From the all-star cast that brought you *The Seven Deadly Virtues* and *The Dadly Virtues* comes the ultimate Christmas survival guide: *The Christmas Virtues*. The Christmas season is a minefield of terrors: The family get-togethers with weird uncles, the sloppy office parties, the annoying 10-page Look-at-Us holiday letters—and we haven't even mentioned the Black Friday mobs and that wretched Alvin and the Chipmunks song that plays every 90 minutes on Pandora, whether you like it or not. Rumpah-pah-pum. And don't forget the PC police lurking around every corner looking to beat the last bits of joy and comradeship out of our society. Merry Christmas? Really? But it doesn't have to be this way. 'Tis the season to recapture the wonder of Christmas, in our hearts and in our homes and even out in the public square. *The Christmas Virtues* is a humorous companion for, and guide to, navigating the trials and tribulations of the holiday season. It's a reminder of how we can embrace the joy, hope, and love of Christmas—of the real Christmas. And a call for us to stand up for Christmas because America needs it now, more than ever. For Surveys of Musical Theater, Music Appreciation courses and Popular Culture Surveys. This unique historical survey illustrates the interaction of multiple artistic and dramatic considerations with an overview of the development of numerous popular musical theater genres. This introduction provides more than a history of musical theater, it studies the music within the shows to provide an understanding of the contributions of musical theater composers as clearly as the artistry of musical theater lyricists and librettists. The familiarity of the musical helps students understand how music functions in a song and a show, while giving them the vocabulary to discuss their perceptions. Best known for her Kate Delafield detective series, Katherine V. Forrest is recognized as one of the preeminent figures in lesbian popular literature. Yet her work has received little scholarly attention. This critical study explores Forrest's entire body of work, including her fiction and (perhaps more importantly) her writing about writing, popular genres and her readers. Her science fiction and romance novels are analyzed, with a focus on the reasons behind their enduring appeal. Her most famous romance, *Curious Wine*, originally published in 1984, remains in print—a longevity far exceeding the typical romance novel. Mortality remains a taboo topic in much of Western society, but death and violence continue to be staples of popular television. We can better understand the appeal of violence by investigating psychological theories surrounding anxiety about death and the defenses we use to manage that anxiety. This book examines five recent television series—*Game of Thrones*, *The Punisher*, *Jessica Jones*, *Sons of Anarchy* and *Hannibal*—and shows how fictional characters' motivations teach viewers about both the constructive and destructive ways we try to deal with our own mortality. Instead of dismissing violent television as harmless entertainment or completely condemning it as a dangerous trigger of hostile behavior, this book shows its effects on viewers in a more nuanced manner. It provides a new perspective on the enjoyment of violent television, enhancing fans' appreciation and sparking ongoing discussions about their value to both the individual and society. The emergence and adoption of metallurgy is one of the seminal topics of investigation in the history of archaeology, particularly in the history of archaeological research in Southeast Asia. The site of Ban Chiang, Thailand, is a central site in debates surrounding the chronology and significance of early metallurgy in the region. This book is the first in a series of four volumes that review the contributions of Ban Chiang and three related sites in northeast Thailand excavated by the Penn Museum to an understanding early metallurgy in Thailand. As the study of archaeometallurgy is a complex topic that draws on numerous technical and social science disciplines, this introductory volume presents in several chapters the background needed to assess the metal and related evidence presented in the subsequent volumes in this series. A history of perspectives on the role of metals in ancient societies generally and Southeast Asia, specifically, is provided. Other chapters debunk the conventional paradigm for understanding metals and society and provide current theoretical perspectives and new paradigms for the study of ancient metals. The geological basis for the presence and location of metal ore resources in the region is reviewed. The final chapter presents

a technical overview of ways material properties of ancient metals may be studied. While providing a background to the study of metals at Ban Chiang, the volume also reviews, synthesizes, and repositions the method and theory for the study of archaeometallurgy generally. Over 17 operas, each including Principal Characters, Brief Story Synopsis, Story Narrative with Music Highlight Examples and Burton D. Fisher's insightful and in depth Commentary and Analysis. Humans have engaged in artistic and aesthetic activities since the appearance of our species. Our ancestors have decorated their bodies, tools, and utensils for over 100,000 years. The expression of meaning using color, line, sound, rhythm, or movement, among other means, constitutes a fundamental aspect of our species' biological and cultural heritage. Art and aesthetics, therefore, contribute to our species identity and distinguish it from its living and extinct relatives. Science is faced with the challenge of explaining the natural foundations of such a unique trait, and the way cultural processes nurture it into magnificent expressions, historically and ethnically unique. How do the human mind and brain bring about these sorts of behaviors? What psychological and neural processes underlie the appreciation of painting, music, and dance? How does training modulate these processes? Are humans the only species capable of aesthetic appreciation, or are other species endowed with the rudiments of this capacity? Empirical examinations of such questions have a long and rich history in the discipline of psychology, the genesis of which can be traced back to the publication of Gustav Theodor Fechner's *Vorschule der Aesthetik* in 1876, making it the second oldest branch in experimental psychology. The *Oxford Handbook of Empirical Aesthetics* brings together leading experts in psychology, neuroimaging, art history, and philosophy to answer these questions. It provides the most comprehensive coverage of the domain of empirical aesthetics to date. With sections on visual art, dance, music, and many other art forms and aesthetic phenomena, the breadth of this volume's scope reflects the richness and variety of topics and methods currently used today by scientists to understand the way our mind and brain endow us with the faculty to produce and appreciate art and aesthetics.*

What would it be like to feel good about your body? Does anyone really fully appreciate their body? If diverse body shapes and sizes were shown in the media, would this change your perception? While this book addresses all of these questions and more, it is not simply a standard scientific exploration of poor body image. Instead, it examines a new movement focused on understanding what it is that leads people to love, appreciate, take care of, and embrace their bodies. Featuring chapters written by leading, international experts in the science and practice of body image, *Body Positive* is a provocative and engaging look at how we feel about our physical selves in the twenty-first century - and how we can all come to feel better than we currently do.

This book examines performative strategies that contest nationalist prejudices in representing the conditions of refugees, the stateless and the dispossessed. In the light of the European Union failing to find a political solution to the current migration crisis, it considers a variety of artistic works that have challenged the deficiencies in governmental and transnational practices, as well as innovative efforts by migrants and their hosts to imagine and build a new future. It discusses a diverse range of performative strategies, moving from a consideration of recent adaptations of Greek tragedy, to performances employing fictive identification, documentary dramas, immersive theatre, over-identification and subversive identification, nomadism and political activism. This study will appeal to those interested in questions of statelessness, migration, and the problematic role of the nation-state. Focussing on access to territory and authorization of presence and residence for third-country nationals, this book examines the EU law on immigration and asylum, addressing related questions of security of residence. Concentrating on the key measures concerning both the rights of third-country nationals to enter and stay in the EU, and the EU's construction of illegal immigration, it provides a detailed and critical discussion of EU and ECHR migration and refugee law. Rights of admission include three categories of entrants: labour migrants, family migrants, and asylum seekers and refugees. Legal entry raises further questions, and recent key measures, including the EU Blue Card Directive, the Family Reunification Directive, and the Dublin Regulation and related instruments are examined. As most of these EU measures deal with those border crossings where human rights norms have already established some constraints on state discretion, the interaction between the EU norms and the case law of the European Court of Human Rights (ECtHR) is a key concern. The uniting theme is the interaction between established human rights norms, in particular the ECHR, and EU law.
