Jeopardy in the Courtroom Nov 23 2022 The credibility of children's testimony is a highly debated topic in America's courtrooms, universities, and living rooms. Does the ingenuousness of children assure that their testimony will always be truthful? Or are children easily misled by overzealous investigators and therapists into making untrue allegations? Stephen J. Ceci and Maggie Bruck contend that the truth falls somewhere between these extremes. Using case studies ranging from the Salem Witch Hunt to the Little Rascals Day Care case to illustrate their argument, *Jeopardy in the Courtroom* draws from the vast corpus of scientific research to clarify what is most relevant for evaluating and understanding children's statements made in the legal arena.

Dominant Algorithms to Evaluate Artificial Intelligence: From the View of Throughput Model May 17 2022 This book describes the Throughput Model methodology that can enable individuals and organizations to better identify, understand, and use algorithms to solve daily problems. The Throughput Model is a progressive model intended to advance the artificial intelligence (AI) field since it represents symbol manipulation in six algorithmic pathways that are theorized to mimic the essential pillars of human cognition, namely, perception, information, judgment, and decision choice. The six AI algorithmic pathways are (1) Expedient Algorithmic Pathway, (2) Ruling Algorithmic Guide Pathway, (3) Analytical Algorithmic Pathway, (4) Revisionist Algorithmic Pathway, (5) Value Driven Algorithmic Pathway, and (6) Global Perspective Algorithmic Pathway. As AI is increasingly employed for applications where decisions require explanations, the Throughput Model offers business professionals the means to look under the hood of AI and comprehend how those decisions are attained by organizations. Key Features: - Covers general concepts of Artificial intelligence and machine learning - Explains the importance of dominant AI algorithms for business and AI research - Provides information about 6 unique algorithmic pathways in the Throughput Model - Provides information to create a roadmap towards building architectures that combine the strengths of the symbolic approaches for analyzing big data - Explains how to understand the functions of an AI algorithm to solve problems and make good decisions - informs managers who are interested in employing ethical and trustworthiness features in systems. *Dominant Algorithms to Evaluate Artificial Intelligence: From the view of Throughput Model* is an informative reference for all professionals and scholars who are working on AI projects to solve a range of business and technical problems.

Sports, Abuse, and Our Children Mar 03 2021 The problems with sports and our youngsters are reported almost daily in our newspapers and TV news. We adults must become active in eliminating the verbal and

emotional abuse that many of our kids are experiencing in their participation in sports. The common values; sportsmanship, teamwork, responsibility, fairness, respect, discipline, and the enjoyment of playing; are being eroded in the name of winning at all costs and in the fulfilling of the goals of coaches and parents. Coaches and parents must empower their kids to grow and develop healthy bodies and minds. They must create an environment in which the kids can have joyful experiences playing soccer, baseball, softball, football, hockey, and other great games. The author has been a teacher and coach for over 50 years, working with elementary, junior high school, high school, and adult teams. In this book he presents practical, proactive ways to: -- Have Parents and Coaches work together for their players and children. -- Have Coaches work positively and effectively with their players. -- Have Parents, in the family setting, deal positively and effectively with their children's sports ventures.

Brave New E-world (In 2 Volumes) Feb 02 2021 In this two-volume work, writing for a general audience, Dr Michael Gurvitch proposes a unifying concept of electronics which combines the history of electronics with the science of evolution. Drawing on his long experience in scientific development, Gurvitch illuminates electronics from the inside using the point of view of a practicing scientist. What is elusive and often overlooked becomes palpable, engaging and even humorous with the author's tireless and methodical exposition of fundamental scientific roots from which electronics grew and continues to grow. This set contains both volumes of Brave New e-World, presenting the historical review of electronics from the middle of the 18th century to the present day. From the telegraph to the quantum computer and superconductors, Gurvitch combines personal recollections with scientific knowledge to advance the final thesis: the representation of a new non-biological evolution in electronics. This is all done in an intellectually engaging way: spiced by historical anecdotes, warmed by Gurvitch's enthusiastic love for science, and completed with the full participation of the reader. The concluding argument on electronic evolution is alarming, but it might prove to be a necessary concern in the continual development of

electronic technologies.

These Are Our Bodies, Middle School Leader Guide Oct 22 2022 Our inherent value and worth comes from God's love for us, but our modern world is filled with sexual expression that too often leads us away from the life of Christ. As Christians seeking to live a life worthy of our calling and desiring to pass along these values to our children and youth, this

book explores how we (as parents and adults) can explore issues of sexuality in the context of our faith. A sexuality education resource from a mainline/progressive denominational perspective aids the adult reader/teacher/parent in learning and using skills that enable them to embrace and affirm the wholeness of sexuality and to talk openly and honestly about the connection of sexuality and faith. This book, grounded from a theological perspective, focuses on foundational issues for addressing how we (and why we) are called to have these conversations in a faithful community to support families. The importance of looking at one's sexuality throughout the lifespan through the lenses of decision making, faith and daily life, respect, growth and change, behavior, responsibility, values, prayer, and intentionality is explored, offering a grounding as well as stand-alone resource for individuals and churches to build upon.

THE THRILLER Oct 10 2021 The Thriller: Scripting Seat-Gripping Suspense plumbs nine-score thrillers for recurring features that build

nape-prickling, heart-pounding suspense. Fodder for analysis embraces domestic and foreign fare, classic and contemporary, ranging from Ghost, Speed, Seven, Psycho, and The Silence of the Lambs to La Femme Nikita and Yogen [Premonition]. Text eschews a connecting-the-dots, painting-by-numbers approach, in belief that formulas drain the lifeblood of creativity and inevitably spawn a ho-hum product. That said, the eight factors culled from the covered films constitute useful tools in the screenwriter's arsenal. Perhaps the best groundwork for a thriller is infiltrating the ATF/FBI/IRA, or a brigade of arms-running mercenaries. Short of that, watching films and reading scripts will work wonders. In that spirit, the book debuts three feature-film scripts for critical scrutiny: mystery thriller "Stateline"; police thriller "Cashing Out"; supernatural thriller "Birthmarks."

Brainiac Oct 18 2019 NATIONAL BESTSELLER • A witty, charming, and engaging dive into trivia's colorful history, from America's highest-earning game show contestant of all time "Insightful, informative, and written with a strong dose of humor and humility. . . . I loved this book."—Will Shortz, crossword editor, *The New York Times* Ken Jennings is trivia's undisputed king—and as he traces his rise from anonymous computer programmer to nerd folk icon, he explores his newly conquered kingdom: the world of trivia itself. Trivia, he has found, is centuries older than his childhood obsession with it. Whisking us from the coffeehouses of seventeenth-century London to the Internet age, Jennings chronicles the ups and downs of the trivia fad: the quiz book explosion of the Jazz Age; the rise, fall, and rise again of TV quiz shows; the nostalgic campus trivia of the 1960s; and the 1980s, when *Trivial Pursuit*® again made it fashionable to be a know-it-all. Jennings also investigates the shadowy demimonde of today's trivia subculture, guiding us on a tour of trivia across America. He goes head-to-head with the blowhards and diehards of the college quiz-bowl circuit, the slightly soused faithful of the Boston pub trivia scene, and the raucous participants in the annual Q&A marathon in Stevens Point, Wisconsin, "The World's Largest Trivia Contest." And, of course, he takes us behind the scenes of his improbable 75-game run on *Jeopardy!* But above all,

Brainiac is a love letter to the useless fact. (Who knew that there's a crater on Venus named after Laura Ingalls Wilder? Ken Jennings, that's who.) Engaging and erudite, Brainiac is an irresistible celebration of nostalgia, curiosity, and geeky obsession—in a word, trivia.

Game of Mind Manipulation Mar 15 2022 Win and Beat Manipulators at Their Own Games A game can be defined as “an activity that has rules for winning and losing.” Contrarily, another definition of it is “to use those rules of an activity to get what you want, in a way that is dishonest.” Whether you want to admit it, you are already playing a game called “life,” and in it there are those who live by the latter definition - willing to cheat the game via manipulation. What is manipulation? It's the controlling of an individual through misleading means in order to get something that these manipulators want, whether money, power, relationship, or sex. Many people are victims of others' manipulative behaviors on a regular basis without realizing it, including you. Think about those people from your life ranging from families and friends to acquaintances and strangers you've met on the street. Were there ever times when you had a gut-wrenching feeling in your stomach that something was wrong, and it turned out to be they were manipulating you? How did it make you feel? Confused? Angry? Miserable? Nobody likes being taken advantage of, but unfortunately it's a part of human nature throughout history to want to assert control over others as survival of the fittest. Being ignorant to that will only continue to make you a victim. If you only knew the rules of the game and how to play it, you could have prevented the manipulation. But now you can do something about it by fighting back and beating the manipulator at their own mind games with “Game of Mind Manipulation.” By taking a page out of their playbook, you'll be guided on the following: * Entrance inside the mind of master manipulator * Patterns for predicting manipulator's next move * Subtle manipulations going on behind the scene * Traits shared among most common manipulators * Tactics to stop manipulator dead right in the track * In-depth look into the most pervasive mind

games * Expert solutions for specific manipulative behaviors * And much more! Who said the game of life was going to be easy? While it may not always be ideal due to all the manipulative characters out there, it certainly can be beaten and won once you know all the right signs to look for and have the right strategies to maneuver. Either you play it to win it, or get played by it to lose it. The choice is yours. Make your first move now, and checkmate!

Engines of World War III Sep 28 2020 Great towers have been destroyed! Our nuclear power plants remain vulnerable to attack. Many questions trouble the population of the world: Did the Bible predict 21st Century terrorism? Did World War III, begin September 11, 2001? Do we live in the chaotic last days described by ancient prophets? Are we

sufficiently prepared? Will good prevail over evil? Are the dangers of the last days both physical and spiritual? The Bible contains alarming news. But, all the biblical shock and awe is secondary to learning the purpose of life. Coincidences, between scripture and current events, provide clues to the catastrophic signs that will precede the 1000 year Reign of Christ. God's teachings, Satanic opposition, terrorism, prophecies, both Bush Administrations, nuclear war and fallout, terrible disasters, the Gulf and Iraq Wars, World War III, pornography, the Abu Ghraib prison scandal, are all fitting together to complete and reveal a great puzzle. Eternal consequences are of great importance. The scriptures

counsel how to cope with latter day challenges. Commandments can't be ignored without suffering consequences. Procrastination is a thief! Apathy towards Jesus Christ poisons the eternal soul. So study, ponder and pray to unlock the secrets of scripture. Then chart your eternal future!
