"The purpose of scientific writing," according to Barbara Gastel and Robert A. Day, "is to communicate new scientific findings. Science is

simply too important to be communicated in anything other than words of certain meaning." This clear, beautifully written, and often funny text is a must-have for anyone who needs to communicate scientific information, whether they're writing for a professor, other scientists, or the general public. The thoughtfully revised ninth edition retains the most important material—including preparing text and graphics, publishing papers and other types of writing, and plenty of information on writing style—while adding up-to-date advice on copyright, presenting online, identifying authors, creating visual abstracts, and writing in English as a non-native language. A set of valuable appendixes provide ready reference, including words and expressions to avoid, SI prefixes, a list of helpful websites, and a glossary. Students and working scientists will want to keep *How to Write and Publish a Scientific Paper* at their desks

and refer to it at every stage of writing and publication. Proprietors of home and small offices will learn how to streamline their electronics budget and boost computer productivity in this step-by-step guide to buying and managing low-cost, high-yield computer systems. The guide describes in plain English the kinds of hardware and software to buy, where to purchase them for less money, how to install and operate them, and how to integrate system components so that they work together as a seamless digital whole. With an enlightened understanding of their digital workspace, small business owners will boost business performance, save money, and free up time for more essential office tasks. This book constitutes the thoroughly refereed post-conference proceedings of the 5th International ICST Conference on Digital Forensics and Cyber Crime, ICDF2C 2013, held in September 2013 in Moscow, Russia. The 16 revised full papers presented together with

2 extended abstracts and 1 poster paper were carefully reviewed and selected from 38 submissions. The papers cover diverse topics in the field of digital forensics and cybercrime, ranging from regulation of social networks to file carving, as well as technical issues, information warfare, cyber terrorism, critical infrastructure protection, standards, certification, accreditation, automation and digital forensics in the cloud. This book constitutes the refereed proceedings of the 6th International Conference, FUN 2012, held in June 2012 in Venice, Italy. The 34 revised full papers were carefully reviewed and selected from 56 submissions. They feature a large variety of topics in the field of the use, design, and analysis of algorithms and data

structures, focusing on results that provide amusing, witty but nonetheless original and scientifically profound contributions to the area. The 3-volume set CCIS 1422, CCIS 1423 and CCIS 1424 constitutes the refereed proceedings of the 7th International Conference on Artificial Intelligence and Security, ICAIS 2021, which was held in Dublin, Ireland, in July 2021. The total of 131 full papers and 52 short papers presented in this 3-volume proceedings was carefully reviewed and selected from 1013 submissions. The papers were organized in topical sections as follows: Part I: artificial intelligence; Part II: artificial intelligence; big data; cloud computing and security; Part III: cloud computing and security; encryption and cybersecurity; information hiding; IoT security.
