how their rights are respected and protected. Children's new position and their strong rights create tensions and challenge the traditional relationships between family and the state. The United Nations Convention on the Rights of the Child was adopted unanimously by the General Assembly of the United Nations in 1989 and came into force in 1990. Article 2 places states under an obligation to accord primacy to the best interests of the child in all actions concerning children and to ensure and regulate child protection. This book offers a comparative and critical analysis of the implementation of Article 2 of the United Nations Convention on the Rights of the Child. In order to examine how Article 2 is being

implemented, it is essential to have a sound understanding of the obligations it imposes. The opening chapters will explore the precise content of these obligations in terms of the legislative history of the text, its underlying philosophy, its amplification by the United Nations Committee on the Rights of the Child, and subsequent authoritative interpretations of it by courts around the world. The book will then drill down into the conceptual and theoretical challenges posed by the very nature of the obligations and will offer in-depth exploration of the long-running 'rights v welfare' debate that has always presented something of a challenge in giving effect to children's rights. Contributors are leading academics in the children's rights field drawn from a wide range of countries and jurisdictions worldwide, including those with common law, civilian and mixed traditions. Disciplines represented in the book include law, psychology, political science, childhood studies, social work and anthropology. By drawing together the various facets of Article 2 and analysing it from a range of perspectives, the volume provides a coherent and comprehensive inter-disciplinary analysis on discrimination and the rights of the child.

Lethal Force, the Right to Life and the ECHR Jul 22 2022 In its case law on the use of lethal and potentially lethal force, the European Court of Human Rights declares a fundamental connection between the right to life in Article 2 of the European Convention on Human Rights and democratic society. This book discusses how that connection can be understood by using narrative theory to explore Article 2 law's specificities and its deeper historical, social and political significance. Focusing on the domestic policing and law enforcement context, the book draws on an extensive analysis of case law from 1995 to 2017. It shows how the connection with democratic society in Article 2's substantive and procedural dimensions underlines the right to life's problematic duality, as an expression of a basic value demanding a high level of protection and a contextually limited provision allowing states leeway in the use of force. Emphasising the need to identify clear standards in the interpretation and application of the right to life, the book argues that Article 2 law's narrative dimensions bring to light its core purposes and values. These are to extract meaning from pain and death, ground democratic society's foundational distinction between acceptable force and unacceptable violence, and indicate democratic society's essential attributes as a restrained, responsible and reflective system.

*The Right to Life and the Value of Life* Mar 26 2020 This groundbreaking book is the first collection to investigate the law, political science and ethical perspectives collectively in relation to the right and value of life. Its contributions from international roster of scholars are organized around five themes: a theoretical positioning of life and death; War, armed conflict and detention; Death as punishment; Medical parameters for ending life; and medical policies for the preservation of life. In studying this issue in its contemporary contexts of "right" and "value," the volume fills the current scholarly lacuna in the general subject of the orientations of life. It presents a much-needed examination of key issues in a broad practical and theoretical context, and holds broad appeal for scholars, researchers, and students occupied with issues of war, armed conflict, the death penalty, and various contemporary medico-legal scenarios.

*Economic, Social and Cultural Rights in International Law* Apr 26 2020 The effective promotion, protection and fulfilment of economic, social and cultural (ESC) rights is an important but under-explored component of international human rights law, of which ESC rights form an essential part. They are fundamental to the dignity of every person. At the international level ESC rights are protected in several international instruments, the most comprehensive being the International Covenant on Economic, Social and Cultural Rights (the Covenant) ratified by a majority of States. However, claims of violations of ESC rights are treated less seriously. This book subjects ESC rights protected in the Covenant to a deeper analysis in light of the practice of the Committee on Economic, Social and Cultural Rights while taking into account other relevant sources of ESC rights at national, regional and international levels. It also analyses key issues relevant to ESC rights, with particular emphasis on various themes including State obligations; non-State actor's obligations; women's ESC rights; domestic protection of ESC rights; and State reservations to ESC rights. The book further makes a thorough examination of the rights to work, health, and education. By so doing, it demonstrates that ESC rights are justiciable and must not be marginalised. The book also brings together a collection of essential materials on ESC rights needed to understand and analyse the subject. Written by an international human rights scholar, this timely work will be of value to all those interested in human rights and international law.

*Principles, Definitions and Model Rules of European Private Law* May 28 2020 In this volume, the Study Group and the Acquis Group present the first academic Draft of a Common Frame of Reference (DCFR). It covers the books on contracts and other juridical acts, obligations and corresponding rights, certain specific contracts, and non-contractual obligations. One purpose of the text is to provide material for a possible "political" Common Frame of Reference (CFR) which was called for by the European Commission's Action Plan on a More Coherent European Contract Law of January 2003.

These essays both illuminate the original texts and encourage active engagement with them.

**Attorney General Opinion No. 1980-199** Nov 02 2020 Prior to its amendment in 1974, Article 2, Section 17 of the Kansas Constitution required that in all cases where a general law could be made applicable, no special law could be enacted. This required the legislature to engage in the practice of enacting measures which, while not referring to any unit of local government by name, were so drafted as to be applicable only to them. This practice was condoned by the Supreme Court, even though the "general" nature of the law was in fact a legal fiction. However, following the revision of Section 17, it only remains that laws of a general nature be uniform across the state. As laws applicable to only a few local governmental units are not general, they are therefore outside the scope of Article 2, Section 17 as it now reads, and cannot be voided merely because they are non-uniform in their application. Const., Art. 2, Sec. 17, Art. 12, Sec. 5. *Strengthening the Rule of Law in Europe* Nov 14 2021 Respect for the 'rule of law' is, according to Article 2 of the Treaty on European Union, a value on which the Union is founded and a prerequisite for the accession of new Member States. However in some Member States there are deficiencies as regards the independence of the justice system or other aspects of the rule of law, and on several occasions the Union has been confronted with a rule of law crisis. In order to address this problem the book elucidates the principal elements of a common European rule of law in a global context, and explores the different mechanisms and instruments appropriate to safeguard the rule of law and to address future rule of law crises in the Member States. The book brings together contributions from renowned academics, high-ranking professionals and experts in the fields of European law, public international law and constitutional law.

**The President and Immigration Law** Jul 30 2020 Who controls American immigration policy? The biggest immigration controversies of the last decade have all involved policies produced by the President policies such as President Obama's decision to protect Dreamers from deportation and President Trump's proclamation banning immigrants from several majority-Muslim nations. While critics of these policies have been separated by a vast ideological chasm, their broadsides have embodied the same widely shared belief: that Congress, not the President, ought to dictate who may come to the United States and who will be forced to leave. This belief is a myth. In *The President and Immigration Law*, Adam B. Cox and Cristina M. Rodríguez chronicle the untold story of how, over the course of two centuries, the President became our immigration policymaker-in-chief. Diving deep into the history of American immigration policy from founding-era disputes over deporting sympathizers with France to contemporary debates about asylum-seekers at the Southern border they show how migration crises, real or imagined, have empowered presidents. Far more importantly, they also uncover how the Executive's ordinary power to decide when to enforce the law, and against whom, has become an extraordinarily powerful vehicle for making immigration policy. This pathbreaking account helps us understand how the United States has come to run an enormous shadow immigration system-one in which nearly half of all noncitizens in the country are living in violation of the law. It also provides a blueprint for reform, one that accepts rather than laments the role the President plays in shaping the national community, while also outlining strategies to curb the abuse of law enforcement authority in immigration and beyond.

**Country Report, Gender Equality** Jan 24 2020 Poland is a unified state with a uniform legal system of continental type. The supreme legal act in Poland is the 1997 Constitution, which, among other things, declares that the Republic of Poland is a democratic state that follows the rule of law, implementing the principles of social justice (Article 2). The Constitution also determines the state model, the powers of individual state organs, the relevant sources of law, as well as declaring the freedoms, rights and obligations of persons and citizens. Other universal sources of law are laws (parliamentary acts), ordinances (executive acts) and ratified international agreements (Article 87 of the Constitution). According to Article 95 of the Constitution, legislative power in the Republic of Poland shall be exercised by the Parliament, consisting of two Chambers (the Sejm and the Senate). Legislative initiative is mostly exercised by the Government. Draft laws may also be presented by groups of 15 Deputies or 15 Senators, as well as the President and at least 100 000 citizens (Article 118 of the Constitution). In order for a draft to become law, it has to be passed by a regular majority of votes by both Chambers of Parliament and receive the approval (signature) of the President, who is also the body ordering its promulgation in the Journal of Laws of the Republic of Poland (Dziennik Ustaw, or Dz.U.; hereafter JoL). The President may refuse to sign the law and refer the bill with his reasoned objections back to the Sejm for reconsideration; such presidential veto might be overridden by the Sejm with a qualified majority. The Council of Ministers (the Prime Minister and particular ministers) are authorised to enact executive ordinances when there is a specific legal basis (delegation) for it in an act issued by Parliament (Article 92 of the Constitution).

**The Use of Force and Article 2 of the ECHR in Light of European Conflicts** Mar 18 2022 Article 2 of the European Convention on Human Rights (ECHR) in its current form is incomplete and outdated. Due to significant development at a legislative and judicial level, the right to life

spans beyond what is enumerated within Article 2. With the belief that Article 2 is still relevant, this book investigates how the right to life can be better protected within Europe. It advocates for the modernisation of Article 2 through codifying legislative and judicial developments relevant to this provision in the form of guidelines. It also considers the improvements that can be made by the Council of Europe (CoE) bodies - the European Court of Human Rights (ECtHR), the Committee of Ministers (CoM), the Parliamentary Assembly of the Council of Europe (PACE) and the CoE Commissioner for Human Rights - to encourage adherence to Article 2 and promote effective remedies to prevent future violations. It uses the experience from four internal European conflicts - the Basque conflict, the Chechen conflict, the Northern Ireland Troubles and the Turkish-Kurdish conflict - to illustrate its points.

**Constitutionalism and the Rule of Law** Apr 07 2021 Rule of law and constitutionalist ideals are understood by many, if not most, as necessary to create a just political order. Defying the traditional division between normative and positive theoretical approaches, this book explores how political reality on the one hand, and constitutional ideals on the other, mutually inform and influence each other. Seventeen chapters from leading international scholars cover a diverse range of topics and case studies to test the hypothesis that the best normative theories, including those regarding the role of constitutions, constitutionalism and the rule of law, conceive of the ideal and the real as mutually regulating.
