Many employers complain about the poor communication skills of many young people seeking employment; and many people in employment are handicapped by the poor quality of their written work. While bad spelling, ineffective punctuation and faults in grammar create barriers between the writer and the reader, good English makes the reader feel at ease. The benefits of being a good writer at work are: Managers need to be able to communicate in order to get ideas across. If they cannot, they will be unable to make their viewpoint heard and they will be unable to influence customers, suppliers and colleagues as desired. If you can write well, you will find that your views are given prominence over those of others. Effective communication, and that includes writing, is the key to career success and advancement. This book is for those who have difficulty in getting thoughts into words or their ideas across, as well as those who are satisfied with their writing but are ready to consider the possibility of improving it. It is all about the ways in which writing at work is important - helping the reader to observe, remember, think, plan, organise and communicate. An innovative contribution to political theory, *State Work* examines the labor of government workers in North America. Arguing that this work needs to be theorized precisely because it is vital to the creation and persistence of the state, Stefano Harney draws on thinking from public administration and organizational sociology, as well as poststructuralist theory and performance studies, to launch a cultural studies of the state. Countering conceptions of the government and its employees as remote and inflexible, Harney uses the theory of mass intellectuality developed by Italian worker-

theorists to illuminate the potential for genuine political progress inherent within state work. *State Work* begins with an ethnographic account of Harney's work as a midlevel manager within an Ontario government initiative charged with leading the province's efforts to combat racism. Through readings of material such as *The X-Files* and *Law & Order*, Harney then reviews how popular images of the state and government labor are formed within American culture and how these ideas shape everyday life. He highlights the mutually dependent roles played in state work by the citizenry and civil servants. Using as case studies Al Gore's National Partnership for Reinventing Government and a community-policing project in New York City, Harney also critiques public management literature and performance measurement theories. He concludes his study with a look at the motivations of state workers. Bonnie Fox Schwartz examines the New Deal's Civil Works Administration, the first federal job-creation program for the unemployed. Challenging assumptions that social workers and other urban liberals dominated New Deal relief agencies, she describes the role of engineers and industrial managers in the CWA's employment of 4.2 million Americans during the winter of 1933-1934. This book addresses this relationship between the professions of social work and law and helps social workers develop the knowledge necessary to practice in a legal environment. The author focuses on how the law affects the day-to-day practice of social work; the creation, administration, and operation of social service agencies; and the ways in which social workers and attorneys collaborate to serve the public. In the midst of the Depression, a government agency was created that changed the lives of thousands of Americans. The Works Progress Administration (WPA) was more than a program that put the unemployed to work, it was a revolutionary concept that sought to improve the lives of Americans through the physical improvement of their surroundings and the physical and intellectual improvement of themselves. For the people of Detroit, the WPA built schools and libraries, provided clothing and shelter, and enriched their lives through literacy, health, and educational programs. It brought art, theater, and music to the masses through groundbreaking cultural programs and created the infrastructure necessary to allow Detroit to blossom into the Arsenal of Democracy and one of America's greatest cities. Swiss citizens approve of their government and the way democracy is practiced; they trust the authorities and are

satisfied with the range of services Swiss governments provide. This is quite unusual when compared to other countries. This open access book provides insight into the organization and the functioning of the Swiss state. It claims that, beyond politics, institutions and public administration, there are other factors which make a country successful. The authors argue that Switzerland is an interesting case, from a theoretical, scientific and a more practice-oriented perspective. While confronted with the same challenges as other countries, Switzerland offers different solutions, some of which work astonishingly well. This volume challenges the widely held assumption that the professional practice of student affairs administration transcends the influence of organizational culture. Based on data and commentaries from more than 1,100 practitioners, this book describes how the experience of student affairs administrators varies by institutional type. The findings paint a multifaceted and integrated portrait of the profession. For instance, the standard bearers at liberal art colleges share as much in common with the generalists at comprehensive institutions as they do with the interpreters at religiously affiliated campuses. The specialists at research universities are juxtaposed against the producers at community colleges, however they have closer ties to the change agents at Hispanic-serving institutions. The work of the guardians at historically Black colleges and universities is linked to practice at both liberal arts and community colleges. Where You Work Matters offers current and future administrators a greater appreciation for the vibrancy and complexity of the student affairs profession. *HH05, Social Work Administration: Dynamic Management and Human Relations, 3/e, Rex A.
