**New Hokkaido** Jan 01 2021 It is 1987, forty-five years after Japan conquered New Zealand, and the brutal shackles of the occupation have loosened a little: English can be spoken by natives in the home, and twenty-year-old Business English teacher Chris Ipswitch has a job at the Wellington Language Academy. But even Chris and his famous older brother—the Night Train, a retired Pan-Asian sumo champion—cannot stay out of the conflict between the Imperial Japanese Army and the Free New Zealand movement. When Chris takes it upon himself to investigate a terrible crime, he is drawn into the heart of the struggle for freedom, guided along the way by the mysterious Hitomi Kurosawa and the ghost of Kiwi rock 'n' roll legend and martyr Johnny Lennon. New Hokkaido is a fascinating counter-factual history and an adventure that thrills and disquiets at every turn.

**Local History and War Memories in Hokkaido** Oct 18 2019

Hokkaido, the northernmost island of Japan, barely features in most histories of the Second World War. However, the combination of distinctive war experiences, a vibrant set of local historian groups, and powerful media organizations disseminating local war history, has generated an identifiable set of local collective memories. Hokkaido's status as an early colonial acquisition also makes the island an important vantage point from which to reassess the course and nature of the Japanese Empire. This book argues that Hokkaido's experiences of war and its militarized post-war constitutes a local case study with a much greater national and international significance on both theoretical and empirical grounds than first impressions might suggest. Using Japanese-language sources presented for the first time in English and a number of detailed local history case studies, it offers a fascinating and hitherto little-known perspective on the Second World War. It also combines a comprehensive theory of how war memories operate at the local level within a broad historical context that explains Hokkaido's pivotal role within Japanese imperial history. Demonstrating that understanding local history and memories is essential for a nuanced understanding of national history and memories, the book will be highly valuable to students and scholars of Japanese history, Second World War history, and Asian history.

**Prisons and Forced Labour in Japan** Jan 21 2020 Prisons and Forced Labour in Japan examines the local, national and international significance of convict labour during the colonization of Hokkaido between 1881 and 1894 and the building of the Japanese empire. Based on the analysis of archival sources such as prison yearbooks and letters, as well as other eyewitness accounts, this book uses a framework of global prison studies to trace the historical origins of prisons and forced labour in early modern Japan. It explores the institutionalization of convict labour on Hokkaido against the backdrop of political uprisings during the Meiji period. In so doing, it argues that although Japan tried to implement Western ideas of the prison as a total institution, the concrete reality of the prison differed from theoretical concepts. In particular, the boundaries between prisons and their environment were not clearly marked during the colonization of Hokkaido. This book provides an important contribution to the historiography of Meiji Japan and Hokkaido and to the global study of prisons and forced labour in general. As such, it will be useful to students and scholars of Japanese, Asian and labour history.
